ATTORNEY GENERAL
GEORGE JEPSEN

TO THE HONORABLE ATTORNEY GENERAL GEORGE JEPSEN,

We are having a problem in Vernon that I believe along with some citizens that may require your attention. Here are some of the facts associated with the problem.

1. The sale of Rockville General Hospital a non profit facility is being sold to a for profit organization.
2. No public hearing has been scheduled to date
3. There was a change of buyer from Vanguard Health System of Tennessee to Tenet Health of Texas. Both of these were discussing turning into profit systems when purchased. It should be noted that it was suggested that junk bonds were used for the purchased something that should be looked into. Information from (Yahoo Finance) was where they said they saw the information
4. With the Affordable Health Care Act the need for a good health care unit, which Rockville General Hospital has been, the need for this situation to proceed ahead needs serious discussion
5. Rockville General Hospital has been given huge endowments, donations, as well as other monies for individual projects that need to be discussed about their disposition if a for profit does take place.

We need help determining the direction ECHN is taking and whether or not they are following correct procedure.

Thank you for a response and any advice you may give.

Yours Truly,

Marie A. Herbst

Marie A. Herbst
