

Department of Children and Families

Connecticut Juvenile Training School Annual Report

***Submitted to the Judiciary Committee, the Human Services Committee and
the Select Committee on Children of the Connecticut General Assembly
pursuant to Section 17a-6b of the Connecticut General Statutes***

***Submitted to the State Advisory Council on Children and Families
pursuant to Section 17a-32a of the Connecticut General Statutes***

February 2010

**CONNECTICUT JUVENILE TRAINING SCHOOL ADVISORY BOARD
REPORT TO THE COMMISSIONER OF THE DEPARTMENT OF CHILDREN
AND FAMILIES**

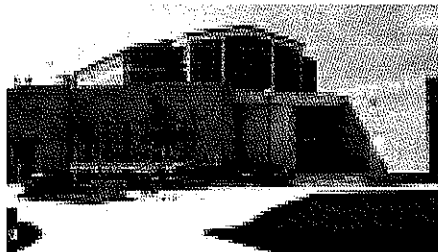

This report is submitted pursuant to Connecticut General Statutes Section 17a-6b(c), Section 2 of Public Act 04-89, "An Act Concerning Reports on Adjudicated Youth in the Care of the Department of Children and Families" and Section 3 of Public Act 09-205. After an initial description of Connecticut Juvenile Training School, (hereafter referred to as CJTS), the data in the first section of this report, will be submitted pursuant to CGS §17a-6b(c). The second section of the report will be enumerated to coincide with Section 17 a-6b(c) of Public Act §04-89. Recommendations will then follow.

Overview of CJTS

CJTS is a secure treatment facility for boys committed as delinquent to the Department of Children and Families. Opened on August 27, 2001, the mission of CJTS is as follows:

Mission: To prepare boys committed to the Department of Children and Families and placed in a secure facility for successful community re-entry by providing innovative educational, treatment and rehabilitative services.

William Rosenbeck, serves as Superintendent of CJTS. Leo Arnone is the Bureau Chief of Juvenile Services.

Outside view of CJTS

Required Data – CGS §17a-6b(c)

Unless otherwise specified, all data relates to admissions to CJTS that occurred during calendar year 2009 (January 1, 2009 through December 15, 2009). (The time frame for data collection was terminated on December 15, in order to allow time to collate the information and produce this report.) During that time frame, there were 203 admissions of 175 unique individuals. In other words, 175 boys were admitted to CJTS at least once during calendar year 2009 through December 15; some of these boys were admitted more than once, resulting in 203 admissions. In reporting most statistics related to admissions, each of the 203 admissions is treated individually, as the variables discussed can change from admission to admission, even with the same child. Race/ethnicity, a static variable, is presented based on the 203 admissions and based on the 175 unique individuals.

Appendix 1 provides a summary data table of these 203 admissions. Most of the information in this table is summarized in this narrative. However, the table presents the information by child (with identifying data removed from the table for reasons of confidentiality), in order of admission. Further, the table includes some information not specifically requested in CGS 17a-6b(c), but still considered relevant by the CJTS Advisory Board, established pursuant to subsection (b) of section §17a-6 of the Connecticut General Statutes.

(1) The number, age, ethnicity and race of the residents placed at the training school, including the court locations that sentenced them, the number sentenced from each court location and the offenses for which the child was sentenced:

- **Number of Admissions** - There were 203 admissions of 175 unique individuals to CJTS from January 1 2009 through December 15 2009.
- **Age** - Average age at time of admission was 16 years. Breakdown by age at time of admission for the 203 admissions was as follows:

Table 1: Ages of Boys at Time of Admission to CJTS

Age	Number of Boys
12	1
13	2
14	31
15	59
16*	85
17*	25

*Any child age 16 or older that commits an offense is adjudicated through the adult system. However, CJTS provides services to boys who commit their offense(s) prior to age 16, but whose commitments run into ages 16 or 17.

Race/Ethnicity - The following table presents a breakdown of racial/ethnic background of boys admitted to CJTS during calendar year 2009 through December 15. The data is presented for all 203 admissions (including each admission of boys admitted more than once) as well as specifically for the 175 unique individuals admitted.

Table 2: Race/Ethnicity of Boys Admitted to CJTS

Race	All Admissions		Unique Individuals Admitted	
	Number	Percentage	Number	Percentage
African-American	98	48%	85	49%
Caucasian	32	16%	29	17%
Latino	57	28%	47	27%
Asian	1	5%	1	.6%
Other	15	7%	13	7%

Committing Court Locations – The following Table lists the percentage of the 203 admissions that were sentenced from the various court locations across the state:

Table 3: Court Locations of Unique Individuals Admitted to CJTS from January 1 2009 through December 15 2009

Town	Number of Unique Admissions	Percentage of Admissions
Bridgeport	21	12%
Danbury	7	4%
Hartford	37	21%
Middletown	7	4%
New Britain	10	6%
New Haven	39	22%
Norwalk	5	3%
Rockville	6	3%
Stamford	7	4%
Torrington	4	2%
Waterbury	19	11%
Waterford	7	4%
Willimantic	6	3%

- **Prior Placement** – The table below lists the placements of the 203 admissions immediately prior to placement at CJTS.

Table 4: Placement Immediately Prior to Admission to CJTS for Boys Admitted to CJTS from January 1 2009 through December 15 2009

Prior Placement	Number of Admissions	Percentage of Total Admissions
Residential placement	67	33%
Home on parole	61	30%
Direct from court	55	27%
Prison*	15	7%
Committed AWOL	5	3%
Hospital	0	0%

* If a youth who is committed delinquent and is either home or in a residential center is arrested and is 16 or older he might be brought to prison. If he is bonded he may be placed at CJTS. Also, once there is a court hearing, the likely disposition is placement at CJTS unless the crime is serious enough to keep him in prison.

Adjudication Offenses – A list of the 203 admissions is provided in Appendix 1. As many boys are committed on more than one offense, it seemed most useful to list each boy’s offense(s). Of the 203 admissions to CJTS in 2009, 83 (41 %) of the boys had felony charges, of that, 26 (31%) were considered serious juvenile offenders. Further, in those instances in which Violation of a Court Order or Violation of Probation is the only offense, an effort was made to determine prior adjudications and/or reasons for violation. The following is a summary of frequent charges:

- 42% of boys were convicted of property-related charges (Burglary, Larceny, Theft, Criminal Mischief, Criminal Trespass, Motor Vehicle charges).
- 40% of boys were convicted of violation of existing legal stipulations (Violation of a Court Order, Violation of Probation).
- 23% of boys were convicted of crimes against persons (Assault, Threatening, Robbery, sexual crimes).
- 28% of boys were convicted of “general disturbance” type charges (Disorderly Conduct, Breach of Peace, Reckless Endangerment, and Interfering).
- 9% were convicted of drug-related charges.
- 4% were convicted of escape charges.
- 8% were convicted of weapons charges.

(2) The diagnosis of each child after intake assessment:

- Diagnoses - The following Table includes all Axis I psychiatric diagnoses for the 175 unique admissions to CJTS that occurred in calendar year 2009 through December 15. (Each admission is treated individually, as diagnoses for the same child can change as symptoms emerge and further evaluation is conducted.) Boys are diagnosed by CJTS clinicians at the Plan of Service meeting where it is presented with recommendations for the treatment plan. Diagnoses are made based on historical information (including prior psychiatric evaluation and treatment), current clinical presentation, and in some instances, psychological testing. Most boys carry more than 1 diagnosis.

Table 5: Psychiatric Diagnoses of Boys Admitted to CJTS

DSM-IV Diagnosis	Number of Youth Who Carry Diagnosis	Percentage of Total Admissions
Conduct Disorder	131	74%
Cannabis Abuse/Dependence	84	48%
Relational problem - parent/child, sibling, partner	49	28%
Attention Deficit/Hyperactivity Disorder	44	25%
Oppositional Defiant Disorder	12	7%
Alcohol Abuse/Dependence	11	6%
Major Depressive Disorder	3	15%
Dysthymic Disorder	5	3%
Learning/Reading Disorder Not Otherwise Specified	7	4%
Mood Disorder Not Otherwise Specified	17	10%
Posttraumatic Stress Disorder	4	2%
Adjustment Disorder	2	1%
Bipolar Disorder	7	4%
Disruptive Behavior Disorder	1	Less than 1%
Polysubstance Dependence	5	3%
Reactive Attachment Disorder	2	1%
Intermittent Explosive Disorder	3	1%
Mixed Receptive-Expressive Language Disorder	2	1%
Disorder of Written Expression	0	0%
Adolescent Antisocial Behavior	1	Less than 1%

2009 CJTS Report

DSM-IV Diagnosis	Number of Youth Who Carry Diagnosis	Percentage of Total Admissions
Abuse of a Child - sexual/physical/neglect	4	2%
Social Phobia	0	0%
Impulse Control Disorder	0	0%
Anxiety Disorder NOS/Generalized Anxiety	5	3%
Nicotine Dependence	1	Less than 1%
Identity Problem	0	0%
Bereavement	4	2%
Academic Problem	0	0%
Depressive Disorder NOS	10	5%
Pervasive Developmental Disorder	0	0%
Enuresis	1	Less than 1%
Pyromania	1	Less than 1%
Child or Adolescent Antisocial Behavior	1	Less than 1%
Opioid Abuse	2	1%
Phencyclidine Abuse	1	Less than 1%
Hallucinogen Abuse	1	Less than 1%
Amphetamine Abuse	1	Less than 1%
Obsessive Compulsive Disorder	1	Less than 1%

(3) The percentage of children in need of substance abuse treatment and the programming interventions provided to assist residents:

- Substance Abuse Treatment Needs** - A boy is considered to be in need of substance abuse treatment if he is diagnosed with substance abuse or dependence by a CJTS staff clinician. These diagnoses are determined based on historical information, child presentation and self-report, results of the Global Appraisal of Individualized Needs Short Screener (GAIN-SS), and collateral information (from family, parole officer).

The table below indicates how many of those 175 unique boys admitted in the 2009 Calendar year (January 1 through December 15) were diagnosed with substance abuse issues. Most boys carry more than 1 diagnosis.

Table 6: Substance Abuse Diagnoses for 175 Unique Boys admitted to CJTS

Diagnosis	Number of Boys	Percentage of Boys
Cannabis Abuse	65	37%
Cannabis Dependence	19	11%
Alcohol Abuse	10	5%
Alcohol Dependence	1	Less than 1%
Polysubstance Dependence	5	3%
Opioid Abuse	3	1%
Phencyclidine Abuse	1	Less than 1%
Hallucinogen Abuse	1	Less than 1%
Amphetamine Abuse	1	Less than 1%
Nicotine Dependence	1	Less than 1%
No Substance Abuse Diagnosis	82	47%

During the 2009 calendar year, the CJTS clinical department made a formal change in substance abuse screening instruments. The Personal Experience Screening Questionnaire (PESQ) was replaced by the administration of the Global Appraisal of Individual Need Short Screener (GAIN-SS). Of the 203 admissions, 96% of the youth (195) completed the GAIN-SS. There were 8 youth who refused to complete the screening. For boys with more serious substance abuse needs more expansive versions of the GAIN are available for further assessment. One full GAIN-I evaluation was administered for a boy who required more diagnostic clarification.

- **Programming** – Substance abuse services offered at CJTS are summarized below:
 - Resident Student Assistance Program (RSAP) – RSAP is a research-based substance abuse program specifically designed for implementation in residential facilities. This psycho-educational program was developed by Ellen Morehouse, ACSW, and Nancy Tober, Ph.D. from the Student Assistance Services Corporation in Tarrytown, New York. RSAP is provided to all new residents placed on the intake unit for orientation and assessment. Those boys who are diagnosed with substance abuse or dependence are then referred from RSAP to Seven Challenges program when they leave the intake unit.
 - Seven Challenges – Seven Challenges is a nationally recognized, evidence-based substance abuse treatment program designed to enhance adolescents' commitment to change and guide them through the change process. It was developed by Robert Schwebel, Ph.D., Tucson, Arizona. The program, which focuses on enhancing decision-making and problem-solving skills, has been

found to decrease substance use and aggression, and to lead to positive mental health outcomes. Seven Challenges is mandatory for all residents who meet the criteria for a substance abuse or dependence diagnosis and will be completing their treatment at CJTS. The program is offered to residents in both group and individual sessions. The model includes twice weekly group sessions and individual journal work. Boys move at their own pace through a series of nine workbooks. Clinicians read the journals and provide written feedback to boys in their journals. Completion of the program is based on each individual's pace, but typically takes 4 to 6 months. Therefore, most boys involved in Seven Challenges remain involved throughout their stay at CJTS.

CJTS is a licensed provider of the Seven Challenges model. Several clinicians completed the advanced training and are identified as site leaders. These CJTS clinicians are able to train new staff in the model. CJTS participates in quarterly conference calls with the developer and other providers in the state using Seven Challenges.

- **Participation**

- The RSAP group continues to be provided to all residents who are admitted through the intake unit (which includes all residents here for the first time as well as returnees who have been out of the facility for an extended period of time and are returned to the intake unit). Of 203 admissions, 175 of the boys were placed on the intake unit at the time of their admission and were eligible to participate in RSAP. Twenty eight (28) boys were returnees and although were admitted through the intake unit only remained there for an average length of stay of 24 hours. Thus a review of the records of the 175 unique boys who were admitted through the intake unit, 130 or 74% showed documentation of the boys' participation in the four week psycho-education substance abuse program.
- Seven Challenges, as outlined above, is provided to all boys who presented with a diagnosable substance abuse problem. Of all boys admitted to CJTS during the calendar year 88 boys were diagnosed with a substance abuse disorder. Out of the 88 boys identified with a substance abuse disorder 70 were eligible for services at CJTS. A review of the records of the Seven Challenges group revealed 93% or 65 boys' records included documentation of involvement in Seven Challenges. Of the remaining 23 boys who did not receive Seven Challenges the following factors should be taken into account - 3 boys will be starting Seven Challenges in January 2010, 2 boys attended Narcotics Anonymous groups in the community, 8 boys were discharged into residential treatment facilities, and/or boys were discharged from CJTS from the intake unit or were leaving the facility in less than 30 - 45 days.

(4) The educational/literacy programs available to the residents, including the educational level of residents requiring special education and related services, school attendance requirements, the number of children who are educated in the alternative school and the reasons for such education:

Administrative Leadership

Educational services for the residents of the Connecticut Juvenile Training School (CJTS) are provided on grounds at the Walter G. Cady School under the direction of Donna G. Cambria, Superintendent of Schools of the Unified School District II (USD II) and John Mattera, USD II Principal of the Walter G. Cady School, in coordination with CJTS Superintendent William Rosenbeck. USD II, in accordance with section 17a-37 of the Connecticut General Statutes (CGS), also provides educational services for residents at the Department of Children and Families' residential facilities of Riverview Hospital, Connecticut Children's Place and High Meadows as well as for those students who are no-nexus and placed by a state agency in private residential treatment centers in accordance with CGS 10-76(d) (e) 2.

Teaching Team Model

At the Walter G. Cady School a core team of 3 academic teachers and a pupil service specialist work with each residential unit. After a one month period of assessment in the intake unit, new residents are assigned to a general population unit based on age. Each student is then assigned to an appropriate section for differentiated instruction.

The core team holds Child Review meetings each week to address student problems and monitor educational progress. The core team also participates in weekly Treatment Team meetings with clinical, medical, residential and parole representatives to review each resident's overall progress. This multidisciplinary team concept has been in effect since the facility opened in 2001.

After several months in a general population unit, students are referred to the Parole Status Review Committee to determine their readiness to enter the Transition Unit, which was created in 2008 to promote successful community re-entries. In this setting students are challenged to demonstrate that they can meet community school expectations. Students carry a portfolio of their academic work and participate in a full range of academic, special and vocational classes. Homework is assigned three nights a week and behavioral standards are increased each week. Those who do not meet standards in a given week have to repeat that week.

Inside Cady School

Within the school building on the grounds of CJTS, classrooms and offices are clean, well illuminated and similar to newer secondary schools within Connecticut. There are 21 academic classrooms, most with a seating capacity of about 10 pupils. The school also includes one resource instruction room, one office for speech & language services,

2009 CJTS Report

one self-contained classroom and one alternative classroom. All classrooms have a student restroom.

The school library contains 9200 books, tapes and DVD's as well as 10 computers with filtered internet access. Students access the library during the school day to support class assignments. Each student is scheduled to use the library once a week and may choose to visit the library other times to pick out books for pleasure reading or work online.

At the west end of the building there is a physical education plant consisting of a full size gym/basketball court and a fitness equipment room filled with Cybex exercise machines. Outside is a field that can be configured for baseball, football or soccer, and across campus there is a fenced-in course for mini bike riding instruction. The gym and exercise room are also used after school hours and on weekends under the supervision of recreational and residential staff.

In the center of the school are administrative and pupil services offices, clerical work stations, a teachers' room, a conference room, a work room and a large multi-purpose room. Storage and office space are limited, but the size of the school is more than adequate for the typical enrollment this year of about 100 students at any given time.

Vocational instruction rooms are located on the east side of Cady School. Vocational opportunities include Building Trades, Carpentry, Graphic Communications, Culinary Arts, Small Engine Repair, Commercial Cleaning, Computer Technology, Art, Music and Horticulture. Although Art and Music are in "the arts" subject area, they are included in this wing due to space needs and are listed in the vocational opportunities for scheduling purposes. Vocational areas are larger than academic classrooms and contain up to date equipment. A metal detector is placed in the hallway near vocational classes for security purposes.

School Safety Procedures

Safety procedures are evident in many aspects of the school operation. Students are brought to school in line supervised by a Youth Service Officer (YSO), and YSO's remain in the school at posts close to classrooms while school is in session. Students are moved as a group from class to class by YSO's and student communication is restricted during this time. When there is conflict or potential conflict between individuals movement is halted and/or passing times are staggered. Students are checked for contraband and teachers keep count of supplies and tools each class period. If an item is missing, there may be a lockdown until it is located.

Attendance Policy

All students are required to attend every class, Monday through Friday. The school day includes 5 hours and 7 minutes of instruction, beginning at 8:15am. Students break from 12:00 am to 1:00 pm for lunch in two waves, and the afternoon schedule runs from 1:00 pm to 2:23 pm. A student can be excused for the following reasons:

2009 CJTS Report

1. Illness
2. Medical appointments
3. Administrative permission
4. Suspension
5. Court appointment
6. Administrative Case Reviews
7. Plan of Service Meetings

The school calendar includes 184 school days from September through June and a 32 day summer session.

Alternative Setting- Continuum of Educational Services Classroom

Walter G. Cady School's alternative setting is known as the Continuum of Educational Services (CES). This self-contained classroom helps redirect students whose behavioral difficulties persist and provides a structured setting away from peers with a special education teacher and minimal distractive stimuli. Disruptive students may be educated in this classroom for two periods if removed from class, or for several days if issued an in-school suspension. Special education students may also access the alternative setting as part of a behavior management intervention developed by a Planning and Placement Team. In conjunction with wrap-around support services from the multidisciplinary team, this process promotes academic success for students otherwise caught in a cycle of failure.

Student Body Characteristics

The resident population at CJTS and at the Walter G. Cady School is constantly changing with between 10 and 20 students entering or leaving each month during the year. The average length is 5-6 months, but lengths of stay may range from a year or more for serious juvenile offenders (SJO's) to as short as two weeks for students who have been returned for respite care.

Breakdown of the 175 Students Arriving During Calendar Year 2009

Number of Students	Educational Identification
74	Regular Education
56	Emotionally Disturbed
14	Learning Disabled
12	Other Health Impaired/ADD-ADHD
5	Other Health Impaired
4	Intellectually Disabled
3	Multi-handicapped
5	504 Plan
2	Special Education Referral in Process

2009 CJTS Report

145 of the 175 students who arrived during calendar year 2009 were high school students; 31 others were middle or junior high school students.

Individualized Course Scheduling and Credit Retrieval

CJTS residents arrive with histories of truancy, report cards filled with incompletes, partial credits and outright course failures from multiple schools. Upon arrival, an assigned pupil service specialist compiles and analyzes previous high school credits in order to plan an appropriate course schedule. Courses in progress are continued, and plans are made to finish partially complete courses during the Literacy period, during the summer intersession and/or with homework done after school. Literacy period is used for reading improvement based upon a student's unique abilities.

With this supplementary work, students who have been retained are sometimes able to return to their age-appropriate grade, or if not, to accomplish enough to put this goal within reach. Students like to keep tabs on how much credit they are earning while at Cady School; they want to see their efforts producing results.

Course Offerings 2009

- Language Arts- English grades 7 through 12
- Mathematics: General Math, Pre-Algebra, Algebra I, Algebra II, Geometry
- Science: General Science, Physical Science, Earth Science, Biology & Environmental Science
- Social Studies: Geography, Civics, 20th Century America, American History, US History, World History & World Cultures
- Family and Consumer Science;
- Health Education
- Literacy, SAT preparation
- Physical Education
- The Arts (Music and Art)
- Vocational Classes- Carpentry, Building Trades, Horticulture, Graphic Arts, Computer Technology, Commercial Cleaning and Small Engine Repair

Intake Assessment

Upon arrival in the intake unit the following student assessments are completed:

1. Woodcock Johnson Test of Achievement III, NU forms A/B subtests including letter-word identification, reading fluency, spelling, math calculation and passage comprehension.
2. Newly added is the Informal reading assessment (CORE Reading Assessment started 12/09)
3. Ansell Casey Life Skills Assessment
4. Criterion based assessment in core academic subjects
5. Career Scope Interest & Aptitude Inventory

2009 CJTS Report

6. USD II Classroom Observation of Academic and Behavioral Performance
7. Learning Style Inventory

The pupil services specialist assigned to the intake unit obtains prior school records, including Individualized Education Programs (IEPs), grades and any assessments, shares this information with the intake teaching team and holds a PPT within 30 days for any student identified as, or needing special education services.

Initial Academic Testing Levels 2009

Selected subtests of the Woodcock-Johnson III NU were used for initial screening this year, and achievement test averages are as follows:

Letter-Word Identification grade equivalent 6.7, standard score 84

Reading Fluency grade equivalent 8.0, standard score 89

Passage Comprehension grade equivalent 5.9, standard score 83

Math Calculation grade equivalent 5.8, standard score 79

Spelling grade equivalent 6.8, standard score 85

Given that the bulk of students arriving are in 9th and 10 grades, average initial achievement testing results show students 3-4 years behind grade placement in basic skill levels. Average achievement levels for special education students fall below those of regular education students by between one to two years in Word Identification, Passage Comprehension and Math Calculation.

Measuring Student Achievement

2007-2008 results of pre-post testing are as follows:

Subtest Name	Grade Equivalent Gains	Standard Score Gains
Letter-Word Identification	.85	2.47
Passage Comprehension	.39	.65
Math Calculation	.91	3.78
Spelling	1.19	3.56

As can be seen from the table above, students gained between .39 years and 1.19 years in grade equivalents during an average 7 1/2 month interval. They all moved ahead in their relative position in the test standardization group as shown by gains of between .65 and 3.78 points in standard scores. All test score averages pertain to students who maintained continuous enrollment at Walter G. Cady School.

2009 CJTS Report

2008-2009 results of pre-post testing:

Subtest Name	Grade Equivalent Gains	Standard Score Gains
Letter-Word Identification	.20	0
Passage Comprehension	.23	.12
Math Calculation	.17	.41
Spelling	.50	-.32

Achievement test gains in 08-09 were significantly smaller than the previous year. This difference is attributed to Pre and Post tests being administered and scored by different examiners. For this reason the testing process has been revised and is now administered by one tester. The process will be monitored and reevaluated throughout 2010.

Reading Initiative 2009

Given the frequency of reading problems in the resident population, a group of faculty members met and, with the support of administration, developed a scientifically research based instructional program (SRBI) for reading improvement. In September a program of diagnostic assessment was implemented as a follow-up to initial Woodcock Johnson III testing. Based on the combined results, appropriate instruction is provided for specific reading problems such as poor word attack, impaired comprehension or limited fluency. Instruction may include the Wilson, Benchmark and Earobics programs individually or in combination. All are effective teaching methods consistent with Response to Intervention (RTI) and SRBI models.

All students who have reading deficiencies have remedial instruction one period each day during their Literacy period. Those who are not deficient have explicit vocabulary instruction combined with independent reading. Progress monitoring began recently using the Core Reading Assessment. Results so far have been promising

Supplementary Educational Initiatives

Work Experience Program - This program allows students to gain job experience and earn money after school on site. Applicants must receive the approval of residential, teaching and clinical staff. Student workers receive supervision from vocational instructors, maintenance, warehouse, residential, Boy's Club or food service staff. In any month there are 12-20 students working, and they are allowed to work a maximum of 18 to 32 hours during a school week, depending on age. Students earn \$1.00 per hour to start and receive 25 cent raises every 2 weeks until pay is capped at \$3.00 per hour.

Student Council - The Student Council was started In October 2006 as a forum for residents to voice concerns and contribute to positive change. Two students represent each residential unit, and 9 faculty members volunteer their time to guide the work of the council. Luncheon meetings are held biweekly to discuss needs and generate proposals. This year items proposed included:

2009 CJTS Report

- lighting for reading in dorm rooms
- change in time for showers
- resumption of field trips
- access to MP3's for well behaved students
- creation of a football team

Middlesex Community College Linkage - Cady School Administration established a partnership with Middlesex Community College in 2007 to develop the Career Pathway Program. This allows students who complete Algebra II with a passing grade of at least 70 to be awarded 3.0 transferable college credits. College credits can also be awarded for Graphic Arts.

Renaissance Math (accelerated math) - A pilot program was conducted in 2007, but additional funding was not continued. School administration is considering whether to pursue the resources needed to operate the program. If so, an update needs to be purchased, a program administrator needs to be assigned and current teachers need to be trained with the update before Renaissance Math can be put into operation.

Read 180 has been supplanted by the Reading Initiative 2009 described previously. Although a reputable program, Read 180 required changes in scheduling and grouping not feasible for security reasons.

Caught Reading - Caught Reading is a literature-based program that teaches decoding skills, structural analysis, prefixes, suffixes, vocabulary, comprehension skills and reading strategies. Resource room teachers continue to use this program which provides high interest controlled vocabulary novels.

SAT and PSAT - All 11th and 12th grade students are encouraged to take the Scholastic Aptitude Test, and ten Cady students took the test during 2009. Eight other Cady students took the Pre-SAT during 2009.

GED Instructional & Testing Site Approval- In 2007 Walter G. Cady School received approval to provide instruction and testing for students seeking a GED diploma. A current staff member is qualified to administer the GED exams. This and other initiatives have been developed in anticipation of older students arriving at the facility.

CLEP Testing Site Approval- In December '07 official approval was received for Walter G. Cady School to enter the College Level Examination Program. The CLEP program allows students in high school to earn college credit by passing examinations in any one of 14 areas, ranging from Computer Applications to Social Sciences and Literature. The college credits are transferable to numerous institutions of higher learning.

NYPUM Incentive Program -The National Youth Project Using Mini-bikes (NYPUM) provides mini-bikes to agencies serving disadvantaged youth across the

2009 CJTS Report

country as an incentive for behavioral and academic accomplishment. At last count there were 44 such programs nationwide. After seeing the program in operation in Massachusetts, Principal John Mattera wrote a Perkins Grant in the fall of 2006. Honda Corporation donated 14 mini bikes for this activity.

Students participating in the program must meet strict academic and behavioral criteria related to self-control and respect for safety. The rigorous training program involves fundamentals of mini-bike maintenance and safe operation leading to more challenging group riding skills. The fenced-in course on grounds is used for mini bike training as well as BMX bicycle riding. Twenty one students completed the program this year.

Recent Vocational Offerings:

Small Engine Repair - This instruction trains students to service and repair a variety of small engines and power equipment. Topics cover everything from carburetion to camshafts. Students work on a variety of small engine machines such as garden tractors, lawn mowers, snow throwers, line trimmers and leaf blowers.

Commercial Cleaning - Students learn how to maintain office buildings, motels, hotels, factories and schools. They learn how to strip and wax tile floors, clean restrooms and office suites using "green" cleaning chemicals. In addition to learning the hands-on jobs, they also learn how to assign and supervise work done by a cleaning crew, and the steps needed to start and maintain a cleaning or related business.

Computer Technology - This class was re-established in 2008 with a replacement for the former instructor. Students are able to identify components, use the keyboard, and learn about internet usage, operating systems and applications such as PowerPoint, MS Excel, desktop publishing, databases, MS Word.

Culinary Arts- A Culinary Arts teaching position was restored late in 2009 after a 2 year hiatus and classes began January 4th, 2010. Students learn kitchen safety, hygienic food preparation, cooking and seasoning techniques, menu planning and commercial scale meal production.

(6) A review of the program and policies of the facility:

- **Policy** -
 - CJTS policy is being formulated in accordance with American Correctional Association (ACA) standards for Juvenile Training Schools, as required by CGS 17a-27e.
 - Policy formulation and approval occurs in a two-stage process.
 - The process begins by reviewing existing policies and established practices and structuring them in accordance with ACA standards.

When new policy has to be developed, the policy committee reviews policies of like agencies and facilities. New policies are written by reviewing the requirements established by ACA and working with the manager overseeing that area of facility operations. Existing policies are compared to ACA requirements and modifications are made as needed. Once draft policies are formatted they are distributed for field review by the affected personnel. After the local review phase is completed, proposed changes are incorporated and the policies are forwarded concurrently to the Superintendent and Bureau Chief, as well as to Central Office for review and approval by the Division of Administrative Law and Policy and the Commissioner's office.

Programming

The following is a summary of the various programs offered at CJTS:

- **Clinical** – Please note that participation in clinical services is determined through an audit of each resident's records.
 - Individual Therapy – Each resident of CJTS is assigned a clinician, who develops a plan of service and provides clinical services. Individual therapy focuses on issues related to delinquent behavior and other issues that confront boys on a day-to-day basis. Eighty nine percent (89%) of residents participated in individual therapy.
 - Family Therapy/Contact – Family involvement is essential in planning for a boy's re-entry into the community. Family therapy sessions are held both at the facility and family homes in an effort to engage all parents. Of the 175 unique boys at CJTS, 114 or 68% had documented family therapy session (clinician addressing interpersonal relationships and family issues with youth and family). This does not include families visiting on their own accord or family contacts (i.e. telephone calls, etc).

Regarding family contact, out of the 175 unique boys at CJTS, there was documentation that family contact (telephone calls with the clinician, attendance of parent support group, etc.) between the clinician and family occurred in 170 of the cases or 97% percent.

- Resident Student Assistance Program (RSAP) - See above.
- Seven Challenges - See above.
- Dialectical Behavior Therapy (DBT) - DBT is an evidenced based treatment program developed by Marsha Linehan, Ph.D., Behavioral Tech LLC, in Seattle, Washington. DBT treatment

combines cognitive behavior therapy with mindfulness, dialectical philosophy, and an emphasis on validation. DBT was originally developed to treat adults who engaged in chronic suicidal thoughts and behavior. However, over the past ten years DBT has been used with other populations including adolescents in a juvenile justice setting.

CJTS clinical, residential, education, and rehab staff currently completed a three year intensive DBT training and certification with other adolescent providers in the state of Connecticut. The training was provided by Behavioral Tech trainers where the model originated.

CJTS DBT groups were held twice weekly in three of the main buildings (Building 4, 5, and 6) for residents who present with more serious trauma histories and/or self-harming and aggressive behaviors. Boys are taught skills they can use to manage their feelings more effectively, reducing the likelihood of them harming themselves or others, decreasing aggressive and highly disruptive behaviors, and improving coping skills and regulation of emotions.

DBT groups were offered for boys who met identified criteria. The groups included an introduction to the basic concepts of mindfulness and dialectical philosophy and DBT skill review and homework. Boys identified and referred to DBT also received DBT individual therapy weekly. During 2009 there were 35 boys who actively participated in DBT. Beginning in March 2009 one of the four DBT modules (Distress Tolerance) was offered to all residents during their initial orientation on the Intake unit.

- Aggression Replacement Training (ART) – ART was phased out as a clinical program in March 2009 in an effort to streamline clinical services. ART was replaced with a specific module from the DBT, Distress Tolerance. This change has assisted in the development of a common language at CJTS when interacting with the boys in crisis both on a residential and clinical level. All staff was trained during their annual refresher training in this module as well. This has helped in the implementation of DBT facility wide. Distress Tolerance was offered to all residents on campus initially on the Intake Unit and then was transitioned to a group format offered on the general population units. In 2009, there were 75 boys who completed Distress Tolerance.
- Specialized treatment for boys regarding sexual offender and fire setting needs were identified during the 2009 year. There were

only about 4 boys at CJTS with needs in these areas. In these cases, the boys were provided with individualized treatment specific to their individualized needs. In addition, this year, a therapeutic yoga group was piloted. There were 5 boys that benefited from this program in 2009 and will it continue in 2010. The plan is to offer another introductory therapeutic yoga group and an advanced group.

Rehabilitation/Recreation

- **Documentary Group** - The philosophy of this program is to introduce current topics through video documentaries. Many residents are diagnosed with learning disabilities and have difficulty reading, thus avoiding a large source of information that relates to the world, such as newspapers, and magazines. By providing the group members with a visual media such as video documentaries, the outcome is to educate and enhance a new awareness of current events. This group meets once a week for 2 hours.
- **Cooking/baking** - This program enhances independent living skills. Residents are taught how to make easy and nutritious meals. This group is offered weekly in the transition unit.
- **Goals Group** - The purpose of this group is to introduce the law of attraction as a means of creating and obtaining one's goals. The fundamental belief is that a person's thoughts (conscious and unconscious), emotions, and beliefs cause a change in the physical world that attracts positive or negative experiences.
- **Crochet Club** - The program began in January 2008 and continues to grow. A group of 8-10 residents meet weekly to make scarves, hats and blankets. Approximately 30 residents participated in 2009.
- **Chess Club** - The club ran from January to March in 2009 and restarted in December of 2009.
- **Rocket Power** - Residents build their own rockets from plastic bottles and use a water launch.
- **Journal Writing** - Journal Writing is therapeutic in nature and can offer a pathway toward understanding oneself. Journal writing can be a healing process to help a resident get in touch with their deepest yearnings, find resolution for problems, and deal with personal issues. The purpose of this group is to introduce the concept of journal writing. Residents also journal about their life

experience at CJTS. Residents incorporate past events and their future aspirations.

- **Catholic Youth Organization Basketball Games** – For the 2009-2010 season boys were selected to participate based on their skill level, sportsmanship and positive attitudes. A total of 30 residents participated. These games are held at CJTS.
- **Job Readiness** – Residents discuss selection of a career path. Residents have the opportunity to search for jobs; they learn how to fill out job applications, resumes and interviewing techniques. This program was offered to all interested residents ages 16 and 17 and is geared to residents preparing to leave the facility. All residents in the transition unit participate in a 1 hour weekly session.
- **Music Therapy** – In 2009 over 100 residents participated in music therapy spending on an average 1.5 hours a week in music therapy. Residents are offered keyboard, guitar and drumming lessons, lyric analysis and discussion, and music creation. Participation is based on interest and therapeutic need. The majority of residents have music therapy weekly. This year we connected with the Connecticut Ballet to offer African Drumming/Dance for 8 weeks to 10 residents.
- **Art Therapy** – Art therapy programming was provided to 89 residents. This program includes upholstery, air brushing, drawing and painting with a variety of mediums, tile mosaics, pottery, silk screening, and ground's beautification, designing and painting of soap box derby cars. Art work was displayed and sold at various sites. The New Haven Arts Council, Melanie Rieger Conference on domestic violence, the Juvenile Justice Publication, Legislative Office Building, Wadsworth Museum Festival of Trees, and the DCF Child Care Conference. Digital photography continues to be offered in Art Therapy.
- **Team Adventure** – This is a group dynamic based activity that focuses on problem solving and personal issues, including boundaries, respect, trust, and communication. The program was expanded to include a joint effort with the assistant unit leaders for an 8 week cycle in conjunction with Positive Peer Culture. This time-limited program was offered to all residents. We continued our connection with the Wilderness School. Six residents went on 3 day trip and one two night camping and hiking trip at the Wilderness School. On the day trips they hiked, repelled and did a high ropes course.

- **Therapeutic Horseback Riding** - This year, 12 residents were able to attend a six week Therapeutic Horseback Riding Program in Old Lyme. Residents were referred to this program by their treatment teams and must be at appropriate levels to participate.
- **Swimming** –CJTS has utilized Riverview's pool on Sunday mornings since March 2008. The residents are allowed an hour of open swim time. Residents must be at level 3 and pass eligible.
- **Scuba**- New to 2009 was scuba diving lessons at the RVH pool.
- **Leisure Education** - This is offered to youths preparing to leave CJTS. It helps them become aware of and how to access activities they can participate in after leaving CJTS. We have expanded this program to the Transition Unit (4C). The group meets once a week for one hour.
- **CPR / First Aid Certification** classes – 15 boys participated in classes and earned their certification.
- **Weight Lifting** – Approximately 40 residents participated in a weight lifting group meeting, two times a week. Participants rotated on various weight machines to maintain a balanced workout. The program also helped residents work on cooperation skills with peers. Residents were referred, or joined the program, based on interest.
- **Indoor/Outdoor games** (large muscle) - All residential units participated in a variety of open gym and outside activities, such as volleyball, basketball, weight lifting, dodge ball, pickle ball, wiffle ball, indoor/outdoor soccer, ultimate football, softball, Capture the Flag, ping-pong and weight room activities.
- **Indoor Games/activities** (cognitive/fine motor) - Residents participated in games such as: Pictionary, Scattogories, Charades, Bingo, Pokeno and Trivia. This program works on cooperation and sportsmanship skills. Arts and crafts are offered on a regular basis to residents.
- **Model-building** –30 residents participated in building and painting model cars for a model car show. Residents had their cars on display for staff and other residents to view. The group met weekly for 1.5 hours. Participation was based on interest and therapeutic referral.

- **Intramural Sports** -Intramural sports is offered year long to all residents.
 - Intramural Basketball -A Winter and summer intramural basketball program was held. All residential units participated in a double round robin league with playoffs at the end of the season.
 - Intramural Football – All residential units participated in a single round robin league with playoffs at the end of the season. An All Star game was held at the end of the season.
 - Intramural Softball – All residential units participated in a single round robin league with playoffs at the end of the season.

- **Off grounds trips** – Restrictions on community visits for residents and budget concerns limited the number of off grounds trips during 2009. Four trips were made to the Wilderness School as well as one trip to an art show where 2 residents had art work on display.

- **Programs for high level residents** - Resident who have progressed through the behavior management system achieving a higher level of status are allowed to participate in extra programs as an incentive and positive enforcement for their demonstrated behaviors. Movie nights are held for high level residents. Residents can utilize the Rehabilitation Therapy Department's Teen Center. Level 4 residents (the highest level at CJTS) attend at other times which allow them to utilize the teen center and interact with peers. In 2009 we offered higher Level 3's the opportunity to watch NFL games on Sunday from 1-3:30.

- **Special Event Programming** – Special event programs were held through out the year. The majority of these events were held during the summer.
 - A variety of special activities were held during the summer including: a strongman competition, 3 point contest, home run derby, singles ping pong tournament, 3 on 3 Hoop It Up tournaments, Soapbox Derby (which included designing the cars and racing them). R U Fit Enough Contests and a Summer Carnival. This year's Soapbox Derby event was expanded to include other DCF agencies. High Meadows, Riverview and CT Children's Place each entered one car. CJTS had a total of 8 cars entered. A basketball Skills Challenge was held twice this year.

- **Non summer events** - Residents have been offered Wii Bowling Tournament, Madden and NBA Live, Play Station tournaments. Other activities have included campus wide Ping Pong and Spades tournaments. Hot Dog eating and tug of war contests were also held. Participation is based on interest.

Boys & Girls Club of America

The Boys Club is focused on inspiring the boys at CJTS to reach their full potential and realize the endless opportunities available, regardless of the odds they face. The Club provides a linkage to community clubs following discharge from CJTS. Culture was impacted by building rapport with the residents and planning facility wide events.

Other Programming

Volunteer Services – 16 volunteers from the community were involved in education, recreation, religious services, and mentoring of CJTS boys.

(7) The delinquency recidivism rates of such residents, which will include the number of children discharged to residential placement, the number of children discharged due to expiration of the period of commitment and the number of children returned to the Connecticut Juvenile Training School.

Recidivism – A list of all discharges (with identifying information removed), sorted by discharge date, is provided in Appendix 2. The following data highlights recidivism information for boys discharged from CJTS from January 1, 2009 through December 15, 2009. In that time frame, there were 207 discharges of 183 unique individuals. Average length of stay was 5.2 months.

Table 8: Placement Information for Boys Discharged from CJTS from January 1 2009 through December 15 2009

2009 CJTS Report

Placement	Number of Discharges	Percentage of Discharges
Discharged home	114	55%
Discharged to residential placement	80	39%
Discharged to prison	13	6%
Discharged to hospital	0	0%

For the purpose of this report recidivism includes the following circumstances:

- As a point of clarification, it should be noted that delinquency commitments are indeterminate up to 18 months for non- SJO's (offenses not included in the statutory list of "serious juvenile offenders") and 4 years for SJO's. However, most boys do not remain at CJTS for their entire commitment. Efforts are made throughout a boy's stay at CJTS to return that child to a less restrictive setting. As noted above, 194 of the discharges involved planned placement to a lower level of care (home, hospital or residential placement). Of these 194 discharges, 19, or 10%, occurred at the end of the boy's commitment.
- Not all boys returning to CJTS during their commitment comes as a result of a newly charged offense. For example, if a child returns home and fails to comply with the conditions of his parole (such as attending school, finding employment, remaining free from substance use) it may be determined that it is in his and the community's best interest for him to return to CJTS until his behavior stabilizes and perhaps alternative placement can be arranged.
- If, however, a boy who has been discharged from CJTS is convicted as a juvenile of new criminal charges, he may then be recommitted as delinquent. A child can be recommitted while still under commitment for a previous offense. By the same token, a child can complete a given commitment, be convicted of a new offense, and be committed again. Not every boy who is recommitted after discharge from CJTS returns to CJTS. A recommitted child may be placed in a residential program instead.
- Regardless of whether a boy has time left on his commitment, he can be re-committed if he is under age 16 at time of discharge. In 43 of the planned 194 discharges, the boy discharged was younger than age 16, allowing for the possibility of being re-charged as a juvenile. The average age at time of discharge for these 194 boys was 15 years nine months.
- The total of boys who returned to CJTS was 43. These 43 boys represent 33% of those who could have been returned.

Table 9: Recidivism Indicators for Boys Discharged from CJTS from January 1 2009 through December 15 2009

Indicator	Discharges	
	Number	Percentage
Total discharges	207	N/A
Planned discharges to lower level of care	194	94%*
Boys discharged who could have returned to CJTS	129	66%**
Boys who returned to CJTS	43	33%***
Boys discharged who could have been recommitted	43	21%**
Boys who were recommitted post discharge	0	0%****
Total boys who were either returned to CJTS and/or recommitted	43	33%

* Of the 207 total discharges

** Of the 194 planned discharges to a lower level of care including home, hospital and Residential

*** Of the 129 discharged boys who could have returned. The readmissions include both boys who returned due to parole violations and those that accrued new criminal charges.

**** Of the 43 discharged boys who could have been recommitted.

(8) The costs associated with the operation of the training school, including staffing costs and average cost per resident:

2009 CJTS Report

- Costs - The following table includes cost figures from the previous fiscal year and projected figures for the current fiscal year. Please note that the following expenditure figures do not include fringe benefits or the overhead expenses of state agencies other than DCF – e.g., State Comptroller, DAS, and OPM – whose support services are necessary for the functioning of CJTS.

Expenditures	Fiscal Year 2008-2009	Projected Fiscal 2009-2010 as of 11/30/09
Total Parole Services & CJTS Budget:	\$37,486,488	\$34,969,949
Staffing expenses:	\$27,635,762	\$26,152,039
Other Expenses:	\$5,413,882	\$4,615,524
Workers Comp	\$3,061,463	\$2,834,029
Grants:	\$1,375,381	\$1,368,357
Parole Total Budget:	\$9,563,423	\$8,035,421
Staffing Expenses:	\$7,261,336	\$6,271,500
Other Expenses:	\$926,387	\$385,072
Workers Comp	\$319	\$10,492
Grants & MOU's	\$1,375,381	\$1,368,357
CJTS Total Budget	\$27,923,065	\$26,934,528
Staffing Expenses:	\$20,374,426	\$19,880,539
Other Expenses:	\$4,487,495	\$4,230,452
Workers Comp	\$3,061,144	\$2,823,537
CJTS Education Budget (included in above numbers):	\$4,181,512	\$4,143,975
Staffing Expenses:	\$4,081,330	\$4,107,639
Other Expenses:	\$100,182	\$36,336
Total Child-days (1 youth residing 1 day at CJTS) of Care:	35,108	36,208
Average Per Diem Rate:	\$795	\$744
Average of the population through 11/30/09 X 365 days.		

(9) Reintegration strategies and plans to transition the children to their home communities:

Reintegration Strategies

- ACR/TPC – Within 30 days of admission, each boy's treatment team meets with the boy to review his current functioning, goals, and discharge plans. Boys' families are encouraged to participate in this meeting. This initial meeting is the Treatment Planning Conference (TPC). At six-month intervals after this initial meeting, the same group meets to review progress and make modifications to this plan. These are referred to as Administrative Case Reviews (ACR).
- The Plan of Service – The Plan of Service (POS) is developed at the boy's TPC. The POS sets goals for the boy to work toward specifically while at CJTS. Combining this meeting with the TPC helps ensure that all parties involved in the boy's care – most notably the child and his family – are working toward common goals.
- Parole staff, in conjunction with CJTS clinical staff, develops community re-integration plans prior to boys' discharge to the community. CJTS Administration and Parole Supervisors review and monitor the plans.
- The Parole Status Review Committee makes determinations, after review of supporting documents, regarding a change in Parole status. The change could be progressive, as when consideration is given to granting Parole, or regressive, as in cases in which Parole revocation is sought. The Committee will review cases of youth who are being considered for placement at home or other family settings, and cases of youth who are already at home but are being considered for parole revocation and return to CJTS or any other institution, resource, or facility administered by or available to the Department of Children and Families. The decisions of the Committee will be based on factual information and clinical expertise, and will include consideration of the best interests of the youth, and the safety of the community.
- CJTS Administration and Parole Supervisors meet monthly to administratively review each boy's discharge plan and to ensure that all appropriate services are being arranged for successful transition.
- Discharge meetings are held on residential units to ensure full treatment team attendance. All relevant supports including family and community providers are invited to these meetings.

- Home visits and family sessions with parole and clinical staff present occur to ready the family and boy for their return home. Due to off ground constraints boys transitioning back to their community are unable to make overnight home visits prior to discharge from CJTS.
- Clinical staff refers residents with complex psychiatric needs to their local Managed Service System to develop comprehensive wraparound services.
- The Step Program is an intensive community-based program that offers: educational re-entry case management, transitional alternative education, parent advocacy, substance abuse/use treatment, individual/group counseling, competency/life skills training, social skills enhancement, structured recreation, employability skills development and job placement and job coaching.
- The Boys & Girls Club of Hartford Re-entry program provides case management services to youth from New Haven, Waterbury, New Britain and the Hartford Community. The case managers are engaging the residents in character and leadership building skills. The program works on developing the transferable skills needed to make a successful reintegration. While in the community the boys receive wrap around services focusing on education, sociability and employment. The boys are strategically placed at Boys & Girls Club for employment, pro social programming and to promote a positive self interest.
- The Youth COMPAS is a statistically based risk assessment software system that is specifically designed to assess key risk and needs factors in youth correctional populations and to provide decision support for justice professionals when placing offenders into the community. The COMPAS was designed to be an objective screening instrument to support criminal justice decisions regarding treatment, community placement and appropriate management of youthful offenders. The COMPAS was designed to support the philosophy and goals of least restrictive custody. The Youth COMPAS is part of the ConnCap and is being administered by Parole Officers to all boys and girls in the Bureau of Juvenile Services who represent new commitments. The ConnCAP is an integrated assessment, treatment planning and case management system. The ConnCAP assessment covers the following areas: legal, social welfare, mental health, substance abuse, education and medical.

Required Data – Public Act § 04-89 Section 17-a-6b(c)

(1) The number of adjudicated youth, by gender and age, in the care and custody of the department.

The following table summarizes the data requested above as of December 15, 2009.

Table 11: Gender and Age of Committed Children as of December 15 2009

		10 yrs old	11 yrs old	12 yrs old	13 yrs old	14 yrs old	15 yrs old	16 yrs old	17 yrs old	18 yrs old
Boy's Population	424	0	0	1	4	18	78	133	129	61
Girl's Population	127	0	0	0	0	8	23	26	52	18
Total	551	0	0	1	4	26	101	159	181	79

(2) The facilities in which such youth are being housed.

Please refer to Appendix 3 for a table summarizing this data.

(3) The number, age and gender of such youth who have left department custody in an unauthorized manner. CJTS's information system is partially incapacitated and no longer able to provide a report of this information.

(4) The number of police reports filed with respect to such youths. CJTS's information system is partially incapacitated and no longer able to provide a report of this information. Systems are in place to capture this information in the future.

(5) The status of new construction or preparation of facilities to house adjudicated youth in the care and custody of the department.

There are no new facilities under construction at this time to house adjudicated youth in the care and custody of the department. Systems are in place to capture this information in the future.

Recommendations for the Legislature

- 1) Pass legislation that authorizes the Commissioner to create overnight leave policy for transitioning boys at CJTS.
- 2) Modify C.G.S. Section 10-220h to mandate that local education agencies give full credit for school work done at USDII.

- 3) The Legislature should resolve the question of which state agency is authorized and responsible to provide residential care and other treatment services to those persons adjudicated in the Superior Court Juvenile Matters who have attained the age of 18. This issue is more relevant now that the age of juvenile jurisdiction has been increased and will be increased again in 2012. Funding of such facilities and services are necessary to meet the needs of this population.

- 4) Pass legislation mandating that children returning to their local schools from any DCF Placement be reentered in to school no later than 5 business days from their return to the community.

Recommendations for DCF

- 1) The Department of Children and Families, through the Joint Strategic Plan, explore ways to share relevant and appropriate information to ensure accurate data reporting.

Atty. Christine Rapillo
CJTS Advisory Board Chair

John Hunter
CJTS Advisory Board Vice Chair

Appendix 1 - Admissions to CJTS

January 1, 2009 to December 15, 2009
