

INITIAL ENVIRONMENTAL REVIEW

Environmental Planning
450 Columbus Blvd, Suite 1305
Hartford, Connecticut 06103

This Initial Environmental Review (IER) is intended to provide the sponsoring/client agency and the project team with baseline environmental information and to assist in determining what effects, if any, the proposed project/action may have on the environment. This review is conducted using readily available information and is based on qualitative assessments. The IER may be used to assess potential issues that may or may not require additional environmental review or study. **This IER, however, does not replace the A/E Consultant's obligation to continually assess what permits, certifications, or approvals the project may require as the project progresses or from submitting DCS's Checklist for Permits, Certifications, and Approvals with each phase of the project.** If multiple sites apply to the project, then an IER should be filled out for each site.

Is this a revised IER Yes No If yes, date of previous IER:
Are multiple sites involved? Yes No If yes, how many:
