

Connecticut Interoperability Field Operations Guide (CTIFOG)

Common Responsibilities of All Deployed Responders

- ❖ Be prepared to deploy – have GO kit(s) ready
- ❖ Receive assignment – DO NOT self-deploy
 - Reporting location, time, and travel route
 - Description of type and severity of incident
 - Instructions for communication while enroute
 - Monitor incident status while enroute
- ❖ Start an ICS214 to document activities
- ❖ Upon arrival, check in at correct location
- ❖ Receive briefing from immediate supervisor
- ❖ Gather information on current incident status
 - Copy of IAP, face-to-face, ICS201
 - Document current situation if necessary
- ❖ Document significant activities on ICS214
- ❖ Maintain asset accountability
- ❖ Brief, assign, and manage subordinates, if any
- ❖ Work safely – ensure safety
- ❖ Participate in planning process if appropriate
- ❖ Keep system operational – verify!
- ❖ Brief replacement prior to shift change
- ❖ Demobilize as directed – when and how

Introduction

The Connecticut Interoperability Field Operations Guide (CTIFOG) is a collection of technical reference material to aid Communications Unit personnel in establishing solutions to support communications during emergency incidents and planned events. The CTIFOG includes information from several communications documents, including the NIFOG and regional TIC-P's.

The CTIFOG contains regional, state, and national interoperability channels. These channels should be programmed into Public Safety radios in the appropriate frequency band. If geographic restrictions on some channels preclude their use within Connecticut, they may offer an interoperability option when responding out of territory where the restrictions do not apply. The document focus is on regional, state and federal interoperable systems and assets.

Please send updates, corrections, or comments about the CTIFOG or requests for additional copies to ctifog@ct.gov.

Thank you,

Michael Varney

Connecticut Statewide Interoperability Coordinator
Department of Emergency Services and Public Protection
1111 Country Club Road
Middletown, CT 06457

About this Guide

Points of Contact for this Guide

Agency:	Department of Emergency Services and Public Protection
Title:	Statewide Interoperability Coordinator
Name:	Michael Varney
E-Mail:	michael.varney@ct.gov
Phone:	860-685-8146

The purpose of the Connecticut Interoperability Field Operations Guide (CIFOG) is to increase efficiency in establishing interoperable communications during incidents, create a consistent knowledge base of interoperable communications channels and networks, and provide a helpful tool for pre-planning and interoperable communications training and exercises. This document is intended to help alleviate many of the problems or short comings during communications globally:

1. Incident using radio channels in more than one band (Low Band, VHF, UHF, and/or 700/800 MHz, etc.)
2. Incident using different radio bands via console or gateway patches
3. Unable to communicate critical information due to radio congestion
4. Unfamiliar with radio system(s) or assigned radio functionality
5. Instructions and assignments not clear
6. Have no or inadequate communication with your crew members or supervisor
7. Dispatch to dispatch channel patching
8. Inadequate number of tactical channels available or assigned
9. Multiple conversations on the same talk group or channel

The focus of this document is on regional, state and federal interoperable and mutual aid systems, and assets.

Please send updates, corrections, or comments about the CTIFOG to ctifog@ct.gov.

1 Interoperable Communications Commonalities

1.1 Agency Responsibilities and Rights

Agencies will retain the following responsibilities and rights:

Authorized representatives of agencies participating in this plan have the authority to request the use of equipment, including systems and mobile assets, in accordance with Standard Operating Procedures (SOPs).

Where applicable, agencies will be responsible for consistently maintaining, testing, and exercising connectivity to interoperable communications.

Incident Commanders retain the right to decide how to utilize interoperable communications.

1.2 Prioritization and Shared Use of Regional Interoperability Assets

The Incident Commander, or designee, in conjunction/cooperation with their counterparts in other involved agencies, will have the authority to request the use of interoperable assets. Once Incident Command has been established, Command Staff or the Communications Unit Leader (when designated) direct the further coordination and delegation of the interoperable communications assets assigned to the event or incident in question.

When the same resources are requested for two or more incidents, resource assignments should be based on the priority levels in accordance with the National Incident Management System (NIMS).

In the event of multiple simultaneous incidents within the same priority, the resources should be allocated according to NIMS.

In response to events or incidents which cross over jurisdictional boundaries, there potentially could be competing demands and priorities for interoperable communications assets.

Agencies should activate needed interoperable assets to respond effectively and to minimize any negative impact on surrounding agencies or jurisdictions. Specifically, interoperable communications should be established with the following techniques, listed in increasing order of complexity:

1. Utilize **face-to-face** communications wherever appropriate. For example, the co-location of all Command and General Staff at the Incident Command Post (ICP) provides the best direct communications and reduces the demand on interoperability resources

2. Employ **local communications** assets until such time as either those assets become taxed or inadequate based on the nature and/or scope of the incident
3. If response agencies are users of a **shared system**, utilize that shared system to establish interoperable communications
4. If response agencies operate on disparate systems, utilize **shared or mutual aid channels** to establish interoperable communications.
5. If response agencies do not share systems or channels, utilize a **gateway** solution to establish interoperable communications
6. Where interoperable communications cannot otherwise be established between response agencies, utilize **swap or cache radios** to establish operable communications for responders
7. If no other method of interoperability can be established, relay communications through **staff members**

When the same resources are requested for two or more incidents, resource assignments should be based on the priority levels listed below:

1. Disasters, large scale incidents, or extreme emergencies requiring mutual aid or interagency communications
2. Incidents where imminent danger exists to life or property
3. Incidents requiring the response of multiple agencies
4. Pre-planned events requiring mutual aid or interagency communications
5. Incidents involving a single agency where supplemental communications are needed for agency use
6. Drills, tests and exercises

In the event of multiple simultaneous incidents within the same priority level, the Incident Commander or Unified Command (if formed) shall have allocation authority and shall allocate resources with the following priorities in mind:

1. Incidents with the greatest level of exigency (e.g., greater threat to life or property, more immediate need, etc.) have priority over less exigent incidents
2. Agencies with single/limited interoperable options have priority use of those options over agencies with multiple interoperable options

When at all possible, agencies already using an interoperable asset during an event should not be redirected to another resource.

1.3 Incident Command System (ICS)

ICS is a key feature of NIMS. It is a widely applicable management system designed to enable effective, efficient incident management by integrating a combination of facilities, equipment, personnel, procedures and communications operating with a common organizational structure. ICS is used to organize on-scene operations for a broad spectrum of incidents/events and guides the process for planning, building and adapting that structure. ICS is based on the command principles of unity of command, chain of command, span of control, delegation of authority and division of labor. The five major functional areas of ICS are command, operations, planning, logistics and finance/administration. A sample Incident Management – Major Incident flow can be found in the chart on the following page.

1.4 Position Descriptions

At an Incident/Event

The Communications Unit is in the Service Branch of the Logistics Section of the ICS. Listed below are the Communication Unit Organization position titles and responsibilities.

Communications Unit Leader (COML):

Manages the technical and operational aspects of the Communications Function during an incident or event. Develops National Incident Management System (NIMS) / Incident Command System (ICS) Form 205 Incident Radio Communications Plan and supervises the communication unit.

Incident Communications Technician (COMT):

Deploys advanced equipment and keeps it operational throughout the incident/event.

Technical Specialist (THSP):

Allows for the incorporation of personnel who may not be formally certified in any specific NIMS/ICS position. THSPs may include Local Agency Radio Technicians (as opposed to the COMT), Telephone Specialists, Gateway Specialists, Data/IT Specialists, and or Cache Radio Specialists.

Incident Communications Center Manager (INCM):

Supervises the operational aspects of the Incident Communications Center (ICC) (Mobile Unit and/or Fixed Facility). During an incident, the ICC is designed to absorb incident traffic in order to separate that traffic from the day-to-day activities of the dispatch center. The ICC is typically located at the Incident Command Post (ICP) in a fixed site, tent, trailer, mobile communications unit.

Radio Operator (RADO):

Staffs a radio at the ICC and is responsible for documenting incoming radio and telephone messages. Incident Dispatchers or Tactical Dispatchers are used as RADOs.

Dispatch Center or Emergency Operations Center (EOC)

Communications Coordinator (COMC):

The COML will work with the COMC to coordinate communications with other dispatch centers and the incident communication plan. Locally, the jurisdictional dispatch center supervisor or dispatcher will act as the Communications Coordinator. Coordinators may also be located at the county, region, Connecticut, and/or federal level.

1.5 ICS Personnel Common Responsibilities

The following is a checklist applicable to all ICS personnel.

- a. Receive assignment from your agency, including:
 1. Job assignment, e.g., Strike Team designation, overhead position, etc.
 2. Resource order number and request number
 3. Reporting location
 4. Reporting time
 5. Travel instructions
 6. Any special communications instructions, e.g. travel channel
- b. Upon arrival at the incident, check in at designated Check-in location. Check-in may be found at:
 1. Incident Command Post
 2. Base or Camps
 3. Staging Areas
 4. Helibases
 5. If you are instructed to report directly to a line assignment, check in with the Division/Group Supervisor
- c. Receive briefing from immediate supervisor.
- d. Acquire work materials.
- e. Conduct all tasks in a manner that ensures safety and welfare of you and your co-workers.
- f. Organize and brief subordinates.
- g. Know the assigned channel(s) for your area of responsibility and ensure that communication equipment is working properly
- h. Use clear text and ICS terminology (no codes) in all radio communications. All radio communications to the Incident Communications Center will be addressed: “(Incident Name) Communications”, e.g., “Hartford Communications”

1.6 Communications Unit Leader (COML) Position Checklist

NOTE: Can be also used by the Incident Commander, Logistics Section Chief, or designee in the absence of a COML.

1. Obtain briefing from the Logistics Section Chief or Service Branch Director
2. Organize and staff unit as appropriate

- a. Assign Communications Center Manager and Lead Incident Dispatcher
 - b. Assign Message Center Manager and ensure adequate staff is assigned to answer phones and attend to fax machines
3. Assess communications systems/channels in use; advise on communications capabilities/limitations
4. Develop and implement effective communications procedures (flow) internal and external to the incident/Incident Command Post.
5. Assess Incident Command Post phone load and request additional lines as needed
6. Obtain copy of Communications Resource Availability Worksheet (ICS Form 217A) which provides RF information for the applicable area. If ICS Form 217A has not been completed or is unavailable, it should be prepared).
7. Prepare and Implement Incident Communications Plan (ICS Form 205):
 - a. Obtain current organizational chart
 - b. Determine most hazardous tactical activity; ensure adequate communications
 - c. Make communications assignments to all other Operations elements, including volunteer, contract, or mutual aid
 - d. Determine command communications needs
 - e. Establish and post any specific procedures for use of Incident Command Post communications equipment
8. Include cellular phones and pagers in Incident Communications Plan (ICS Form 205T) if appropriate:
 - a. Determine specific organizational elements to be assigned to telephones
 - b. Identify all facilities/locations with which communications must be established (shelters, press area, liaison area, agency facilities, other governmental entities' Emergency Operations Center [EOCs], etc.), and identify and document phone numbers
 - c. Determine which phones and what numbers should be used by specific personnel and their purpose. Assign specific telephone numbers for incoming calls, and report these numbers to staff and off-site parties such as other local jurisdictions, Connecticut and federal agencies
 - d. Do not publicize OUTGOING call lines
9. Activate, serve as contact point, and supervise the integration of volunteer radio organizations into the communications system
10. Ensure radio and telephone logs are available and being used

11. Determine need and research availability of additional nets and systems:
 - a. Order through Supply Unit after approval by Section Chief or appropriate official
 - b. Federal systems
 - c. Additional radios and other communications devices, including repeaters, radio-telephone interconnects and satellite down-link capabilities may be available through DESPP, FEMA or the National Interagency Fire Center (NIFC)
12. Document malfunctioning communications equipment, facilitate repair
13. Establish and maintain communications equipment accountability system
14. As required, provide technical information regarding:
 - a. Adequacy of communications system currently in use
 - b. Geographic limitations of communications equipment
 - c. Equipment capabilities
 - d. Amount and types of equipment available
 - e. Anticipated problems in the use of communications equipment
15. Estimate Unit needs for expected operations
16. As required, request relief personnel
17. Provide briefing to relief personnel on current activities and unusual situations
18. Document all activity on Unit/Activity Log (ICS Form 214)

1.7 Requests for Communication Assets

Pre-Planned Event

1. An agency anticipating the need for Communications Assets for a pre-planned event should:
 - a. Create a request including the following information:
 - i. Event dates/times
 - ii. Type of event
 - iii. Location
 - iv. Requesting Agency
 - v. Contact Name, telephone number, e-mail address
 - vi. COM-T/L information, if different
 - vii. Preliminary ICS205
 - viii. Detailed list of requested Communications Assets
 - b. Submit the request via e-mail to: esf2@ct.gov at least two (2) weeks prior to the event

Emergent Event

1. An agency needing support of a communications asset will contact the Department of Emergency Services and Public Protection Headquarters Communications Center at 860-685-8190.
2. The DESPP Communications Center will create a "Call-For-Service" and request the following information:
 - a. Requesting agency
 - b. Type of event
 - c. Location
 - d. Contact name, telephone number
 - e. Requested Communications Assets
 - f. Estimated duration of deployment
3. The DESPP Communications Center will contact appropriate DESPP Staff who will contact the requestor to determine further required information, including current communications plans and determine Communications Assets to be deployed. This may include cache radios or Strategic Technology Reserve (STR) equipment.
4. The COML will coordinate with Incident Command for staging of the asset or to determine a reporting location
5. The responding communications asset(s) will establish communications with the DESPP Headquarters Communications Center when enroute and upon arrival.
6. The designated COML will prepare an Incident Radio Communications Plan (ICS Form 205). The ICS 205 will be provided to the Incident Commander and to the SEOC (if applicable). The Communications Plan will also include phone numbers for incident personnel and other significant locations
7. The communications personnel will rapidly prepare to activate interoperable communications necessary to support on-scene incident personnel
8. The communication asset(s) should be prepared to remain on scene staffed by trained communications personnel until released by the Incident Commander or designee.

2 Interoperability Assets

Refer to regional Standard Operating Procedures (SOPs) for policies and procedures on asset usage.

2.1 General Rules of Use

- **National Incident Management System** – Implement an Incident Command System (ICS) compliant with the National Incident Management System (NIMS) when using any regional interoperability resource.
- **National Response Framework** – Use the appropriate ICS forms needed to document a given incident, in accordance with the National Response Framework (NRF).
- **Plain Language** – Avoid using radio codes, acronyms, and abbreviations as they may cause confusion between agencies. Ensure that all verbal requests for assistance or backup specify the reason for the request.
- **Unit Identification** – Announce your home agency prior to announcing your unit identifier during interoperable communication situations. (e.g., “Command, this is Wethersfield Ambulance A1”)

Applies to Gateways

- **Encryption** – All encrypted radio users must operate in a “clear” mode when a gateway is used, unless otherwise arranged in advance. **Never assume encryption carries across the gateway**
- **Technical Support** – Qualified gateway technical specialists (THSPs) or communications technicians (COMTs) must be available for on-scene support during the deployment of mobile gateways
- **Patching** – Mobile patching should generally be limited to simplex operations. Wide area networks should not be patched unless authorized through local system coordinator(s). Gateway devices should not patch Federal Communication Commission (FCC) frequencies to Military frequencies unless coordinated with the Military Facility Frequency Manager
- **Monitoring** – The Incident Commander, or their designee, will ensure that each activated patch is monitored consistently while in use

Applies to Radio Caches

- **Charging** – Cache radios must be fully charged and ready for immediate deployment when requested. Deployed equipment includes extra batteries and/or battery chargers to support extended deployments
- **Radio Identification** - Each radio in a radio cache will have a unique identification number (e.g. serial number, etc.) for inventory tracking
- **Technical Support** – Qualified radio cache THSPs or COMTs should be available for on-scene support during the deployment, if the requesting agency cannot act in this capacity
- **Equipment Return** – The requesting agency is responsible for the return of any cache radios/MCUs/equipment in the condition that they were issued/received. Responsibilities for lost or damaged equipment lie with the appropriate agency as dictated by existing Memoranda of Agreement(s) (MOAs)

Applies to Mobile Command Units (MCUs)

- **Equipment Return** – The requesting agency is responsible for the return of any MCU in the condition that it was received and/or as dictated by existing Memoranda of Agreement(s)
- **Operational Expenses** – Responsibility for operational expenses should be decided upon ahead of time or within an MOU

2.2 COML and COMT Assets

A cadre of All-Hazards Type III Communications Unit Leaders (COMLs) and Communication Technicians (COMTs) are available for deployment statewide for support during emergency incidents, planned events, trainings and exercises. The individuals who are available to fulfill these roles evolve continuously and therefore are not listed in the CTIFOG. DESPP maintains a current list of available COMLs and COMTs, and serves as the primary Point of Contact for coordinating requests for their deployment.

COML

In addition to completing the Department of Homeland Security COML class room curriculum, selected Incident Command System training and Position-Specific Task Book, Connecticut COMLs also have additional State Certification Requirements including but not limited to:

- Training on the Communications Asset Survey And Mapping (CASM) Tool

- All COML candidates must participate in an exercise, (functional or full-scale only), or actual incident overseen by a certified Connecticut COML. The COML will certify the COML candidate as displaying the requisite skills for completion
- The certified COML must maintain a continuing education program

COMT

COMTs receive similar training as the COML specific to their responsibilities.

The COMT is responsible for:

- Setup, technical operation, and maintenance of communications equipment
- Tasks as assigned by the COML

2.3 State Fixed Gateways

All state and regional assets listed below can be requested through the owning/managing agency or Connecticut Department of Emergency Services and Public Protection (DESPP).

Gateway Name	Owning/Managing POC Information		Notes
	Agency	24/7 Phone	
DESPP Console	DESPP	(860) 685-8190	Statewide console LAN
DESPP North	DESPP	(860) 685-8190	ACU2000
DESPP South	DESPP	(860) 685-8190	ACU2000

2.4 State Transportable Gateways / Repeaters

All state and regional assets listed below can be requested through the owning/managing agency or Connecticut Department of Emergency Services and Public Protection (DESPP).

Gateway / Repeater Name	Owning/Managing POC Information		Notes
	Agency	24/7 Phone	
DESPP ACU2000	DESPP	(860) 685-8190	
DESPP TMIC	DESPP	(860) 685-8190

<p>The purpose of the Connecticut State Tactical On-Scene Channel System (STOCS) is to provide an interoperable platform for on scene tactical use. It is intended to allow individuals and groups of responders to communicate when working at the scene of an incident, using existing portable radio equipment. NOTE: Power out on all frequencies is limited to 5 watts. The use of "V" "U" or "8" is optional and designed for use in multi-band radios.</p>

Appendix A Regional Interoperability Information

This Interoperability FOG is intended to apply to Connecticut. Specifically, this is a field operations guide intended to be used by public safety personnel during day-to-day and emergency response situations. More detailed information on each region is listed in the following sections.

Figure A-1
DESPP/DEMHS Regions

A.1 Region 1 TIC-P Area

Notes				
Cache radios, also known as "swapped radios," refer to maintaining a cache of standby radios that can be deployed to support regional incidents. These radios may be from a regional cache or from a participating agency. These radios allow all responders to use common, compatible equipment during an incident.

The purpose of the Connecticut State Tactical On-Scene Channel System (STOCS) is to provide an interoperable platform for on scene tactical use. It is intended to allow individuals and groups of responders to communicate when working at the scene of an incident, using existing portable radio equipment. NOTE: Power out on **all** frequencies is limited to 5 watts. The use of "V" "U" or "8" is optional and designed for use in multi-band radios.

The purpose of the Connecticut State Tactical On-Scene Channel System (STOCS) is to provide an interoperable platform for on scene tactical use. It is intended to allow individuals and groups of responders to communicate when working at the scene of an incident, using existing portable radio equipment. NOTE: Power out on **all** frequencies is limited to 5 watts. The use of "V" "U" or "8" is optional and designed for use in multi-band radios.

Appendix C Non-Federal National Interoperability Channels

The convention calls for frequency lists to show four digits after the decimal place, followed by either an “N” or a “W”, depending on whether the frequency is narrow or wide band. Mode refers to either “A” or “D” indicating analog or digital (e.g., Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile, or portable radio. Repeater and base stations must be programmed with the RX and TX reversed. Unless stated otherwise, all frequencies are MHz except CTCSS tones, which are in Hz.

C.1 VHF Low Band

COMMUNICATIONS RESOURCE AVAILABILITY WORKSHEET ICS 217A					Frequency Band VHF Low Band			Description Discipline Specific Channels		
Channel Configuration	Channel Name / Trunked Radio System Talk Group	Eligible Users	Mobile RX Freq	N / W	RX Tone / NAC	Mobile TX Freq	N / W	TX Tone / NAC	Mode A, D, or M	Notes
Duplex	LLAW1	LE	39.4600	W	156.7	45.8600	W	156.7	A	
Simplex	LLAW1D	LE	39.4600	W	156.7	39.4600	W	156.7	A	
Duplex	LFIRE2	Fire	39.4800	W	156.7	45.8800	W	156.7	A	
Simplex	LFIRE2D	Fire	39.4800	W	156.7	39.4800	W	156.7	A	
Duplex	LLAW3	LE	45.8600	W	156.7	39.4600	W	156.7	A	
Simplex	LLAW3D	LE	45.8600	W	156.7	45.8600	W	156.7	A	
Duplex	LFIRE4	Fire	45.8800	W	156.7	39.4800	W	156.7	A	
Simplex	LFIRE4D	Fire	45.8800	W	156.7	45.8800	W	156.7	A	

C.2 VHF High Band

COMMUNICATIONS RESOURCE AVAILABILITY WORKSHEET ICS 217A				Frequency Band VHF HIGH BAND			Description Interoperable Tactical Channels			
Channel Configuration	Channel Name / Trunked Radio System Talk Group	Eligible Users	Mobile RX Freq	N / W	RX Tone / NAC	Mobile TX Freq	N / W	TX Tone / NAC	Mode A, D, or M	Notes
Simplex	VCALL10	Any Public Safety	155.7525	N	156.7	155.7525	N	156.7	A	Calling/Hailing
Simplex	VTAC11	Any Public Safety	151.1375	N	156.7	151.1375	N	156.7	A	Tactical Simplex
Simplex	VTAC12	Any Public Safety	154.4525	N	156.7	154.4525	N	156.7	A	Tactical Simplex
Simplex	VTAC13	Any Public Safety	158.7375	N	156.7	158.7375	N	156.7	A	Tactical Simplex

E.3 DESPP/State 7/800 MHz System

E.3.1 DESPP/State 7/800 MHz POC

Agency:	Department of Emergency Services and Public Protection
Phone:	860-685-8280

E.3.2 DESPP/State 7/800 MHz Overview

The State Police serve as the system administrators and manage the network maintenance for the statewide 700/800 MHz trunked public safety radio network. This network is the primary radio system for the State Police, and it also serves as the communications platform for a number of other State agencies. The system also supports the Region 1 UASI. The statewide 700/800 MHz network provides interoperable communications using both trunked and conventional frequencies throughout Connecticut. This network operates as a digital system using both proprietary (Motorola 4.1 Smartzone) and a standard based P25 digital platform providing coverage throughout the state. The P25 system also supports the use of Conventional Channel GateWays (CCGW's) that have been installed in each public safety answering point (PSAP). The use of the CCGW's will enhance interoperability between local, state, and federal partners.

E.4 8CALL/TAC

E.4.1 8CALL/TAC POC / Activation Request

Agency: Department of Emergency Services and Public Protection

Phone: 860-685-8190

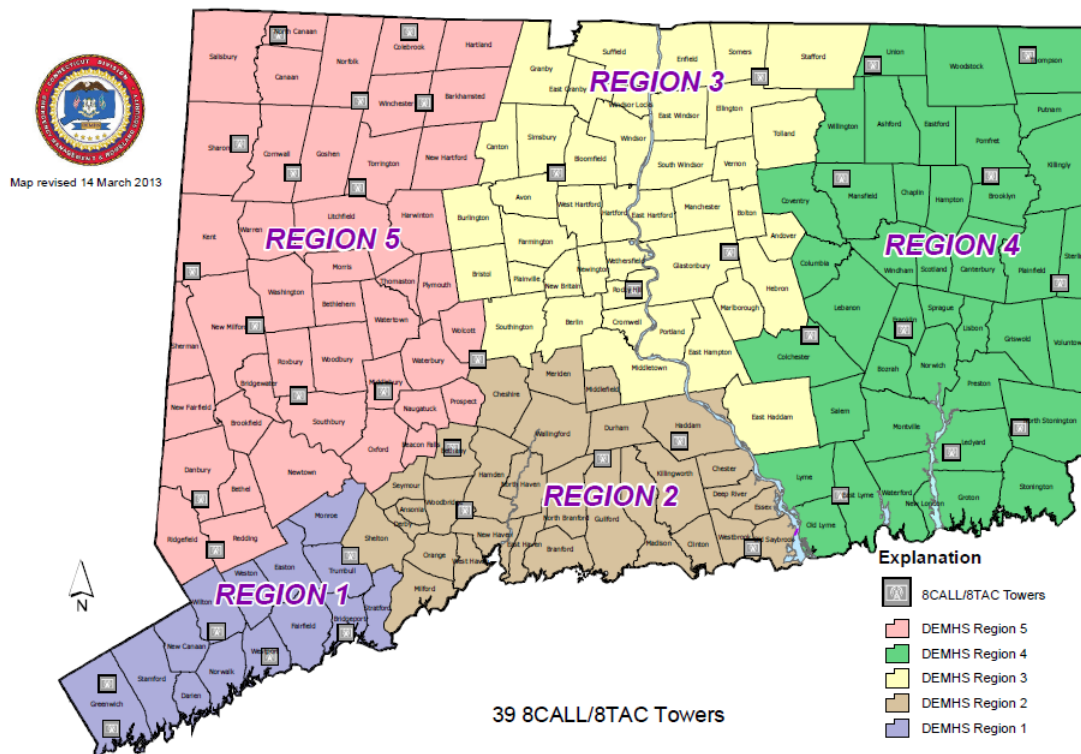

E.4.2 8CALL/TAC Overview

The State has fixed radio sites on the 8CALL/TAC channels throughout the state. These sites provide a simulcast 8CALL capability as well as a frequency-agile 8TAC capability. Any 8TAC channel can be enabled at any site remotely.

This system also provides additional radio channel capacity for mutual aid operations during pre-planned and emergency events.

The Connecticut 8CALL/TAC system utilizes the nationwide 8CALL/TAC frequencies.

2013 CONNECTICUT RESPONDER ASSETS - 8CALL/8TAC

Appendix F Federal Interoperability Channels

DOJ 25 CITIES PROGRAM

Agency:	Department of Justice/FBI-New Haven Division
Name:	Mark DeWolfe/Telecommunications Manager
Phone:	203-777-6311
e-mail:	mark.dewolfe@ic.fbi.gov

The Department of Justice (DOJ) High-Risk Metropolitan Areas Interoperability Assistance Project provides:

- Federal law enforcement/homeland security agencies with basic inter-system communication for emergency situations,
- An ability to connect with key local authorities (i.e. fire, police, emergency medical services [EMS]).

The system installed in Connecticut provides wide area coverage throughout Connecticut through the use of multi-cast repeaters with a number of voting receivers strategically placed throughout the State.

The Connecticut Department of Emergency Services and Public Protection participates in this system.

Agencies looking to participate in this system should contact Mark DeWolfe of the New Haven Division for information.

REGULATIONS AND GUIDELINES FOR NATIONAL INTEROPERABILITY

1. The FCC and NTIA rules allow for some flexibility in frequency use by personnel directly involved in a situation where there is imminent danger to human life or property. This does NOT mean “in an emergency, anything goes..”
2. For communications not covered by #1, your use of a radio frequency must be authorized by:
 - Your agencies FCC license or NTIA authorization
 - “License by rule” a provision in FCC rules that authorizes use of a radio frequency under specified conditions without a specific license or authorization issued to the user
 - A “Special Temporary Authorization” provided by the FCC or NTIA
3. Digital P25 operations on non-Federal interoperability channels should transmit the default Network Access Code (NAC) \$293, and receive with a NAC of \$F7E (accept any incoming NAC). Specify talkgroup \$FFFF, which includes everyone.
4. Default modes for using Federal Interoperability Channels: use analog for all Incident Response channels and Law Enforcement channels LE A, LE 1, LE B, LE 10, and LE16; use P25 Digital for the remaining LE channels, NAC \$68F

CONDITIONS FOR USE OF THE FEDERAL INTEROPERABILITY CHANNELS

1. The “VHF Incident Response (IR) Federal Interoperability Channel Plan,” the “UHF Incident Response (IR) Federal Interoperability Channel Plan,” the “VHF Law Enforcement (LE) Federal Interoperability Channel Plan,” and the “UHF Law Enforcement (LE) Federal Interoperability Channel Plan” show frequencies available for use by all Federal agencies to satisfy law enforcement and public safety incident response interoperability requirements. These frequencies will e referred to hereinafter as “Federal Interoperability Channels.”
2. The Federal Interoperability Channels are available for use among Federal agencies and between Federal agencies and non-federal entities with which Federal agencies have a requirement to operate.
3. The channels are available to non-federal entities to enable joint Federal/non-federal operations for law enforcement and incident response, subject to the condition that harmful interference will not be caused to Federal stations. These channels are restricted to interoperability communications and are not authorized for routine or administrative uses.
4. Extended operations and congestion may lead to frequency conflicts. Coordination with NTIA is required to resolve these conflicts.
5. Only narrowband emissions are to be used on the Federal Interoperability Channels.
6. Equipment used (transmitters and receivers) must meet the standards established in Section 5.3.5.2 of the NTIA Manual:
 - a. TIA/EIA 603-B for narrowband analog;

- b. TIA TSB 102.CAAB-A for narrowband digital
- 7. A complete listing of conditions for use by Federal users can be found in Section 4.3.16 of the NTIA manual.
- 8. Use of these frequencies within 75 miles of the Canadian border and 5 miles of the Mexican border require special coordination and in some cases will not be available for use.

Law Enforcement Plans

- 1. Frequencies 167.0875 MHz and 414.0375 MHz are designated as National Calling Channels for initial contact and will be identified in the radio as indicated in the Law Enforcement Federal Interoperability Channels Plans.
- 2. Initial contact communications will be established using narrowband analog FM emission (11K25F3E).
- 3. The interoperability channels will be identified in mobile and portable radios as indicated in the Law Enforcement Federal Interoperability Channel Plans with Continuous Tone-Controlled Squelch Systems (CTCSS) frequency 167.9Hz and/or Network Access Code (NAC) \$68F.

Incident Response Plans

- 1. Frequencies 169.5375 MHz (paired with 164.7125 MHz) and 410.2375 (paired with 419.2375 MHz) are designated as the calling channels for initial contact and will be identified in the radio as indicated in the Incident Response Federal Interoperability Channel Plans.
- 2. Initial contact will be established using narrowband analog FM emission (11K25F3E).
- 3. To ensure access by stations outside the normal area of operation, Continuous Tone-Controlled Squelch Systems (CTCSS) will not be used on the calling channels.
- 4. The interoperability channels will be identified in the mobile and portable radios as indicated in the "VHF Incident Response (IR) Federal Interoperability Channel Plan" and the "UHF Incident Response (IR) Federal Interoperability Channel Plan."

APPENDIX G: Connecticut Amateur Radio Emergency Service®

The Connecticut Amateur Radio Emergency Service® (CT ARES®) consists of licensed amateur radio operators (also called “hams”) who have voluntarily registered their qualifications and equipment for communications duty in the public service when disaster strikes. In addition to training in emergency communications, CT ARES® encourages its members to obtain NIMS/ICS training. Many members have emergency power for their radios and also have portable “Go Boxes” allowing them to provide HF/VHF/UHF communications in deployed locations.

The Connecticut Section Emergency Coordinator (SEC) oversees the District Emergency Coordinators (DEC) who coordinate the activities within their areas of responsibility. In Connecticut, the ARES® Districts conform to the boundaries of the state’s Department of Emergency Management and Homeland Security (DEMHS) five emergency management Regions. In addition to the Regional DECs, there is a DEC for SKYWARN who supports both ARES® and the National Weather Service (NWS) with reports of severe weather conditions from SKYWARN spotters throughout the state.

CT ARES® supports our Served Agencies (DEMHS, American Red Cross, local municipalities, etc.) by providing trained emergency communicators who can assist them in Emergency Operations Centers, local shelters, etc. Requests for CT ARES® assistance can be directed to local or Regional ARES® officials or to the DEMHS Regional Coordinator.

H.3 P25 Digital Codes

NAC – Network Access Codes

\$293 default NAC

\$F7E receiver will unsquelch with any incoming NAC

\$F7F a repeater with this NAC will allow incoming signals to be repeated with the NAC intact

TGID – Talkgroup ID

\$0001 default

\$0000 no-one, talkgroup with no users – used for individual call

\$FFFF talkgroup which includes everyone

Unit ID

\$000000 no-one – never associated with a radio unit

\$000001-\$98767F for general use

\$989680-\$FFFFFE for talkgroup use or other special purposes

\$FFFFFF designates everyone – used when implementing a group call with a TGID3

Appendix L Incident Command System (ICS) Communication Forms

This appendix contains forms for incident command system (ICS) planning. Due to the size of this document, these forms are not functional as is. If you don't have these forms available for your use, they can be found at the following website: http://training.fema.gov/EMIWeb/IS/ICSResource/ICSResCntr_Forms.htm

L.1 ICS 201 (TICP)

INCIDENT BRIEFING	1. INCIDENT NAME	2. DATE	3. TIME PREPARED
--------------------------	-------------------------	----------------	-------------------------

4. MAP SKETCH (NTS)

Function	Frequency or Talk Group Name	Assignment	Function	Frequency or Talk Group Name	Assignment
Command			Tactical		
			Tactical		
Tactical			Tactical		
Tactical					
Tactical			Staging		

S Staging Area Name

Number (H-1, etc.) and Name

Hazard (Identify type, e.g. power lines)

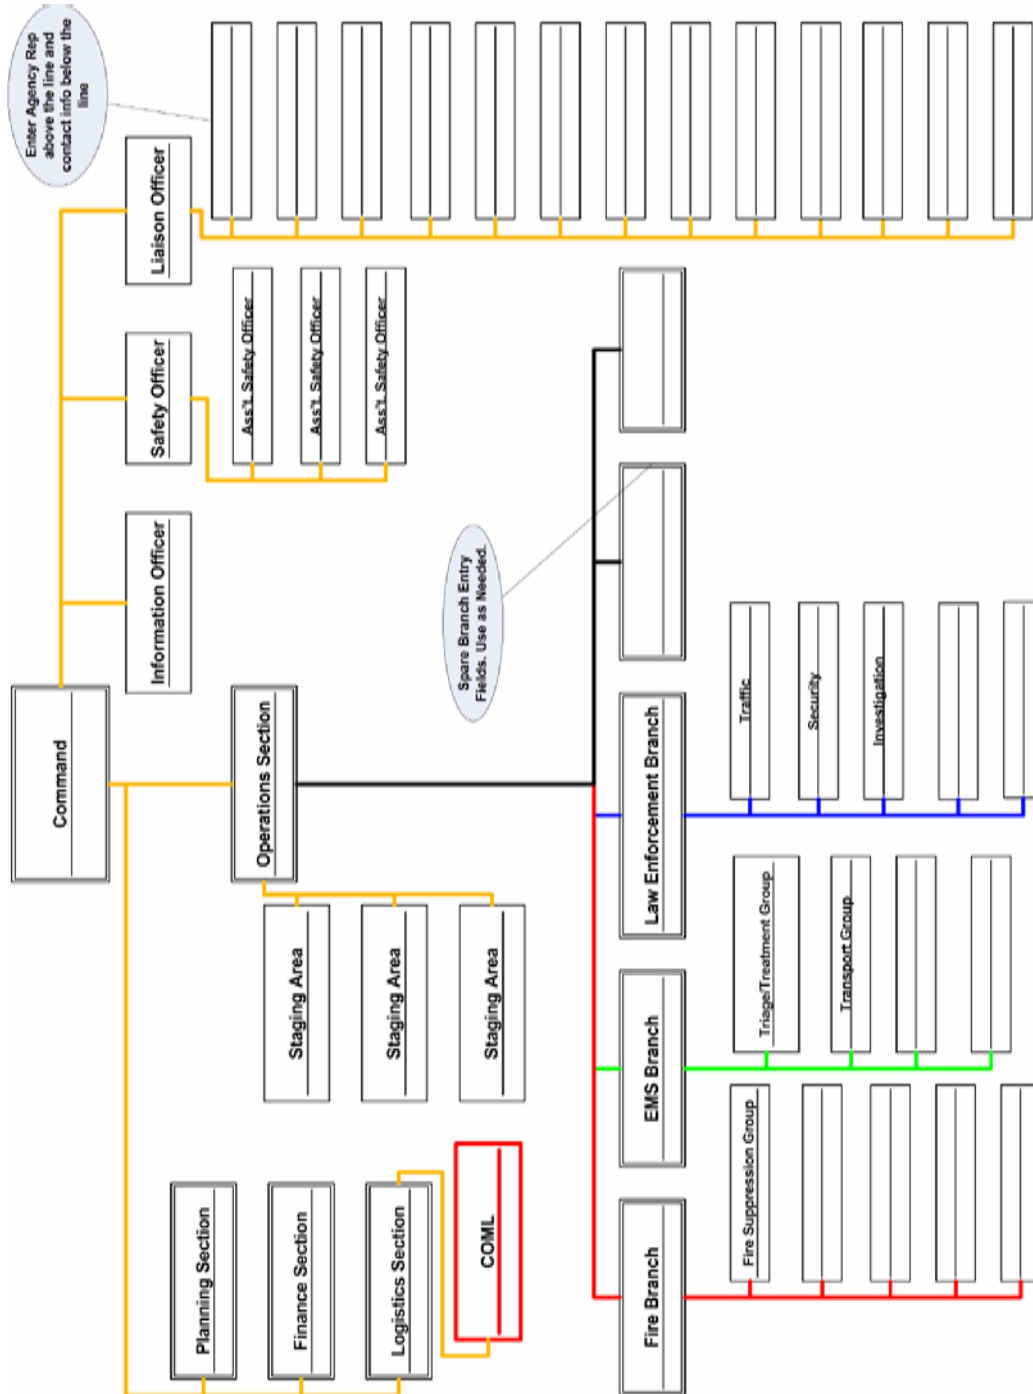

Camp Name

5. PREPARED BY (NAME AND POSITION)

7. CURRENT ORGANIZATION – Place name and contact information (talk group/channel name, numbers, etc.) below the dividing line.

L.2 ICS 201 (FEMA)

INCIDENT BRIEFING	1. Incident Name	2. Date Prepared	3. Time Prepared
4. Map Sketch			
ICS 201 Page 1 of 4	5. Prepared by (Name and Position)		

6. Summary of Current Actions

7. CURRENT ORGANIZATION – Place name and contact information (talk group/channel name, numbers, etc.) below the dividing line.

Instructions for Completing the Incident Briefing (ICS 201 Form)

ITEM #	ITEM TITLE	INSTRUCTIONS
1.	Incident Name	Print the name assigned to the incident.
2.	Date Prepared	Enter date prepared (month, day, year).
3.	Time Prepared	Enter time prepared (24-hour clock).
4.	Map Sketch	Show perimeter and control lines, resources assignments, incident facilities, and other special; information on a sketch map or attached to the topographic or orthophoto map.
5.	Resources Summary	Enter the following information about the resources allocated to the incident. Enter the number and type of resource ordered.
	Resources Ordered	Enter the number and type of resource ordered.
	Resource Identification	Enter the agency three letter designator, S/T, Kind/Type and resource designator.
	ETA/On Scene	Enter the estimated arrival time and place the arrival time or a checkmark in the "on scene" column upon arrival.
	Location/Assignment	Enter the assigned location of the resource and/or the actual assignment.
6.	Current Organization	Enter on the organization chart the names of the individuals assigned to each position. Modify the chart as necessary.
7.	Summary of Current Actions	Enter the name and position of the person completing the form.
8.	Prepared By	Enter name and position of the person completing the form.
*Note		Additional pages may be added to ICS Form 201 if needed.

Purpose: The Incident Briefing Form provides the Incident Commander (and the Command and General Staffs assuming command of the incident) with basic information regarding the incident situation and the resources allocated to the incident. It also serves as a permanent record of the initial response to the incident.

Preparation: The Incident Briefing Form is prepared by the Incident Commander for presentation to the incoming Incident Commander along with a more detailed oral briefing. Proper symbology should be used when preparing a map of the incident.

Distribution: After the initial briefing of the Incident Commander and General Staff members, the Incident Briefing Form is duplicated and distributed to the Command Staff, Section Chiefs, Branch Directors, Division/Group Supervisors, and appropriate Planning and Logistic Section Unit Leaders. The sketch map and summary of current action Resources Summary portion are given to the Resources Unit.

L.3 ICS 205

INCIDENT RADIO COMMUNICATIONS PLAN		1. Incident Name			2. Date / Time Prepared		3. Date / Time Prepared		
4. Basic Radio Channel Utilization									
Ch #	Function	Channel Name / Trunked Radio System Talk Group	Assignment	RX Freq N or W	RX Tone / NAC	TX Freq N or W	TX Tone / NAC	Mode	Remarks
1									
2									
3									
4									
5									
6									
5. Prepared by (Communications Unit)					Incident Location			Lat/Long	
					County				
<p><i>The convention calls for frequency lists to show four digits after the decimal place, followed by either an “N” or a “W”, depending on whether the frequency is narrow or wide band. Mode refers to either “A” or “D” indicating analog or digital (Project25)</i></p>									

Instructions for Completing the Incident Radio Communications Plan (ICS 205 Form)

ITEM #	ITEM TITLE	INSTRUCTIONS
1.	Incident Name	Print the name assigned to the incident.
2.	Date/Time Prepared	Enter date (month, day, year) and time prepared (24-hour clock).
3.	Operational Period Date/Time	Enter the date and time. Interval for which the Radio Communications Plan applies. Record the start time and end time and include date(s).
4.	Basic Radio Channel Utilization System/Cache	Enter the radio cache system(s) assigned and used on the incident (e.g., Boise Cache, FIREARMS, Region 5 Emergency Cache, etc).
	Channel Number	Enter the radio channel numbers assigned.
	Function	Enter the function each channel number is assigned (i.e., command, support, division tactical, and ground-to-air).
	Frequency	Enter the radio frequency tone number assigned to each specified function (e.g., 153.4000).
	Assignment	Enter the ICS organization assigned to each of the designated frequencies (e.g., Branch I, Division A).
	Remarks	This section should include narrative information regarding special situations
5.	Prepared By	Enter the name of the Communications Unit Leader preparing the form.

Purpose: The Incident Radio Communications Plan provides in one location information on all radio frequencies assignments for each operational period. The plan is a summary of information obtained from the Radio Requirement Worksheet (ICS Form 216) and the Radio Frequency Assignment Worksheet (ICS Form 217). Information from the Radio Communications Plan on frequency assignment is normally placed on the appropriate Assignment List (ICS Form 204).

Preparation: The Incident Radio Communications Plan is prepared by the Communications Unit Leader and given to the Planning Section Chief.

Distribution: The Incident Radio Communications Plan is duplicated and given to all recipients of the Incident Objectives form including the Incident Communications Center. Information from the plan is placed on Assignment List.

L.4 Incident Radio Communications Worksheet / Check-off Sheet

1. What type of Function is this radio net for?
 - a. Command – (Command/Control)
 - b. Tactical – (Fireground, SAR, SWAT)
 - c. Support – (Logistics, Supplies, Technicians)
 - d. Dispatch – (PSAP's, Mutual Aid Centers)
 - e. Air to Ground – (LMR or Aviation Channels)
 - f. Air to Air – (AM VHF/UHF Air Channel)
2. What Discipline(s) need to communicate?
 - a. Law Enforcement
 - b. Fire Services
 - c. Emergency Medical Services
 - d. Emergency Management
 - e. Health Care
 - f. Hazardous Materials
 - g. Public Safety Communications
 - h. Public Health
 - i. Public Works
 - j. Government Administrative
3. What type of Coverage is needed?
 - a. Worldwide
 - b. Nationwide
 - c. Statewide
 - d. Regional/County wide
 - e. City/Town wide
 - f. Local on-scene – direct/talk around
4. What types of Frequency bands are available?
 - a. HF – (3-30 MHz)
 - b. VHF Low Band – (30-50 MHz)
 - c. VHF High Band – (136-174 MHz)
 - d. UHF Band – (380-470 MHz)
 - e. UHF T-Band – (470-520 MHz)
 - f. UHF 700/800 MHz
 - g. Amateur Radio – (Specify which band)
 - h. Marine Radio – (VHF FM)
 - i. Aircraft Radio – (Specify VHF or UHF)
5. Are any Common Interop and/or mutual aid channels available for use?
 - a. National Interoperability Channels
 - b. State Interoperability Channels
 - c. County/Regional Interoperability Channels
 - d. Local City/Town Interoperability Channels

L.5 ICS 205A

Communications List (ICS 205A)

1. INCIDENT Name:	2. Operational Period: Date From: _____ Date To: _____ Time From: _____ Time To: _____	
3. Basic Local Communications Information		
Incident Assigned Position	Name (Alphabetized)	Method(s) of Contact (phone, pager, cell, etc)
4. Prepared by: Name: _____ Position/Title: _____ Signature _____		
ICS 205A	IA Page _____	Date/Time: _____

L.6 ICS 205A

Instructions for Completing the Communications List (ICS 205A Form)

ITEM #	ITEM TITLE	INSTRUCTIONS
1.	Incident Name	Enter the name assigned to the incident.
2.	Operational Period <ul style="list-style-type: none"> • Date and Time From • Date and Time To 	Enter the start date (month/day/year) and time (using the 24-hour clock) and end date and time for the operational period to which the form applies.
3.	Basic Local Communications Information	Enter the communications methods assigned and used for personnel by their assigned ICS position.
	• Incident Assigned Position	Enter the ICS organizational assignment
	• Name	Enter the name of the assigned person
	• Method(s) of Contact (phone, pager, cell, etc)	For each assignment, enter the radio frequency and contact number(s) to include the area code, etc. If applicable, include the vehicle license or ID number assigned to the vehicle for the incident (e.g., HAZMAT1, etc).
4.	Prepared by <ul style="list-style-type: none"> • Name • Position/Title • Signature • Date/Time 	Enter the name, ICS position, and signature of the person preparing the form. Enter date (month/day/year) and time prepared (24-hour clock).
	Assignment	Enter the ICS organization assigned to each of the designated frequencies (e.g., Branch I, Division A).
	Remarks	This section should include narrative information regarding special situations
5.	Prepared By	Enter the name of the Communications Unit Leader preparing the form.

Purpose: The Communications List (ICS 205A) records methods of contact for incident personnel. While the Incident Radio Communications Plan (ICS 205) is used to provide information on all radio frequencies down to the Division/Group level, the ICS 205A indicates all methods of contact for personnel assigned to the incident (radio frequencies, phone numbers, pager numbers, etc.), and functions as an incident directory.

Preparation: The ICS 205A can be filled out during check-in and is maintained and distributed by Communications Unit personnel. This form should be updated each operational period.

Distribution: The ICS 205A is distributed within the ICS organization by the Communications Unit, and posted as necessary. All completed original forms must be given to the Documentation Unit. If this form contains sensitive information such as cell phone numbers, it should be clearly marked in the header that it contains sensitive information and is not for public release.

Notes:

- The ICS 205A is an optional part of the Incident Action Plan (IAP)
- This optional form is used in conjunction with the ICS 205.
- If additional pages are needed, use a blank ICS 205A and repaginate as needed.

ADD ICS 214

L.7 ICS Form 217A

COMMUNICATIONS RESOURCE AVAILABILITY WORKSHEET ICS 217A					Frequency Band				Description	
Channel Configuration	Channel Name / Trunked Radio System Talk Group	Eligible Users	Mobile RX Freq	N / W	RX Tone / NAC	Mobile TX Freq	N / W	TX Tone / NAC	Mode A, D, or M	Notes

A=Analog, D=Digital, M=Mixed Mode; N=Narrowband, W=Wideband
The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25). All channels are shown as if programmed in a portable or mobile radio. Repeater and base stations must be programmed with the RX and TX reversed.

**Instructions for Completing the Radio Frequency Assignment Worksheet
(ICS 217 Form)**

ITEM #	ITEM TITLE	INSTRUCTIONS
1.	Incident Name	Print the name assigned to the incident.
2.	Date	Enter date (month, day, year) prepared.
3.	Operational Period	Enter the time interval for which the assignment applies. Record the start date/time and end date/time (e.g., 9/17/96-0600 to 9/18/96-0600).
4.	Incident Organization	List frequencies allocated for each channel for each organizational element activated, record the number of radios required to perform the designated function on the specified frequency.
5.	Radio Data	For each radio cache and frequency assigned, record the associated function. Functional assignment for: Command Support Division tactical Ground-to-air
6.	Agency	List the frequencies for each major agency assigned to the incident. Also list the function and channel number assigned.
7.	Total Radios Required	Total each column. This provides the number of radios required by each organizational unit. Also total each row which provides the number of radios using each available frequency.
8.	Prepared By	Enter the name and position of the person completing the worksheet.

Purpose: The Radio Frequency Assignment Worksheet is used by the Communications Unit Leader to assist in determining frequency allocation.

Preparation: Cache radio frequencies available to the incident are listed on the form. Major agency frequencies assigned to the incident should be added to the bottom of the worksheet.

Distribution: The worksheet, prepared by the Communications Unit, is for internal use.
