

Employment Club leads to Employment Services Success

PM attended Employment Club at Community Health Resources (CHR) in the beginning of 2016. He was then referred to Employment Services by his therapist. PM has his Bachelor's Degree and after graduating from college began his job search for the right job for him. However, PM found it difficult to obtain employment. He began Employment Services in March 2016, increasing his employment and job searching skills. He attended a job networking group on his own and received a job lead in April from the group, the job turned out to be a per-diem position. PM ended the position in May. Through a temp service, he was offered a full time job for a higher position in another company. He continues to maintain the job through the temp service with the hope of obtaining employment directly through the company.
