The Honorable Walter Gudzunus
First Selectman
11 Rye Street
Broad Brook, CT 06016

Subject: Proposed Noise Control Ordinance
East Windsor, Connecticut

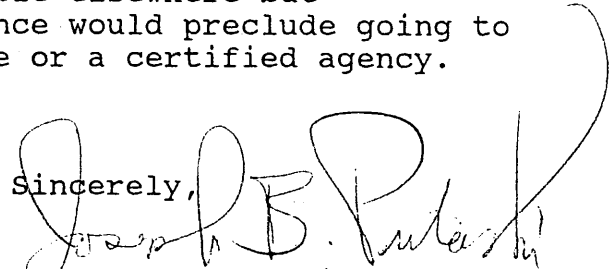

Dear Selectman Gudzunus:

I have reviewed a draft of the proposed East Windsor noise control ordinance (copy attached) and find that it could receive formal DEP approval provided that there are no significant changes between the draft and the ordinance that is finally adopted by the Town.

Notwithstanding the above, I have the following comment on section 4.1 of the ordinance.

I suggest deleting the second sentence of section 4.1. This sentence requires that noise measurement training be obtained from either the State of Connecticut or a public certified testing agency. As you are aware the state noise control program is not currently funded. It would therefore be unlikely that we could provide any noise monitoring training. Also I am unaware of any public certified agencies that could give this type of training. It may be available elsewhere but unless changed, the ordinance would preclude going to anyone other than the state or a certified agency.

Sincerely,

Joseph B. Pulaski
Supervising Environmental Analyst
Bureau of Air Management
