RE: Marlborough STEAP Grant - Town Center Water Project Phase II

The Town has completed the installation of 1100 feet of water main, and the 25,000 gallon storage tank as proposed in our STEAP application. Due to the competitive bidding environment these two project where completed under budget leaving a \$196,000.00 available for additional construction, \$146,000 in STEAP funds and \$50,000 in Town funds.

The Town has submitted plans to DPH, the STEAP Grant overseer, to extend the water main another 1100 feet to service Middlesex Hospital, Marlborough Medical Offices, and Town Hall. This extension is continuation of Phase II, however, the design engineer labelled the plans as Phase III.

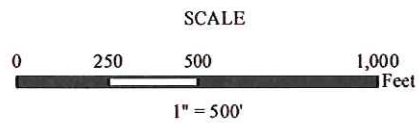

DPH has advised the Town that OPM authorization to enlarge the area of construction under this STEAP Grant award is necessary. Therefore, the Town is requesting such authorization from OPM to extend the water mains within the Town Center area to continue promoting economic development opportunities and sustainability of existing businesses. Enclosed is plan showing eh extension areas.
