Title V Emissions Reporting - 2011

- ▶ Please review your editor and submitter authorizations provide updated authorizations for EMIT users;
- ▶ Form: see [link](#) on Inventory page on DEEP website.
- ▶ We have installed, tested approximately 40 prioritized technical changes in EMIT in support of the pending reporting season. Michael will comment on these shortly.

Title V Emissions Reporting - 2011

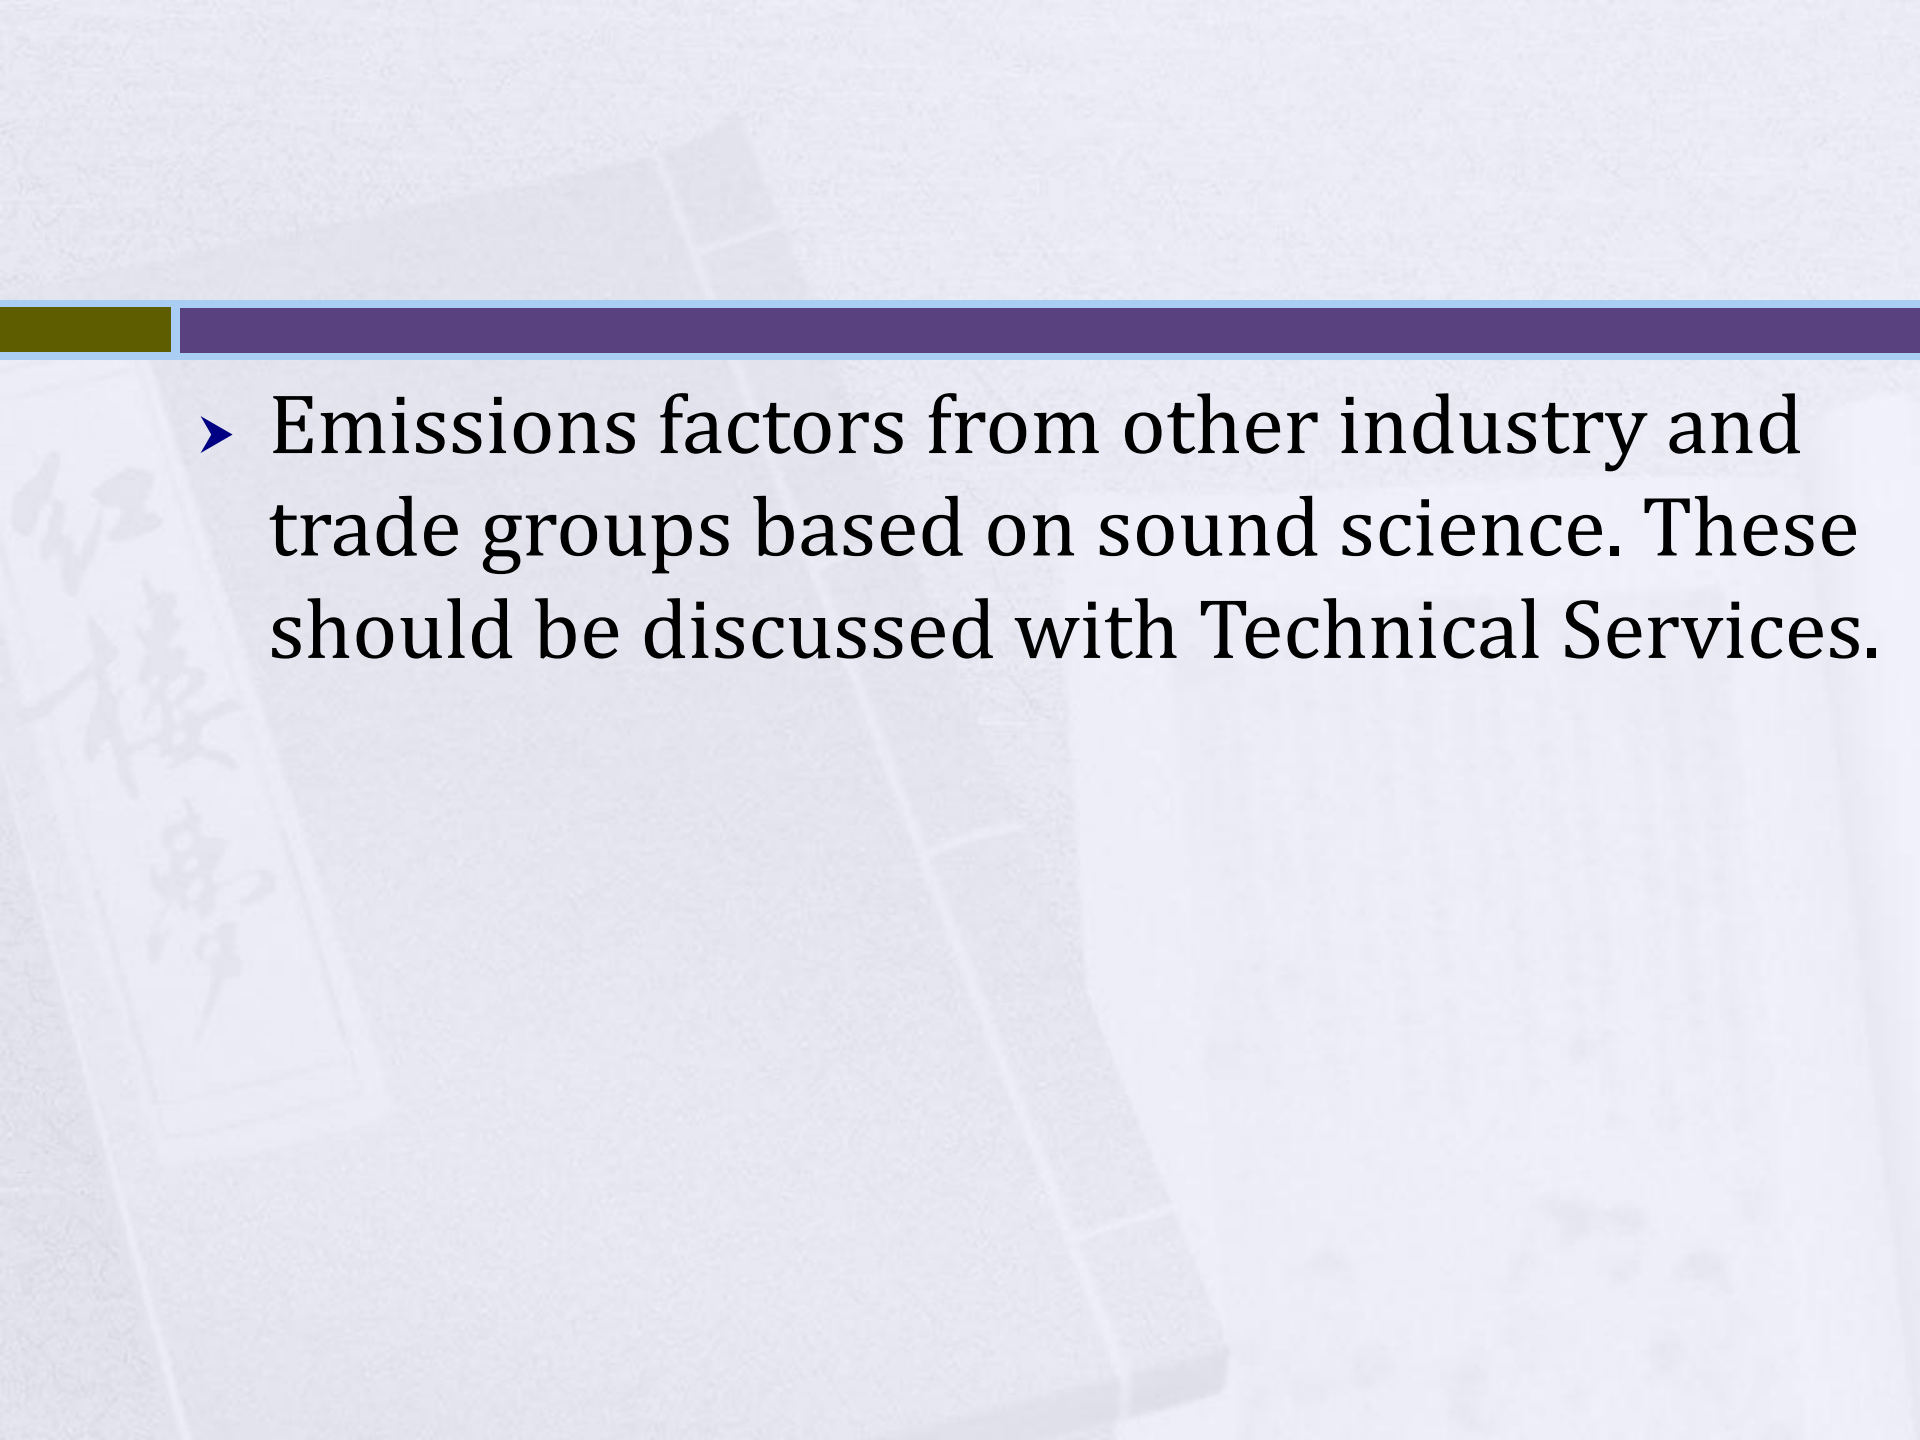

- ▶ We are setting a firm date of closing the 2011 reporting season at the March 1, 2012.
- ▶ Please respond with an accurate, submission.
- ▶ We provide the following guidance for reporting Criteria and Section 112 pollutants:

Guidance For Reporting Emissions

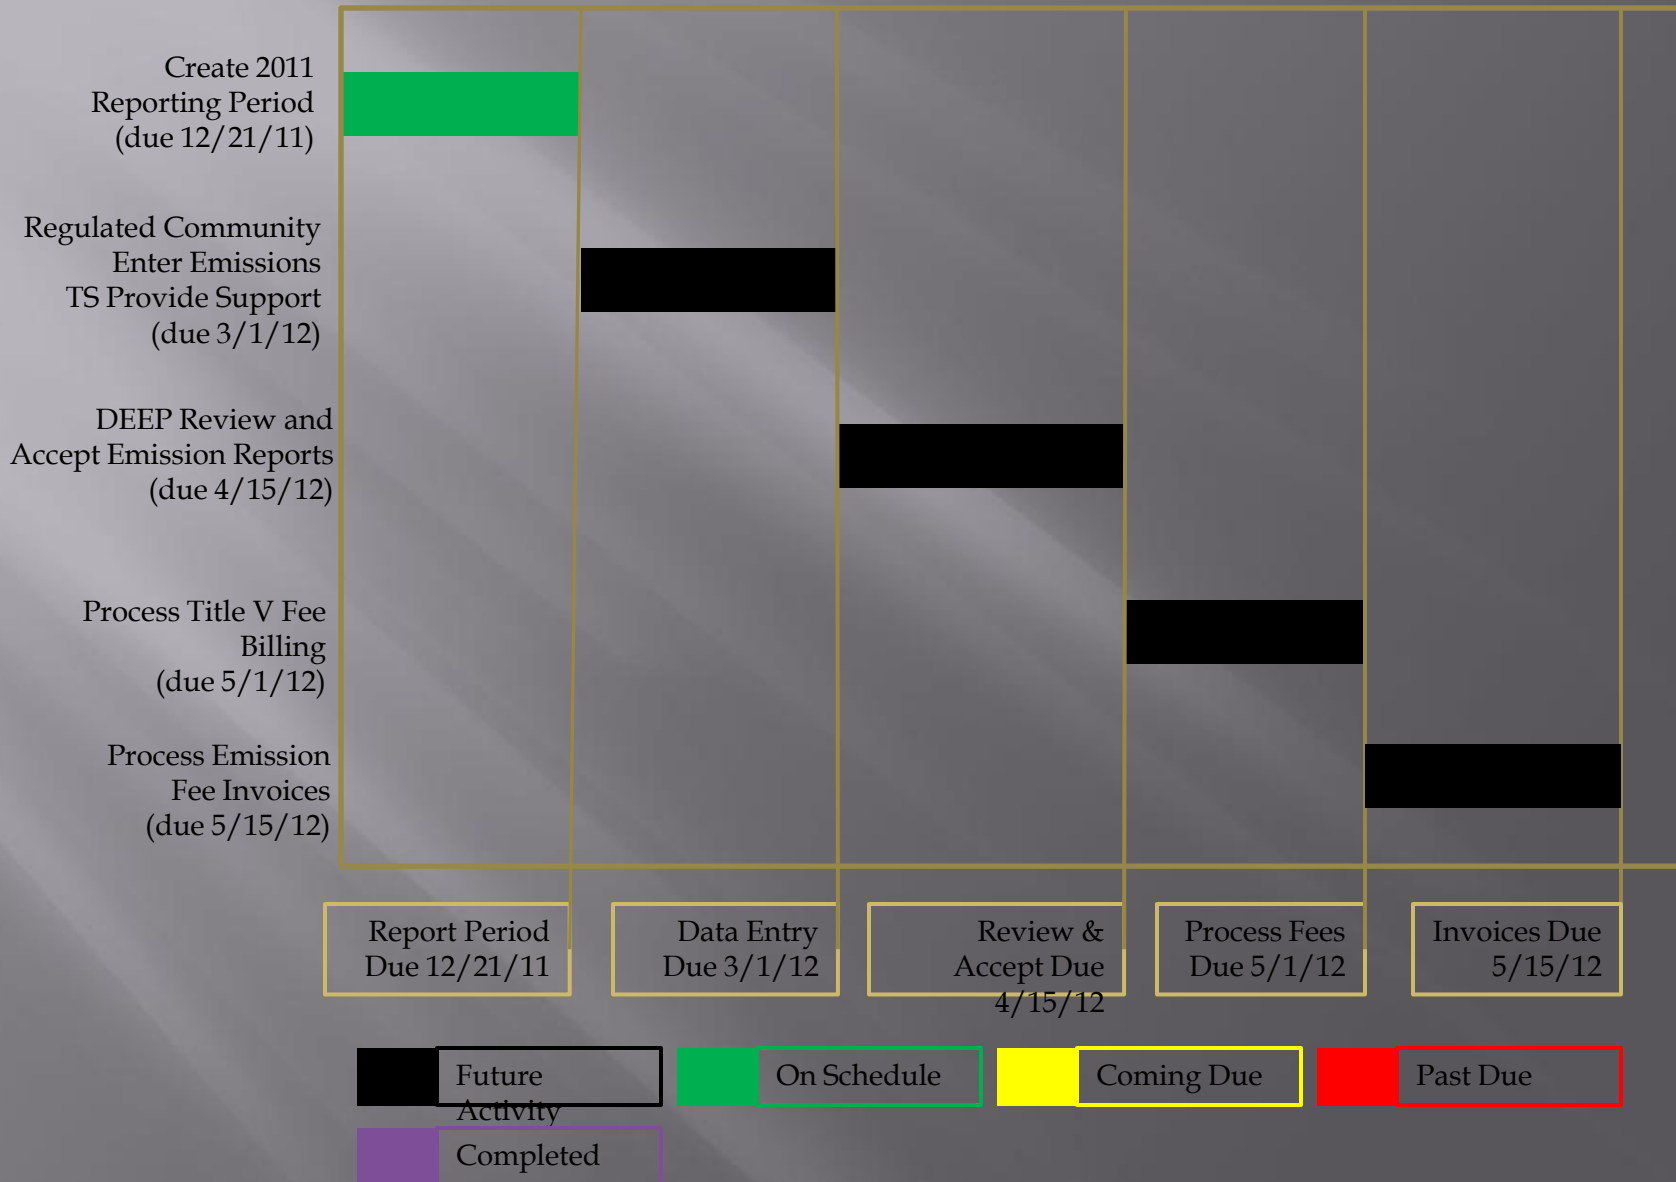

- ▶ CEMs/PEMs monitoring systems that are required by statute, regulation, or Permit or Order condition, emission data generated by these systems shall serve as the basis for emissions reported in EMIT;
- ▶ reference method emission testing that has been deemed by the DEEP to be representative of current and normal operating conditions;

Guidance For Reporting Emissions

- ▶ An approved facility-specific emission factor or by Material or Mass Balance, if supporting documentation is submitted;
- ▶ EPA-published emission factors, where available; some of these will be provided automatically in EMIT from the Web Fire upload;

- 
- ▶ Emissions factors from other industry and trade groups based on sound science. These should be discussed with Technical Services.
