Subject: RE: Norwalk-Questions on CTDPH's Requirements and Procedures

Dear Mr. Adelsberger:

This correspondence is provided in response to your March 22, 2013 e-mail, which included an attached letter, regarding the pre-demolition asbestos inspection of the Norwalk First Taxing District, Water Department Spring Hill booster pump station.

The Department of Public Health (DPH) Asbestos Program has completed its review of the information provided in response to comments made by the agency following its initial assessment of the pre-demolition asbestos inspection report for this facility. Based upon this review, it is determined that the comments made by the DPH Asbestos Program concerning that report have been appropriately addressed. Given that the DPH Asbestos Program has not inspected this facility firsthand, it appears that the requirement of the asbestos National Emission Standards for Hazardous Air Pollutants (40 CFR Part 61, Subpart M) to conduct a thorough inspection to determine the presence of asbestos prior to the commencement of the demolition of this facility has been satisfied.

Please contact me should you wish to discuss this matter further. Thank you for your efforts in protecting public health and the environment.

Sincerely,

Ronald Skomro
Supervising Environmental Analyst
DPH Asbestos Program
