

size, shape and color. Cleans in part; shells thin  
for size of nut; fine texture, good, nutty flavor  
similar to *dentata*. Sample to Reed, sample filed,  
sample for planting. These nuts occurred on  
to the burr because of scarcity of pollen. The  
nuts do not resemble *molliissima* especially  
nuts of P.I. 36666 v RBC, 32 p.p. fresh! FP. 1066.  
Leaves sent with nuts also resemble *Setaria* leaves.
