Subject: Bridge Street Bridge in Westport CT

Dear DOT committee,

I am a resident of Westport CT. My main concern is the safety of our residents and those who use the roads and bridges in Westport. I think it is a mistake to try and shore up this bridge that was designed for cars from a bygone era. We should take the opportunity and the federal funds to build a bridge that meets the demands of today's vehicles and try to ease congestion with with a roundabout or some other form or better traffic management. Perhaps a new taller bridge can dump traffic out towards the train station and bypassing the light?

Many people want to save the bridge so they can avoid the possibility of tractor trailers crossing the new bridge. While I would prefer to keep that kind of traffic off the local roads, safety and sustainability are my main concerns.

Concerned Resident,

Glenn Gans
