

- Weevils present,
- 9/30/48 9 samples weeviled into rec'd. Variety not known.
- #1 light copper, attractive at first but fades in spots; medium size; do not clean well.
  - #2 smaller than #1 same color and fading; have dried hard, cleans better than #1.
  - #3 same size as #2, a little more attractive, do not clean.
  - #4 size of #1, medium, more attractive than #1 to 3, cleans in part.
  - #5 size of #1, thin down at apex, dull blackish brown, do not clean.
  - #6 size of #1, rather attractive, bright and fades little, cleans in part to poorly.
  - #7 size of #1, fades to light coffee brown, do not clean.
  - #8 about size of #1 a uniform brown color but not especially attractive, clean in part, good bearer and 10 days earlier than others.
  - #9 light copper, some dark lines or striations present, smaller nut than #1, cleans in part.

Both introductions 78744 and 76010 are Tiger Paw from Pakring, but quite a bit of variation in nuts, especially #5, 6 and 8.
