

I'm writing to give my recommendation for the future of the campus at Southbury Training School.

I think the campus would be an excellent place for respite housing. It would help numerous families who presently have loved ones on the DDS waiting list. As you know some of these people have been on this list for a very long time. Their families often times have no choice but to deal with difficult circumstances on their own .Respite housing would greatly help these families in need by giving them some much needed help.

My second recommendation would be for the campus to serve as an emergency temporary placement for clients in our state. In the event of an emergency situation – clients would have a place to reside until permanent placer could be provided.

Thank you

Matt Tambling
