Seed mimeo. sent '44

Marton Arboretum,

4/28/34 2# BR seed, *C. crenata*  
3# FP-531 seed, *C. mollissima*\*

\* 12/27/43 - 119 plants alive in 1938; now only 15 with 2-3" diam & 4-5 ft high; many with badly sun-scalded trunks; about 20 plants of "whip stock" either 1 or 2-yr-old growth.

4/16/51 - Only 35 trees now living & are from seed sent in 1934; now only 4-10 ft. tall. The 19 introductions by Brattis were all dead by 1940 (received in 1934); *Henryi* failed first winter.
