

DDS Legislative Advisory Committee

LON Sub Committee Meeting date: 4.23.2010

Members present: Co Chairs Joe Drexler DDS, Terry Macy representing Ct Nonprofits, Judy Dowd OPM, Peter Masson DDS, Deb Duval DDS, Mary Pat DeCarlo representing Ct Nonprofits & Stan Soby Oak Hill.

What is the Focus of your meeting/discussions?

In this meeting we addressed two issues: 1.) exploring the complex results of LON scores across disability groups and 2.) Investigating rate setting systems across the country through web surveys.

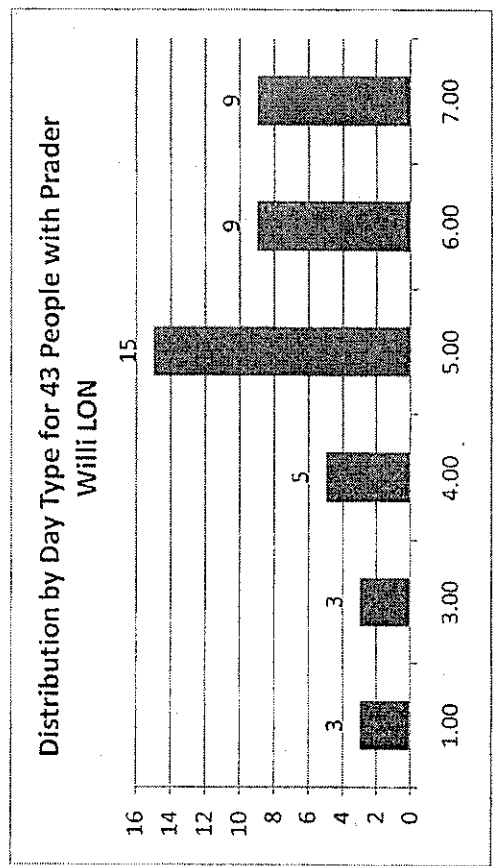

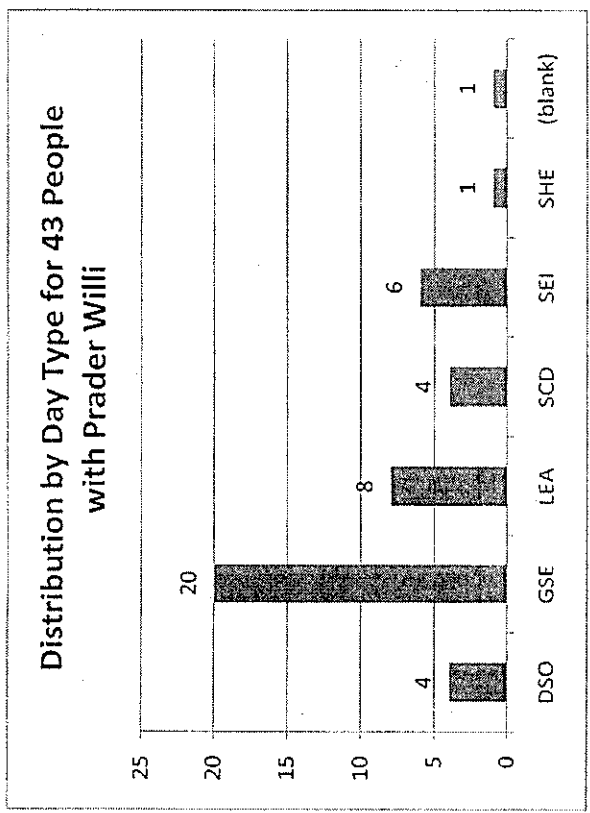

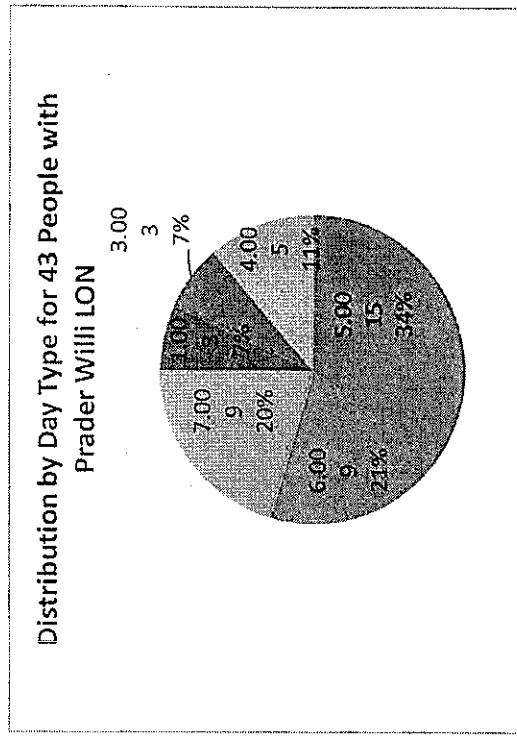

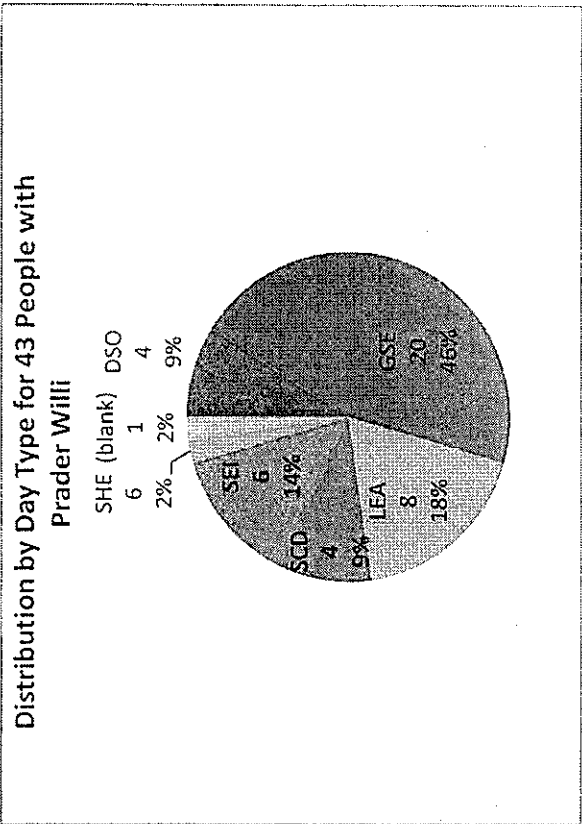

What actions have been taken to date?

- 1.) The committee reviewed LON data provided by Joe Drexler. The analysis included LON scores distributed by age ranges, and LON levels and across multiple disability groups including Prader Willi, Down Syndrome, autism, spina bifida, blind, deaf and dementia. Some additional review of the comparisons and contrasts of these data sets is planned.
- 2.) A list of states was chosen to review by way of a web survey. These included Illinois, Arizona, Nebraska, Oregon, Colorado and Minnesota. Each member of the committee picked one of these looking at a variety of issues relating to their rate setting systems. Reports were provided for Illinois, Nebraska, and Colorado thus far. Analysis of all the states data will be conducted when all the information is collected.

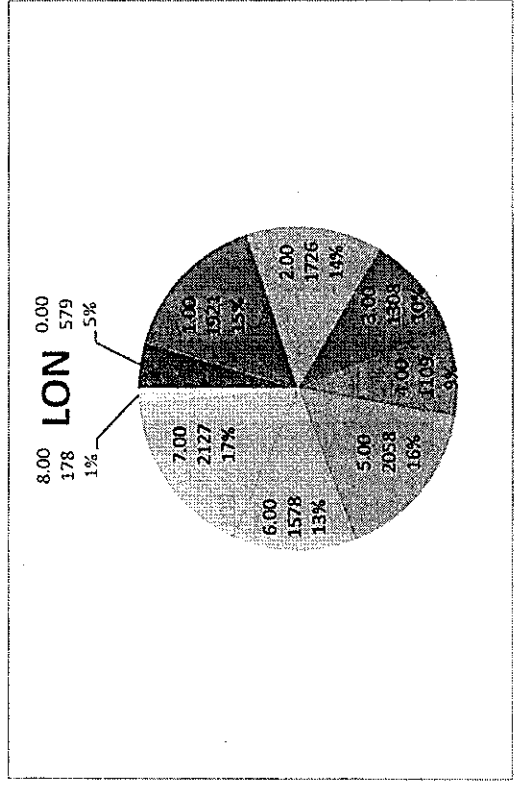

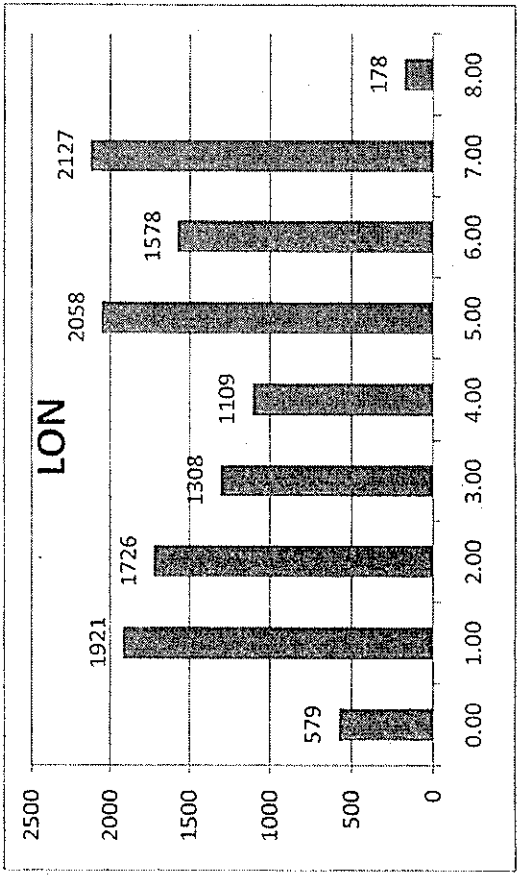

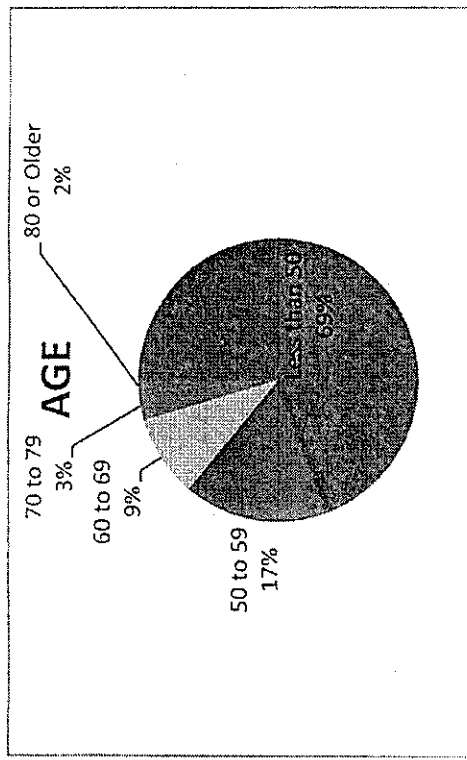

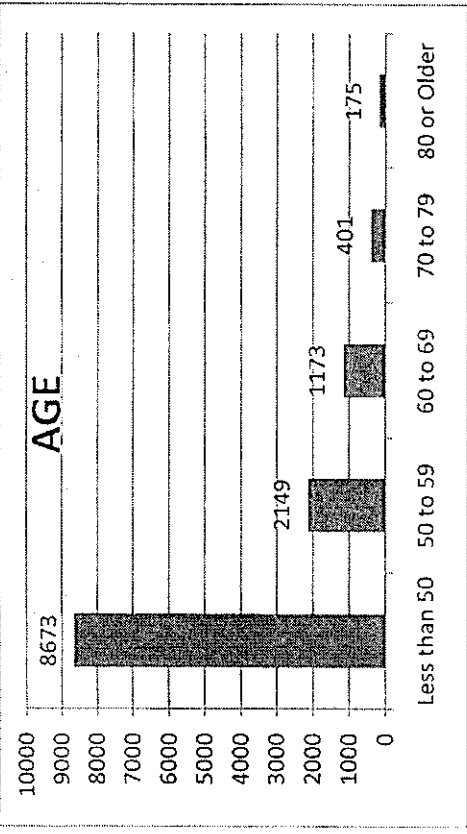

Future Actions?

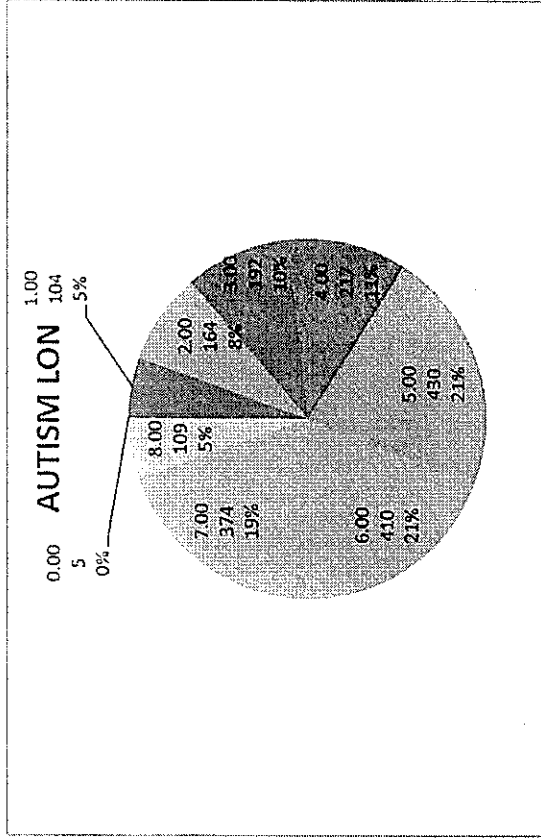

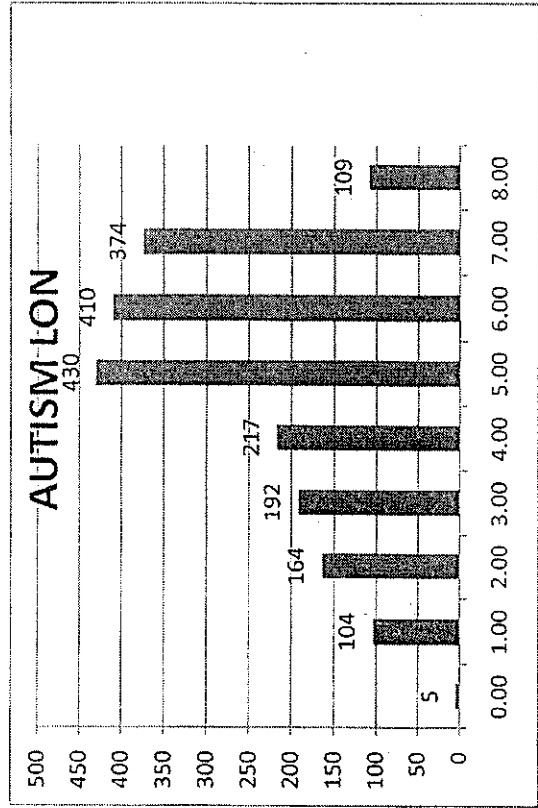

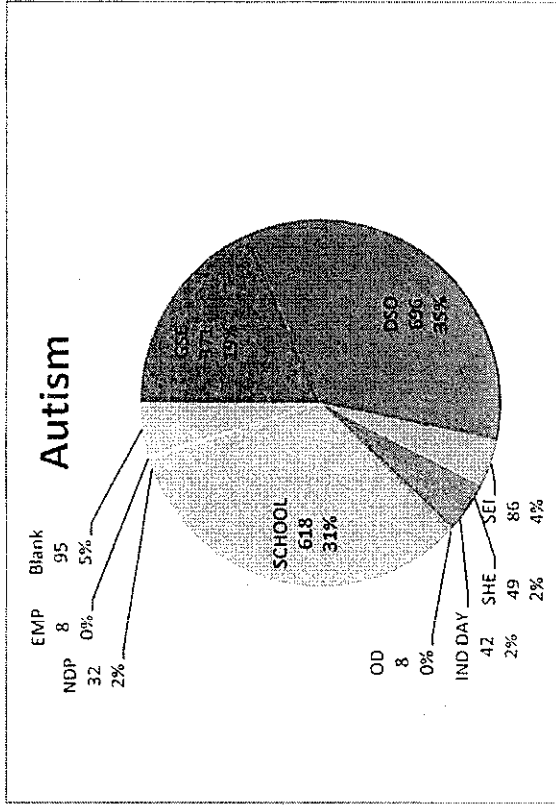

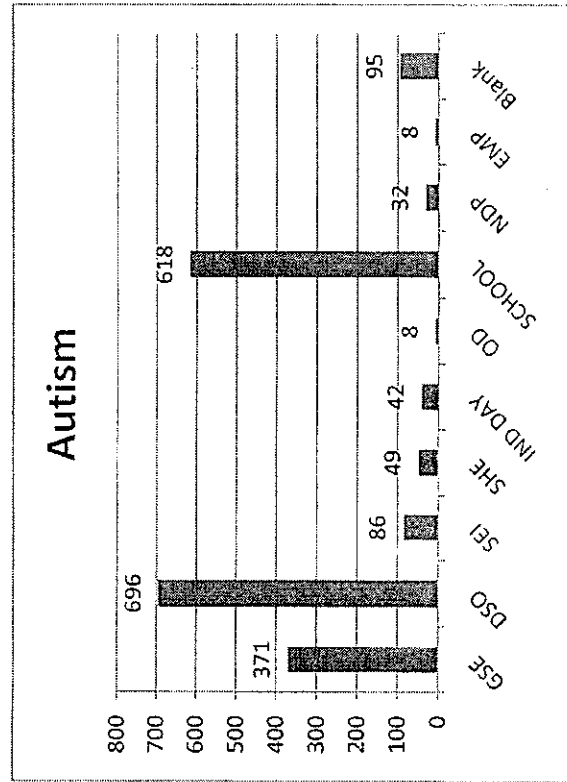

The committee will continue with LON and rate setting data collection and begin a discussion of how actual rates are developed through LON measures.

Our next meeting is scheduled for Friday May 14 at 1:30 at Ct Non Profits. The Committee has been meeting the 2nd and 4th Friday of each month.
