

**Department of Transportation
Project No. 40-132
Replacement of Bridge No. 05467
Route 151 Over the Moodus River
East Haddam**

**September 25, 2008, 7:00 p.m.
Grange Hall
488 Town Street
East Haddam**

Minutes

Presentation:

- There were 12 attendees from the General Public
- The Department presented the Preliminary Design proposal to the attendees.
- The project consists of replacing the current deteriorating existing metal structure with a concrete bridge. The new structure would have twice the hydraulic capacity as the existing structure.
- Surface storm water drainage currently flowing into the Moodus River would be re-channeled to flow into the Moodus River north of its current location.
- The proposed commencement time for construction would be Spring of 2009. The road would be closed during construction and traffic would be detoured.

Public Comments and Questions:

- The potential conflict of proposed drainage facilities with drains and septic systems on adjacent property.
- Business access during construction.
- Relocation of the William Nichols Memorial Monument

Adjournment: 7:40 p.m.
