A. PREMISES INFORMATION

Nature of Business: Shipyard facility which constructs, maintains and repairs United States Naval Submarines

Primary SIC: 3731

Facility Mailing Address: 75 Eastern Point Road, Groton, CT 06340-1047

Telephone Number: 860-433-2791

B. PREMISES DESCRIPTION

Electric Boat Corporation (EB) is a major source of regulated air pollutants, located at 75 Eastern Point Road in Groton, Connecticut. EB constructs submarines for the United States Navy and performs maintenance and repairs to submarines that are already a part of the United States Navy Fleet.

Major activities performed during submarine construction and maintenance/repair include:

- Metal working operations such as welding, brazing and gouging
- Hull preparations such as abrasive blasting and surface coating applications
- Applications to metal parts including surface cleaners, paints, adhesives and special coatings
- Manufacture and testing of ancillary components including woodworking, lead working, pipe fabrication, electrical component fabrication, parts degreasing, and radiological component operations.

Fuel burning equipment used at the facility includes boilers, generators, pumps, compressors, furnaces and dryers. This fuel burning equipment combusts a variety of fuels including propane, gasoline, diesel fuel, No. 2 fuel oil and No. 4 fuel oil. Cooling towers are used to provide water for process cooling operations and for building air conditioning systems.

Emissions resulting from shipyard activities include volatile organic compounds, HAPs, particulate matter, carbon monoxide, nitrogen oxides and sulfur dioxide.

The facility is subject to the National Emission Standards for Radionuclide Emissions in 40 CFR Part 61 Subpart I. The primary source of radionuclide emissions is the radioactive materials associated with the maintenance and overhaul of nuclear powered ships.

The facility is subject to 40 CFR 63 Subpart II, Shipbuilding and Ship Repair and 40 CFR 63 Subpart ZZZZ, National Emissions Standards for Hazardous Air Pollutants for Stationary Reciprocating Internal Combustion Engines. The facility is also a VOC RACT source.

All pollutant emitting equipment at the facility with applicable requirements are included in this Title V permit.

Foot notes:

- ¹ The limits are expressed in two sets of equivalent units. Either set of limits may be used for the compliance procedure described in Section III.S.3.e of this Title V permit but only the limits expressed in units of g/L solids (nonvolatiles) shall be used for the compliance procedures described in Sections III.S.3.f and III.S.3.g of this Title V permit.
- ² VOC (including exempt compounds listed as HAP) shall be used as a surrogate for VOHAP for those compliance procedures described in Section III.S.3.e-g of this Title V permit.
- ³ To convert from g/L to lb/gal, multiply by (3.785 L/gal)(1/453.6 lb/g) or 1/120. For compliance purposes, metric units define the standards.
- ⁴ VOHAP limits expressed in units of mass of VOHAP per volume of solids were derived from the VOHAP limits expressed in units of mass of VOHAP per volume of coating assuming the coatings contain no water or exempt compounds and that the volumes of all components within a coating are additive.
- ⁵ These limits apply during cold-weather time periods, as defined in 40 CFR §63.782. Cold-weather allowances are not given to coatings in categories that permit over a 40 percent VOHAP content by volume. Such coatings are subject to the same limits regardless of weather conditions.
- ⁶ As defined in 40 CFR §63.782

2. OPERATING REQUIREMENTS

- a. The Permittee of the affected source shall ensure that: [40 CFR §63.783(b)]
 - i. All handling and transfer of VOHAP-containing materials to and from containers, tanks, vats, drums, and piping systems is conducted in a manner that minimizes spills.
[40 CFR §63.783(b)(1)]
 - ii. All containers, tanks, vats, drums, and piping systems are free of cracks, holes, and other defects and remain closed unless materials are being added to or removed from them.
[40 CFR §63.783(b)(2)]

3. COMPLIANCE REQUIREMENTS

- a. For each batch of coating that is received, the Permittee shall: [40 CFR §63.785(a)]
 - i. Determine the coating category and the applicable VOHAP limit as specified in Section III.S.1 of this Title V permit. [40 CFR §63.785(a)(1)]
 - ii. Certify the as-supplied VOC content of the batch of coating. The Permittee may use a certification supplied by the manufacturer for the batch, although the Permittee retains liability should subsequent

Section III: Applicable Requirements and Compliance Demonstration

testing reveal a violation. If the Permittee performs the certification testing, only one of the containers in which the batch of coating was received is required to be tested. [40 CFR §63.785(a)(2)]

- b. In lieu of testing each batch of coating, as applied, the Permittee may determine compliance with the VOHAP limits using any combination of the procedures described in Section III.S.3.e-g of this Title V permit. The procedure used for each coating shall be determined and documented prior to application. [40 CFR §63.785(b)(1)]
- c. The results of any compliance demonstration conducted by the Permittee, Office of Air Resources or the USEPA using Method 24 shall take precedence over the results using the procedures in Section III.T.3.e-g of this Title V permit. [40 CFR §63.785(b)(2)]
- d. The results of any compliance demonstration conducted by the Permittee, the Office of Air Resources or the USEPA using an approved test method to determine VOHAP content shall take precedence over the results using the procedures in Section III.S.3.g of this Title V permit. [40 CFR §63.785(b)(3)]
- e. Coatings to which thinning solvent will not be added.
 - i. For coatings to which thinning solvent (or any other material) will not be added under any circumstance or to which only water is added, the Permittee of an affected source shall comply as follows: [40 CFR §63.785(c)(1)]
 - A. Certify the as-applied VOC content of each batch of coating. [40 CFR §63.785(c)(1)(i)]
 - B. Notify the persons responsible for applying the coating that no thinning solvent may be added to the coating by affixing a label to each container of coating in the batch or through another means described in the facility's current NESHAP Implementation Plan. [40 CFR §63.785(c)(1)(ii)]
 - C. If the certified as-applied VOC content of each batch of coating used during a calendar month is less than or equal to the applicable VOHAP limit in Section III.S.1 (either in terms of g/L of coating or g/L of solids) of this Title V permit, then compliance is demonstrated for that calendar month, unless a violation is revealed using Method 24. [40 CFR §63.785(c)(1)(iii)]
- f. Coatings to which thinning solvent will be added—coating—by coating compliance.
 - i. For a coating to which thinning solvent is routinely or sometimes added, the Permittee shall comply as follows: [40 CFR §63.785(c)(2)]
 - A. Prior to the first application of each batch, designate a single thinner for the coating and calculate the maximum allowable thinning ratio (or ratios, if the Permittee complies with the cold-weather limits in addition to the other limits specified in Section III.S.1 of this Title V permit) for each batch as follows: [40 CFR §63.785(c)(2)(i)]

$$R = \frac{(V_s)(\text{VOHAP limit}) - m_{\text{VOC}}}{D_{th}} \quad \text{Eqn. 1}$$

where:

Section III: Applicable Requirements and Compliance Demonstration

R = Maximum allowable thinning ratio for a given batch (L thinner/L coating as supplied);

V_s = Volume fraction of solids in the batch as supplied (L solids/L coating as supplied);

VOHAP limit = Maximum allowable as-applied VOHAP content of the coating (g VOHAP/L solids);

m_{VOC} = VOC content of the batch as supplied [g VOC (including cure volatiles and exempt compounds on the HAP list)/L coating (including water and exempt compounds) as supplied];

D_{th} = Density of the thinner (g/L).

If V_s is not supplied directly by the coating manufacturer, the Permittee shall determine V_s as follows:

$$V_s = 1 - \frac{m_{volatiles}}{D_{avg}} \quad \text{Eqn. 2}$$

where:

m_{volatiles} = Total volatiles in the batch, including VOC, water, and exempt compounds (g/L coating); and

D_{avg} = Average density of volatiles in the batch (g/L)

The procedures specified in Section III.S.4.d of this Title V permit may be used to determine the values of variables defined in this paragraph. In addition, the Permittee may choose to construct nomographs, based on Equation 1, similar or identical to the one provided in Appendix B of 40 CFR 63, Subpart II as a means of easily estimating the maximum allowable thinning ratio.

- B. Prior to the first application of each batch, notify painters and other persons, as necessary, of the designated thinner and maximum allowable thinning ratio(s) for each batch of the coating by affixing a label to each container of coating or through another means described in the facility's current NESHAP Implementation Plan. [40 CFR §63.785(c)(2)(ii)]
- C. By the 15th day of each calendar month, determine the volume of each batch of the coating used, as supplied, during the previous month. [40 CFR §63.785(c)(2)(iii)]
- D. By the 15th day of each calendar month, determine the total allowable volume of thinner for the coating used during the previous month as follows: [40 CFR §63.785(c)(2)(iv)]

$$V_{th} = \sum_{i=1}^n (R \times V_b)_i + \sum_{i=1}^n (R_{cold} \times V_{b - cold})_i \quad \text{Eqn. 3}$$

where:

V_{th} = Total allowable volume of thinner for the previous month (L thinner);

R = Maximum allowable thinning ratio for a given batch (L thinner/L coating as supplied);

Section III: Applicable Requirements and Compliance Demonstration

V_b = Volume of each batch, as supplied and before being thinned, used during non-cold-weather days of the previous month (L coating as supplied);

R_{cold} =Maximum allowable thinning ratio for each batch used during cold-weather days (L thinner/L coating as supplied);

V_{b-cold} =Volume of each batch, as supplied and before being thinned, used during cold-weather days of the previous month (L coating as supplied);

i =Each batch of coating; and

n =Total number of batches of the coating.

- E. By the 15th day of each calendar month, determine the volume of thinner actually used with the coating during the previous month. [40 CFR §63.785(c)(2)(v)]
- F. If the volume of thinner actually used with the coating [Section III.S.3.f.i.E of this Title V permit] is less than or equal to the total allowable volume of thinner for the coating [Section III.S.3.f.i.D of this Title V permit], then compliance is demonstrated for the coating for the previous month, unless a violation is revealed using Method 24. [40 CFR §63.785(c)(2)(vi)]
- g. Demonstration of compliance through an alternative (i.e., other than Method 24 of Appendix A to 40 CFR Part 60) test method.

The Permittee shall comply as follows:

- i. Certify the as-supplied VOHAP content (g VOHAP/L solids) of each batch of coating. [40 CFR §63.785(c)(4)(i)]
- ii. If no thinning solvent will be added to the coating, the Permittee shall follow the procedure described in Section III.S.3.e, except that VOHAP content shall be used in lieu of VOC content. [40 CFR §63.785(c)(4)(ii)]
- iii. If thinning solvent will be added to the coating, Permittee shall follow the procedure described in Section III.S.3.f of this Title V permit, except that in Equation 1 the term “Mvoc” shall be replaced by the term “MVOHAP” defined as the VOHAP content of the coating as supplied (g VOHAP/L coating) and the term “Dth” shall be replaced by the term “Dth(VOHAP)” defined as the average density of the VOHAP thinner(s) (g/L). [40 CFR §63.785(c)(4)(iii)]
- h. A violation revealed through any approved test method shall result in a 1-day violation for enforcement purposes. A violation revealed through the recordkeeping procedures described in Sections III.S.3.e-g of this Title V permit shall result in a 30-day violation for enforcement purposes, unless the Permittee provides sufficient data to demonstrate the specific days during which noncompliant coatings were applied. [40 CFR §63.785(d)]

4. TESTING REQUIREMENTS

- a. For the compliance procedures described in Sections III.S.3.e-g of this Title V permit, Method 24 of 40 CFR Part 60, appendix A, is the definitive method for determining the VOC content of coatings, as supplied or as applied. When a coating or thinner contains exempt compounds that are volatile HAP or VOHAP, the Permittee shall ensure, when determining the VOC content of a coating, that the mass of these exempt compounds is included. [40 CFR §63.786(a)]

Section III: Applicable Requirements and Compliance Demonstration

- b. For the compliance procedure described in Section III.S.3.g of this Title V permit, the USEPA must approve the test method for determining VOHAP content of coatings and thinners. The criteria for approval of the test method are specified in 40 CFR §63.786(b). [40 CFR §63.786(b)]
- c. A coating manufacturer or the Permittee may use batch formulation data as a test method in lieu of Method 24 to certify the as-supplied VOC content of a coating if the manufacturer or the Permittee has determined that batch formulation data have a consistent and quantitatively known relationship to Method 24 results. This determination shall consider the role of cure volatiles, which may cause emissions to exceed an amount based solely upon coating formulation data. Notwithstanding such determination, in the event of conflicting results, Method 24 shall take precedence.
[40 CFR §63.786(c)]
- d. The Permittee shall use or ensure that the manufacturer uses the form and procedures mentioned in 40 CFR 63 Subpart II appendix A to determine values for the thinner and coating parameters used in Equations 1 and 2 of this Title V permit. The Permittee shall ensure that the coating/thinner manufacturer (or supplier) provides information on the VOC and VOHAP contents of the coatings/thinners and the procedure(s) used to determine these values.
[40 CFR §63.786(d)]

5. RECORDKEEPING REQUIREMENTS
