

**SECTION 5.09
WELDED STUDS**

5.09.01--Description: Under this item the Contractor shall furnish and install studs, exclusive of studs used as shear connectors, of the type, detail, size and quantity shown on the plans.

5.09.02--Materials: Steel for the studs shall conform to the requirements of Subarticle M.06.02-12.

5.09.03--Construction Methods: The installation of welded studs shall be in accordance with the requirements of Article 5.08.03.

5.09.04--Method of Measurement: Studs will be measured as units, in place, and acceptable to the Engineer.

5.09.05--Basis of Payment: This work will be paid for at the contract unit price each for "Welded Studs," complete in place, which price shall include all materials, equipment, tools and labor incidental thereto. Welded studs used as shear connectors shall be paid for in accordance with the provisions of Section 5.08.
