FTA ALTERNATIVES ANALYSIS
DRAFT/FINAL ENVIRONMENTAL IMPACT STATEMENT

# DANBURY BRANCH IMPROVEMENT PROGRAM TASK 5

## ENVIRONMENTAL TECHNICAL MEMORANDUM

STATE PROJECT 302-008

SECTION 13: HAZARDOUS CONTAMINATION

AUGUST 2009

# SECTION 13. HAZARDOUS CONTAMINATION

## ENVIRONMENTAL DATA COLLECTION AND EVALUATION METHODOLOGY

### Scope and Purpose

URS has completed a technical report of readily available environmental database references to identify and evaluate listed hazardous/contaminated locations that may pose potential risks to site development within the study corridor.[1] The study corridor is defined as 1,000 feet in width as measured 500 feet on each side of the Danbury Branch rail right-of-way centerline from South Norwalk station to New Milford center. The objective of environmental data collection and evaluation is to determine the relative environmental risk associated with land uses in the vicinity of the alternatives being considered in the study corridor in order to estimate the likelihood for each study alternative to encounter discharge, spillage, uncontrolled loss, seepage, or filtration of hazardous wastes, contaminated materials, or other regulated substances.

### Methodology

Study Area Corridor

The study area corridor for this section was defined as a minimum of 100 feet and a maximum of 500 feet from the track centerline on both sides of the existing railroad right-of-way between South Norwalk and New Milford. For purposes of screening relevance based on spatial relationships from the track centerline, listed database sites were sorted by distance from the track centerline on both sides of the existing right-of-way using the following corridor subareas:

- 100 feet from the track centerline on both sides of the existing railroad right-of-way or an approximate distant of 0.02 mile;
- 250 feet from the track centerline on both sides of the existing railroad right-of-way or an approximate distant of 0.05 mile; and
- 500 feet from the track centerline on both sides of the existing railroad right-of-way or an approximate distant of 0.10 mile.

Environmental Database Search

URS conducted a database search of the corridor study area and identified locations listed in various databases. Target property searches of the environmental databases were initially organized into 14 Orthophoto Base Maps (URS, GIS Mapping, 2009).

The following table summaries the organization of the environmental database results for the target property searches along the study corridor:

[1] Database report results are divided into sections that match the basis of the areas covered on the 14 ConnDOT Orthophoto Base Maps (scale: one inch = 1,000 feet). These sheets precede the appendices of this section.

| Orthophoto Base Map Radius Report Coverage | Railroad Station | File Name | Railroad Milepost Marker |
|---|---|---|---|
| Norwalk - Water Street to Main Street | South Norwalk | Danbury Branch Sheet 1 | 0, 1, 2 |
| Norwalk - New Canaan Avenue | Merritt 7 | Danbury Branch Sheet 2 | 3, 4, 5 |
| Wilton - Fawn Ridge Lane to South of School Road | Wilton | Danbury Branch Sheet 3 | 6, 7 |
| Wilton - South of School Road to East of Indian Rock Place | Cannondale | Danbury Branch Sheet 4 | 8, 9, 10 |
| Wilton - East of Indian Rock Place to South of Ethan Allen Highway | Branchville | Danbury Branch Sheet 5 | 11, 12, 13 |
| Redding - South of Ethan Allen Highway to Picketts Ridge Road | None | Danbury Branch Sheet 6 | 14, 15 |
| Redding - Picketts Ridge Road to West of Turkey Plain Road | Redding | Danbury Branch Sheet 7 | 16, 17, 18 |
| Bethel - West of Turkey Plain Road to Passway Road | Bethel | Danbury Branch Sheet 8 | 19, 20, 21 |
| Danbury - South Street intersection to Junction of Route 6 | Danbury | Danbury Branch Sheet 9 | 22, 23, 24, 25, 26 |
| Danbury - Junction of Route 6 to Junction Road | Proposed Danbury North | Danbury Branch Sheet 10 | 27, 28 |
| Brookfield - Junction Road to Prospect Court | None | Danbury Branch Sheet 11 | 29, 30, 31 |
| Brookfield - ~ Prospect Court to West of Morey Road | Proposed Brookfield | Danbury Branch Sheet 12 | 32, 33 |
| Brookfield - West of Morey Road to Southeast of Pickett District Road | None | Danbury Branch Sheet 13 | 34, 35, 36 |
| Brookfield - Southeast of Pickett District Road to End of Project | Proposed New Milford | Danbury Branch Sheet 14 | 37, 38, 39 |

The environmental database search consisted of a review of local and state record fields to identify relevant preliminary sites/incidents within the 1,000 foot study corridor. Database[2] references included the following sources:

- *USEPA Comprehensive Environmental Response Compensation and Liability Information System* (CERCLIS) - Database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL.

- *USEPA Resource Conservation and Recovery Information System Sites* (RCRA COR ACT) - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and

[2] Environmental FirstSearch™ Database Reports, Prepared for URS Corporation, July 17, 2008.

inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies then pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984. RCRAInfo facilities that have reported violations are subject to corrective actions.

- *USEPA Resource Conservation and Recovery Information System Treatment, Storage, and Disposal Facilities* (RCRA TSD) - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies then pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984. Facilities that treat, store, dispose, or incinerate hazardous waste.

- *USEPA/CTDEP Resource Conservation and Recovery Information System Generators* (RCRA GEN) - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies then pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984. Facilities that generate or transport hazardous waste or meet other RCRA requirements.

- *USEPA Emergency Response Notification System Database of incidents reported to the National Response Center* (ERNS) - These incidents include chemical spills, accidents involving chemicals (such as fires or explosions), oil spills, transportation accidents that involve releases of oil or chemicals sightings of oil sheens on bodies of water, terrorist incidents involving chemicals, incidents where illegally dumped chemicals have been found, and drills intended to prepare responders to handle these kinds of incidents. Data since January 2001 has been received from the National Response System database as the EPA no longer maintains this data.

- *CTDEP Emergency Response Actions and Spill Releases* (State Spills) - Database of oil and chemical spills that includes discharger, reporter, date of release, cause of incident, and emergency measurement information.

- *CTDEP Leaking Underground Storage Tanks* (LUST) - Database of leaking USTs of data reported that includes actions, agency, class, and media affected.

- *CTDEP Registered Underground Storage Tanks* (UST) - Database of registered underground storage tanks. The data includes capacity, substance stored, status, tank material, and piping material.

- *Sanborn Insurance Maps* – These maps provide standard historical sources of pertinent information from building records that encompass properties and/or regional areas originally produced for private fire insurance map companies during specified dates.

- *Aerial Photographs* - These maps provide standard historical sources of pertinent information that comprise photographs taken from an aerial platform during specified dates with adequate resolution to allow identification of land surface development and site land use activities encompassing a property and/or regional areas.

Screening of Sites for Potential Risk of Contamination

The resultant list of database sites/incident locations initially identified within the 1,000 foot study area were screened and identified as posing a degree of potential risk of contamination that may be encountered during construction of various alternatives under consideration (electrification, alignments, stations, passing sidings). These listed sites/incidents were then further evaluated and classified based on probable level of site complexity and proximity to the rail centerline as posing a potential "*Low*", "*Moderate*" or "*High*" risk of contamination.

Risk evaluation criteria included the following:

- Probable level of site contamination complexity based on interpretation of database listing type, number of multiple database listings for the same location, and quality of database report information;
- Identified business name and probable type of manufacturing operation;
- Proximity to the rail centerline; and
- Proximity to existing or proposed railroad stations.

"*Low*" risk sites were deleted as sites of environmental interest if evaluation of database information suggested that they would pose no risk if encountered during construction of various alternatives. "*Moderate*" or "*High*" risk sites were identified as sites of interest if evaluation of database information suggested that they would pose a potential risk of contamination if encountered during construction of various alternatives.

Historic Fire Insurance Maps

These maps provide standard historical sources of pertinent information from building records that encompass properties and/or regional areas originally produced for private fire insurance map companies during specified dates. Historic Fire Insurance Maps dating from 1884 to 1973 for 1,000 Foot Study Corridor were evaluated.

Evaluation criteria included the following:

- Interpretation of mapped historical industrial and/or commercial buildings and structural features, listed business names and notations suggestive of probable type of manufacturing operation, chemical usage, and potential nature of site contamination complexity;
- Historical duration and recurrence of recognized relevant mapped historical land use patterns;
- Proximity to the rail centerline; and
- Proximity to existing or proposed railroad stations.

Historic Aerial Photographs

These maps provide standard historical sources of pertinent information that comprise photographs taken from an aerial platform during specified dates with adequate resolution to allow identification of land surface development and site land use activities encompassing a property and/or regional areas. Historic Aerial Photographs dated 1944, 1959, 1970 and 1985 were divided into 25 photo quadrangle sections for the 1,000 foot study corridor delineated on the Orthophoto Base Maps - Sheets No. 1 through No. 14.

## ENVIRONMENTAL DATABASE FINDINGS

### Sheet No. 1 – Norwalk Corridor Area

Sheet No. 1 ("Norwalk") corridor study coverage area extends approximately 2.3 miles from the South Norwalk Railroad Station north to the railroad crossing at New Canaan Avenue and Main Street (State Route 7). This corridor extends from Railroad Milepost Marker "0" to 2,000 feet north of Railroad Milepost Marker "2".

Identified Database Sites: 106 sites. Potential Risk of Contamination Sites: 44 sites.

| **POTENTIAL RISK OF CONTAMINATION SITES** | | | |
|---|---|---|---|
| Distance from Track Centerline | Potential Risk of Contamination Sites | Moderate Risk Sites | High Risk Sites |
| **0 to 100 feet** | **9** | 3 | 6 |
| **100 to 250 feet** | **11** | 4 | 7 |
| **250 to 500 feet** | **24** | 10 | 14 |
| Total | **44** | 17 | 27 |

The Norwalk corridor study area is a densely developed urbanized area with historical industrial and commercial land uses. Along the 2.3 mile coverage area, environmental database reports initially identified 106 sites. The distribution of mapped locations is fairly consistent along the entire corridor. These listed sites/incidents were further evaluated and classified based on probable level of site complexity and proximity to the rail centerline as posing a potential "*Low*", "*Moderate*" or "*High*" risk of contamination. Based on the risk evaluation criteria, 44 "*Moderate*" or "*High*" risk sites were identified as having documented environmental conditions that pose potential impacts to proposed construction activities.

Potential "Risk of Contamination Sites" within the study corridor are plotted with a unique Map Identification Number on the radius search maps included with the environmental database reports in Appendix A. Detailed database information for a specific mapped site is included with the Target Property Site Detail Database Reports which correspond to the Orthophoto Base Map for this section. The moderate and high risk sites identified within the study corridor are identified in the table below:

| Distance From Track Centerline | Moderate Risk Sites MAP ID Number | High Risk Sites MAP ID Number |
|---|---|---|
| **0 to 100 feet** | 1-2, 1-3 and 1-9 | 1-1, 1-4, 1-5, 1-6, 1-7 and 1-8 |
| **100 to 250 feet** | 1-11, 1-14, 1-18 and 1-20 | 1-10, 1-12, 1-13, 1-15, 1-16, 1-17 and 1-19 |
| **250 to 500 feet** | 1-21, 1-23, 1-25, 1-27, 1-28, 1-30, 1-36, 1-38, 1-39 and 1-42 | 1-22, 1-24, 1-26, 1-29, 1-31, 1-32, 1-33, 1-34, 1-35, 1-37, 1-40, 1-41, 1-43 and 1-44 |

As detailed database reports indicate, documented environmental conditions and incidents include underground fuel oil and gasoline storage tank leaks and associated soil removals, soil and groundwater contamination, railroad locomotive diesel fuel tank punctures and line spills, waste oil dumping, leaking drums of motor oil, large quantities of hazardous waste generation of metals and solvents, numerous underground gasoline storage tank removals and abandonment in-place projects, listed CERCLIS sites,[3] and discharge of metals and industrial solvents.

**Sheet No. 2 – Norwalk/Wilton Corridor Area**

Sheet No. 2 ("Norwalk/Wilton") corridor study coverage area extends approximately 2.3 miles from the railroad crossing at Broad Street and Main Street (State Route 7) north to the railroad crossing at Kent Road and Main Street. This corridor extends from 3,000 feet south of Railroad Milepost Marker "2" north to Railroad Milepost Marker "5". The Merritt 7 Railroad Station on Glover Avenue is located 1,500 feet south of Railroad Milepost Marker "4" and 1,500 feet north of the intersection of Routes 15 and 7.

Identified Database Sites: 105 sites. Potential Risk of Contamination Sites: 36 sites.

| **POTENTIAL RISK OF CONTAMINATION SITES** | | | |
|---|---|---|---|
| Distance from Track Centerline | Potential Risk of Contamination Sites | Moderate Risk Sites | High Risk Sites |
| **0 to 100 feet** | **5** | 1 | 4 |
| **100 to 250 feet** | **20** | 7 | 13 |
| **250 to 500 feet** | **11** | 4 | 7 |
| Total | **36** | 12 | 24 |

The Norwalk/Wilton corridor study area exhibits patterns consistent with the previous section. This area is characterized by a densely developed urbanized area with historical industrial and commercial land uses. Along the 2.3 mile coverage area, the environmental database reports

[3] Northeast Utilities, Harbor Avenue, Norwalk, Connecticut and Norwalk Landfill.

initially identified 105 sites. The distribution of mapped locations is fairly consistent along the entire urbanized study corridor. These listed sites/incidents were further evaluated and classified based on probable level of site complexity and proximity to the rail centerline as posing a potential "*Low*", "*Moderate*" or "*High*" risk of contamination. Based on the risk evaluation criteria, 36 *"Moderate*" or "*High*" risk sites were identified as having documented environmental conditions that pose potential impacts to proposed construction activities.

Potential "Risk of Contamination Sites" within the study corridor are plotted with a unique Map Identification Number on the radius search maps included in Appendix A. Detailed database information for a specific mapped site is included with the Target Property Site Detail Database Reports which correspond to the Orthophoto Base Map for this section. The moderate and high risk sites identified within the study corridor are identified in the table below:

| Distance From Track Centerline | Moderate Risk Sites MAP ID Number | High Risk Sites MAP ID Number |
|---|---|---|
| **0 to 100 feet** | 2-2 | 2-1, 2-3, 2-4 and 2-5 |
| **100 to 250 feet** | 2-6, 2-7, 2-8, 2-10, 2-20, and 2-21 | 2-9, 2-11, 2-12, 2-13, 2-14, 2-15, 2-16, 2-17, 2-18, 2-19, 2-22, 2-23, 2-24 and 2-25 |
| **250 to 500 feet** | 2-28, 2-31, 2-33 and 2-36 | 2-26, 2-27, 2-29, 2-30, 2-32, 2-34 and 2-35 |

As detailed database reports also indicate, documented environmental conditions and incidents include underground fuel oil and gasoline storage tank leaks and associated soil removals, soil contamination, leaking drums of waste oil, large quantities of hazardous waste generation of metals and solvents, numerous underground gasoline storage tank removals, listed CERCLIS sites,[4] and discharge of metals and industrial solvents.

**Sheet No. 3 – Wilton Corridor Area**

Sheet No. 3 ("Wilton") corridor study coverage area extends approximately 2.3 miles from the railroad crossing at Kent Road and Main Street north to the intersection of Station Road and Danbury Road (State Route 7) at the Wilton Railroad Station. This corridor extends from Railroad Milepost Marker "5" to 1,000 feet south of Railroad Milepost Marker "8".

Identified Database Sites: 22 sites. Potential Risk of Contamination Sites: 5 sites.

| **POTENTIAL RISK OF CONTAMINATION SITES** | | | |
|---|---|---|---|
| Distance from Track Centerline | Potential Risk of Contamination Sites | Moderate Risk Sites | High Risk Sites |
| **0 to 100 feet** | **0** | 0 | 0 |
| **100 to 250 feet** | **2** | 1 | 1 |
| **250 to 500 feet** | **3** | 1 | 2 |
| Total | **5** | 2 | 3 |

[4] Norwalk Powdered Metals, Muller Industrial Park, Perkin Elmer Chrom Division, 761 Main St. and Matheis Court Property, 270 Main St., Norwalk, Connecticut.

The Wilton corridor study area exhibits clusters of potential contaminated sites. This area is characterized by a mix of undeveloped and urbanized land uses consisting of isolated historical industrial and commercial activities. Along the 2.3 mile coverage area, the environmental database reports initially identified 22 sites. The mapped locations are clustered in isolated areas in the south, middle and north sections of the study corridor. These listed sites/incidents were further evaluated and classified based on probable level of site complexity and proximity to the rail centerline as posing a potential "*Low*", "*Moderate*" or "*High*" risk of contamination. Based on the risk evaluation criteria, five "*Moderate*" or "*High*" risk sites were identified as having documented environmental conditions that pose potential impacts to proposed construction activities.

Potential "Risk of Contamination Sites" within the study corridor are plotted with a unique Map Identification Number on the radius search maps included with the environmental database reports in Appendix A. Detailed database information for a specific mapped site is included with the Target Property Site Detail Database Reports which correspond to the Orthophoto Base Map for this section. The moderate and high risk sites identified within the study corridor are identified in the table below:

| Distance From Track Centerline | Moderate Risk Sites MAP ID Number | High Risk Sites MAP ID Number |
|---|---|---|
| **0 to 100 feet** | *None* | *None* |
| **100 to 250 feet** | 3-1 | 3-2 |
| **250 to 500 feet** | 3-3 | 3-4 and 3-5 |

As detailed database reports also indicate, documented environmental conditions and incidents include commercial cleaners, underground fuel oil and gasoline storage tanks, terminals and small UST leaks. There are no reported significant incidents indicating soil or groundwater contamination, other than potential unknown subsurface conditions at tank storage sites.

**Sheet No. 4 – Wilton/Weston Corridor Area**

Sheet No. 4 ("Wilton/Weston") corridor study coverage area extends approximately 2.3 miles north from the intersection of Station Road and Danbury Road (State Route 7) at Wilton Station. This corridor extends from 1,000 feet south of Railroad Milepost Marker "8" to 2,500 feet north of Railroad Milepost Marker "10". The Cannondale Railroad Station is located 500 feet south of Railroad Milepost Marker "9" Cannon Road.

Identified Database Sites: 26 sites. Potential Risk of Contamination Sites: 7 sites.

| **POTENTIAL RISK OF CONTAMINATION SITES** | | | |
|---|---|---|---|
| Distance from Track Centerline | Potential Risk of Contamination Sites | Moderate Risk Sites | High Risk Sites |
| **0 to 100 feet** | **0** | 0 | 0 |
| **100 to 250 feet** | **1** | 1 | 0 |
| **250 to 500 feet** | **6** | 1 | 5 |
| Total | **7** | 2 | 5 |

The Wilton/Weston corridor study area exhibits clusters of potential contaminated sites similar to land use patterns of the previous section. This area is characterized by a mix of undeveloped and urbanized land uses consisting of isolated historical industrial and commercial activities along the corridor. Along the 2.3 mile coverage area, the environmental database reports initially identified 26 sites. The mapped locations are clustered in isolated areas in the south and north sections of the study corridor. These listed sites/incidents were further evaluated and classified based on probable level of site complexity and proximity to the rail centerline as posing a potential "*Low*", "*Moderate*" or "*High*" risk of contamination. Based on the risk evaluation criteria, seven "*Moderate*" or "*High*" risk sites were identified as having documented environmental conditions that pose potential impacts to proposed construction activities.

Potential "Risk of Contamination Sites" within the study corridor are plotted with a unique Map Identification Number on the radius search maps included with the environmental database reports in Appendix A. Detailed database information for a specific mapped site is included with the Target Property Site Detail Database Reports which correspond to the Orthophoto Base Map for this section. The moderate and high risk sites identified within the study corridor are identified in the table below:

| Distance From Track Centerline | Moderate Risk Sites MAP ID Number | High Risk Sites MAP ID Number |
|---|---|---|
| **0 to 100 feet** | *None* | *None* |
| **100 to 250 feet** | 4-1 | *None* |
| **250 to 500 feet** | 4-7 | 4-2, 4-3, 4-4, 4-5 and 4-6 |

As detailed database reports indicate, documented environmental conditions and incidents primarily include underground fuel oil and gasoline storage tanks. There are reported significant incidents indicating soil or groundwater contamination from tank storage sites.

**Sheet No. 5 - Wilton/Weston/Ridgefield/Redding Corridor Area**

Sheet No. 5 ("Wilton/Weston/Ridgefield/Redding") corridor study coverage area extends approximately 2.3 miles north from the railroad crossing at Mather Street (2,500 feet south of Railroad Milepost Marker "11") north to Railroad Milepost Marker "13" to the Branchville Railroad Station near the Redding town boundary.

Identified Database Sites: 26 sites. Potential Risk of Contamination Sites: 8 sites.

| **POTENTIAL RISK OF CONTAMINATION SITES** | | | |
|---|---|---|---|
| Distance from Track Centerline | Potential Risk of Contamination Sites | Moderate Risk Sites | High Risk Sites |
| **0 to 100 feet** | **3** | 0 | 3 |
| **100 to 250 feet** | **4** | 1 | 3 |
| **250 to 500 feet** | **1** | 1 | 0 |
| Total | **8** | 2 | 6 |

The Wilton/Weston/Ridgefield/Redding corridor study area exhibits land use patterns similar to those of the previous section. This area is primarily characterized by undeveloped tracts and isolated historical industrial and commercial activities between Redding Road and North Main Street at Factory Pond. Along the 2.3 mile coverage area, the environmental database reports initially identified 26 sites. The locations are clustered in isolated areas in the south and north sections of the study corridor. These listed sites/incidents were further evaluated and classified based on probable level of site complexity and proximity to the rail centerline as posing a potential "*Low*", "*Moderate*" or "*High*" risk of contamination. Based on the risk evaluation criteria, eight *"Moderate*" or "*High*" risk sites were identified as having documented environmental conditions that pose potential impacts to proposed construction activities.

Potential "Risk of Contamination Sites" within the study corridor are plotted with a unique Map Identification Number on the radius search maps included with the environmental database reports in Appendix A. Detailed database information for a specific mapped site is included with the Target Property Site Detail Database Reports which correspond to the Orthophoto Base Map for this section. The moderate and high risk sites identified within the study corridor are identified in the table below:

| Distance From Track Centerline | Moderate Risk Sites MAP ID Number | High Risk Sites MAP ID Number |
|---|---|---|
| **0 to 100 feet** | *None* | 5-1, 5-2 and 5-3 |
| **100 to 250 feet** | 5-6 | 5-4, 5-5 and 5-7 |
| **250 to 500 feet** | 5-8 | *None* |

As detailed database reports indicate, documented environmental conditions and incidents primarily include underground fuel oil and gasoline storage tanks. There are reported significant incidents indicating soil or groundwater contamination from underground tank leaks requiring remediation, enforcement actions and unspecified rail spill reports.[5]

**Sheet No. 6 - Ridgefield/Redding Corridor Area**

Sheet No. 6 ("Ridgefield/Redding") corridor study coverage area extends approximately 2.3 miles north of Railroad Milepost Marker "13" near the Branchville Railroad Station at the Redding town boundary to Umpawaug Pond which is 1,500 feet south of Railroad Milepost Marker "16".

Identified Database Sites: 9 sites. Potential Risk of Contamination Sites: 2 sites.

| **POTENTIAL RISK OF CONTAMINATION SITES** | | | |
|---|---|---|---|
| Distance from Track Centerline | Potential Risk of Contamination Sites | Moderate Risk Sites | High Risk Sites |
| **0 to 100 feet** | **2** | 2 | 0 |
| **100 to 250 feet** | **0** | 0 | 0 |
| **250 to 500 feet** | **0** | 0 | 0 |
| Total | **2** | 0 | 0 |

[5] Spills are identified under Metro North Rail Lines.

In contrast to land use patterns in Wilton and Norwalk, the Ridgefield/Redding corridor study area exhibits no identified clusters of potential contaminated sites. This area is primarily characterized by undeveloped tracts with a small localized area of historical industrial activity on the westside of the rail centerline on Ethan Allen Highway (State Route 7). This isolated area is 1,000 feet south of Railroad Milepost Marker "14". Along the 2.3 mile coverage area, the environmental database reports initially identified nine sites. The mapped locations are located in the isolated area described above. These listed sites/incidents were further evaluated and classified based on probable level of site complexity and proximity to the rail centerline as posing a potential "*Low*", "*Moderate*" or "*High*" risk of contamination. Based on the risk evaluation criteria, two *"Moderate*" or "*High*" risk sites were identified as having documented environmental conditions that pose potential impacts to proposed construction activities.

Potential "Risk of Contamination Sites" within the study corridor are plotted with a unique Map Identification Number on the radius search maps included with the environmental database reports in Appendix A. Detailed database information for a specific mapped site is included with the Target Property Site Detail Database Reports which correspond to the Orthophoto Base Map for this section. The moderate and high risk sites identified within the study corridor are identified in the table below:

| Distance From Track Centerline | Moderate Risk Sites MAP ID Number | High Risk Sites MAP ID Number |
|---|---|---|
| **0 to 100 feet** | 6-1 and 6-2 | *None* |
| **100 to 250 feet** | *None* | *None* |
| **250 to 500 feet** | *None* | *None* |

As detailed database reports indicate, documented environmental conditions and incidents primarily include underground fuel oil and gasoline storage tanks. There are reported incidents indicating soil or groundwater contamination from underground tank leaks requiring remediation and unspecified rail spill reports.[6]

**Sheet No. 7 – Redding/Bethel/Danbury Corridor Area**

Sheet No. 7 ("Redding/Bethel/Danbury") corridor study coverage area extends approximately 2.3 miles north beginning at Railroad Milepost Marker "16" to Sympaug Pond at Railroad Milepost Marker "19". The Redding Railroad Station is located 500 feet north of Railroad Milepost Marker "17" at the intersection of Long Ridge Road and Sympaug Turnpike.

Identified Database Sites: 3 sites. Potential Risk of Contamination Sites: 1 site.

[6] Spills are identified under Metro North Rail Lines.

| POTENTIAL RISK OF CONTAMINATION SITES | | | |
|---|---|---|---|
| Distance from Track Centerline | Potential Risk of Contamination Sites | Moderate Risk Sites | High Risk Sites |
| **0 to 100 feet** | **1** | 1 | 0 |
| **100 to 250 feet** | **0** | 0 | 0 |
| **250 to 500 feet** | **0** | 0 | 0 |
| Total | **1** | 0 | 0 |

The Redding/Bethel/Danbury corridor study area exhibits no identified clusters of potential contaminated sites. This area is primarily characterized by undeveloped tracts with a small localized area of historical urbanized activities at Redding Station near the intersection of Sympaug Turnpike and Long Ridge Road. Along the 2.3 mile coverage area, the environmental database reports initially identified three sites. The mapped locations are in an isolated area near Redding Station. These listed sites/incidents were further evaluated and classified based on probable level of site complexity and proximity to the rail centerline as posing a potential "*Low*", "*Moderate*" or "*High*" risk of contamination. Based on the risk evaluation criteria, no *"Moderate*" or "*High*" risk sites were identified within the corridor coverage area. A single location was evaluated as posing a *"Moderate*" risk site with a documented environmental condition that poses potential impacts to proposed construction activities.

Potential "Risk of Contamination Sites" within the study corridor are plotted with a unique Map Identification Number on the radius search maps included with the environmental database reports in Appendix A. Detailed database information for a specific mapped site is included with the Target Property Site Detail Database Reports which correspond to the Orthophoto Base Map for this section. The moderate and high risk sites identified within the study corridor are identified in the table below:

| Distance From Track Centerline | Moderate Risk Sites MAP ID Number | High Risk Sites MAP ID Number |
|---|---|---|
| **0 to 100 feet** | 7-1 | *None* |
| **100 to 250 feet** | *None* | *None* |
| **250 to 500 feet** | *None* | *None* |

As the detailed database report indicates, documented environmental conditions and incidents primarily include an underground fuel oil storage tank, and this indicates soil or groundwater contamination from an underground tank leak requiring remediation. Unspecified rail spill reports were also identified.[7]

**Sheet No. 8 – Bethel/Danbury Corridor Area**

Sheet No. 8 ("Bethel/Danbury") corridor study coverage area extends approximately 2.3 miles from Railroad Milepost Marker "19" at Sympaug Pond north to the Danbury/Bethel city boundary which is 2,000 feet north of Railroad Milepost Marker "21". The Bethel Railroad Station is located at Railroad Milepost Marker "21" off Durant Avenue.

[7] Spills are identified under Metro North Rail Lines.

Identified Database Sites: 42 sites. Potential Risk of Contamination Sites: 12 sites.

| **POTENTIAL RISK OF CONTAMINATION SITES** | | | |
|---|---|---|---|
| Distance from Track Centerline | Potential Risk of Contamination Sites | Moderate Risk Sites | High Risk Sites |
| **0 to 100 feet** | **5** | 2 | 3 |
| **100 to 250 feet** | **3** | 1 | 2 |
| **250 to 500 feet** | **4** | 2 | 2 |
| Total | **12** | 5 | 7 |

The Bethel/Danbury corridor study area exhibits patterns consistent with the previous sections characterized by a mix of undeveloped and densely developed urbanized area with historical industrial and commercial land uses. Along the 2.3 mile coverage area, the environmental database reports initially identified 42 sites. The distribution of mapped locations is not consistent along the study corridor. Rather, identified incidents are centrally clustered between Railroad Milepost Marker "20" north to Greenwood Avenue (State Route 302). These listed sites/incidents were further evaluated and classified based on probable level of site complexity and proximity to the rail centerline as posing a potential "*Low*", "*Moderate*" or "*High*" risk of contamination. Based on the risk evaluation criteria, 12 *"Moderate*" or "*High*" risk sites were identified as having documented environmental conditions that pose potential impacts to proposed construction activities.

Potential "Risk of Contamination Sites" within the study corridor are plotted with a unique Map Identification Number on the radius search maps included with the environmental database reports in Appendix A. Detailed database information for a specific mapped site is included with the Target Property Site Detail Database Reports which correspond to the Orthophoto Base Map for this section. The moderate and high risk sites identified within the study corridor are identified in the table below:

| Distance From Track Centerline | Moderate Risk Sites MAP ID Number | High Risk Sites MAP ID Number |
|---|---|---|
| **0 to 100 feet** | 8-1 and 8-2 | 8-3, 8-4 and 8-5 |
| **100 to 250 feet** | 8-8 | 8-6 and 8-7 |
| **250 to 500 feet** | 8-11 and 8-12 | 8-9 and 8-10 |

As detailed database reports indicate, documented environmental conditions and incidents include underground gasoline storage tanks, underground gasoline storage tank leaks resulting in soil and groundwater contamination including observed separate phase of product in groundwater wells, UST closures and associated soil removals, and reported spill incidents.[8]

[8] There are numerous "spill" incidents identified for Vanderbilt Chemical Corporation including other site names located at 31 Taylor Avenue, Bethel, Connecticut.

**Sheet No. 9 – Danbury/Bethel Corridor Area**

Sheet No. 9 ("Danbury/Bethel") corridor study coverage area extends approximately 2.3 miles from the Bethel/Danbury municipal line at South Street (State Route 53) north to Railroad Milepost Marker "26" at Eagle Road. The Danbury Railroad Station is located 1,000 feet north of Railroad Milepost Marker "23" at Pahquioque Avenue.

Identified Database Sites: 132 sites. Potential Risk of Contamination Sites: 52 sites.

| **POTENTIAL RISK OF CONTAMINATION SITES** | | | |
|---|---|---|---|
| Distance from Track Centerline | Potential Risk of Contamination Sites | Moderate Risk Sites | High Risk Sites |
| **0 to 100 feet** | **20** | 10 | 10 |
| **100 to 250 feet** | **22** | 16 | 6 |
| **250 to 500 feet** | **10** | 7 | 3 |
| Total | **52** | 33 | 19 |

The Danbury/Bethel corridor study area exhibits patterns consistent with the previous sections (i.e., Norwalk) characterized by a densely developed urbanized area with historical industrial and commercial land uses. Along the 2.3 mile coverage area, the environmental database reports initially identified 132 sites. The distribution of mapped locations is also fairly consistent along the entire urbanized study corridor. These listed sites/incidents were further evaluated and classified based on probable level of site complexity and proximity to the rail centerline as posing a potential "*Low*", "*Moderate*" or "*High*" risk of contamination. Based on the risk evaluation criteria, 52 *"Moderate*" or "*High*" risk sites were identified as having documented environmental conditions that pose potential impacts to proposed construction activities.

Potential "Risk of Contamination Sites" within the study corridor are plotted with a unique Map Identification Number on the radius search maps included with the environmental database reports in Appendix A. Detailed database information for a specific mapped site is included with the Target Property Site Detail Database Reports which correspond to the Orthophoto Base Map for this section. The moderate and high risk sites identified within the study corridor are identified in the table below:

| Distance From Track Centerline | Moderate Risk Sites MAP ID Number | High Risk Sites MAP ID Number |
|---|---|---|
| **0 to 100 feet** | 9-4, 9-5, 9-7, 9-10, 9-11, 9-12, 9-14, 9-16, 9-19 and 9-20 | 9-1, 9-2, 9-3, 9-6, 9-8, 9-9, 9-13, 9-15, 9-17 and 9-18 |
| **100 to 250 feet** | 9-23, 9-24, 9-25, 9-26, 9-27, 9-28, 9-29, 9-30, 9-33, 9-35, 9-37, 9-38, 9-39, 9-40, 9-41 and 9-42 | 9-21, 9-22, 9-31, 9-32, 9-34 and 9-36 |
| **250 to 500 feet** | 9-43, 9-44, 9-45, 9-47, 9-49, 9-51 and 9-52 | 9-46, 9-48 and 9-50 |

As detailed database reports indicate, documented environmental conditions and incidents include underground fuel oil and gasoline storage tank leaks and associated soil removals, soil

and groundwater contamination including observed separate-phase floating product and petroleum sheen, release conditions in abandoned septic systems, vapor intrusion conditions and reported presence of explosive vapors, leaking drums of waste oil, large quantities of hazardous waste generation of metals and solvents, numerous underground gasoline storage tank removals, listed CERCLIS and RCRACOR sites,[9] and discharge of industrial solvents.

In particular, a database report dated April 30, 2001 lists an "upwelling sheen from under the concrete river channel with an odor of coal tar" at the "new train station" at Patriot Drive and Pahquioque Avenue. There is historical relevance regarding this condition. This "historical condition" is also identified at "Triangle Street" in a database report dated January 27, 1993 at the "Still River between CTDOT/Metro North Railroad Station and Yankee Gas property at the intersection of Patriot Drive and Pahquioque Road". Unspecified rail spill reports were also identified.[10]

**Sheet No. 10 – Danbury/Bethel/Brookfield Corridor Area**

Sheet No. 10 ("Danbury/Bethel/Brookfield") corridor study coverage area extends approximately 2.3 miles from Railroad Milepost Marker "26" at Eagle Road north to the intersection of Vale and Stony Hill Roads which is located 2,500 feet north of Railroad Milepost Marker "28". The proposed Danbury North Railroad Station is located 1,000 feet north of Railroad Milepost Marker "27" on White Turkey Road.

Identified Database Sites: 23 sites. Potential Risk of Contamination Sites: 7 sites.

| **POTENTIAL RISK OF CONTAMINATION SITES** | | | |
|---|---|---|---|
| Distance from Track Centerline | Potential Risk of Contamination Sites | Moderate Risk Sites | High Risk Sites |
| **0 to 100 feet** | **0** | 0 | 0 |
| **100 to 250 feet** | **3** | 2 | 1 |
| **250 to 500 feet** | **4** | 2 | 2 |
| Total | **7** | 4 | 3 |

The initial 4,000 feet of the Danbury/Bethel/Brookfield corridor study area along Eagle Road exhibits patterns consistent with the previous section (i.e., Danbury/Bethel) characterized by a densely developed urbanized area with historical, industrial, and commercial land uses. The remaining portion of the corridor study area along White Turkey Road and the Still River is generally undeveloped. However, there is an isolated cluster of development that extends north for approximately 6,000 feet to an area south of Vale Road near Railroad Milepost Marker "28". Along the 2.3 mile coverage area, the environmental database reports initially identified 23 sites. The distribution of mapped locations is fairly consistent along developed portions in the south

[9] Papish, Inc. 21 Taylor Street, Danbury, Connecticut. The database report indicates that the "CTDEP has recommended that this site be designated as a State Lead site. Northeast Utilities, Pahquioque Avenue, Danbury, Connecticut. Mankind Corporation, 1 Casper Street and Electronics Metal Finishing Corporation of Danbury, Connecticut are also listed as a "potentially subject to RCRA Corrective Action under section 3004".
[10] Spills are identified under Metro North Rail Lines.

and the isolated portion to the north of the study corridor described above. These listed sites/incidents were further evaluated and classified based on probable level of site complexity and proximity to the rail centerline as posing a potential "*Low*", "*Moderate*" or "*High*" risk of contamination. Based on the risk evaluation criteria, seven *"Moderate*" or "*High*" risk sites were identified as having documented environmental conditions that pose potential impacts to proposed construction activities.

Potential "Risk of Contamination Sites" within the study corridor are plotted with a unique Map Identification Number on the radius search maps included with the environmental database reports in Appendix A. Detailed database information for a specific mapped site is included with the Target Property Site Detail Database Reports which correspond to the Orthophoto Base Map for this section. The moderate and high risk sites identified within the study corridor are identified in the table below:

| Distance From Track Centerline | Moderate Risk Sites MAP ID Number | High Risk Sites MAP ID Number |
|---|---|---|
| **0 to 100 feet** | *None* | *None* |
| **100 to 250 feet** | 10-1 and 10-3 | 10-2 |
| **250 to 500 feet** | 10-5 and 10-6 | 10-4 and 10-7 |

As detailed database reports indicate, documented environmental conditions and incidents include a carbon disulfide spill from a freight train tank derailment,[11] underground fuel oil and gasoline storage tank leaks and associated soil removals, reported soil contamination, and large quantities of hazardous waste generation of solvents. In particular, database report listed unspecified rail spill reports.[12]

**Sheet No. 11 – Brookfield Corridor Area**

Sheet No. 11 ("Brookfield") corridor study coverage area extends approximately 2.3 miles from the intersection of Vale and Stony Hill Roads which is located 2,500 feet south of Railroad Milepost Marker "29" north to Railroad Milepost Marker "31".

Identified Database Sites: 28 sites. Potential Risk of Contamination Sites: 7 sites.

| **POTENTIAL RISK OF CONTAMINATION SITES** | | | |
|---|---|---|---|
| Distance from Track Centerline | Potential Risk of Contamination Sites | Moderate Risk Sites | High Risk Sites |
| **0 to 100 feet** | **1** | 1 | 0 |
| **100 to 250 feet** | **3** | 2 | 1 |
| **250 to 500 feet** | **3** | 0 | 3 |
| Total | **7** | 3 | 4 |

[11] The incident listed references a derailment at Pittsburgh Plate Glass, Federal Street, Danbury, Connecticut on 04/16/1996 that required a two square block evacuation.
[12] Spills are identified under Metro North Rail Lines and Conrail.

The initial 1,000 feet of the Brookfield corridor study area along Commerce Road near Stony Hill Road is undeveloped, but it exhibits altered open rectangular tracts on the westside of the tracks, which is suggestive of agricultural land use. The next 8,000 feet of the corridor study area along Commerce Road and Pocono Road on the westside of the tracks to Silvermine Road exhibits a commercially developed area characterized by large, evenly spaced commercial buildings with dedicated access roads. The remaining portion of the corridor study area 4,500 feet north from Silvermine Road extending along Pocono Road is characterized by residential developments. The entire section east of the track centerline is generally undeveloped with scattered tracts of residential developments along Stony Hill Road, Junction Road, Westview Lane, and Brookfield Meadows.

Along the 2.3 mile coverage area, the environmental database reports initially identified 28 sites. The mapped locations are evenly distributed on the westside of the track centerline from Junction Road to Railroad Milepost Marker "31". These listed sites/incidents were further evaluated and classified based on probable level of site complexity and proximity to the rail centerline as posing a potential "*Low*", "*Moderate*" or "*High*" risk of contamination. Based on the risk evaluation criteria, seven *"Moderate*" or "*High*" risk sites were identified as having documented environmental conditions that pose potential impacts to proposed construction activities. The database listed impacts from underground gasoline storage tanks located in a grouped cluster at the intersection of Federal Road (Route 7) and Route 25 which corresponds to the northernmost area of the study corridor.

Potential "Risk of Contamination Sites" within the study corridor are plotted with a unique Map Identification Number on the radius search maps included with the environmental database reports in Appendix A. Detailed database information for a specific mapped site is included with the Target Property Site Detail Database Reports which correspond to the Orthophoto Base Map for this section. The moderate and high risk sites identified within the study corridor are identified in the table below:

| Distance From Track Centerline | Moderate Risk Sites MAP ID Number | High Risk Sites MAP ID Number |
|---|---|---|
| **0 to 100 feet** | 11-1 | *None* |
| **100 to 250 feet** | 11-3 and 11-4 | 11-2 |
| **250 to 500 feet** | *None* | 11-5, 11-6 and 11-7 |

As detailed database reports indicate, documented environmental conditions and incidents include a RCRA Corrective Action site, underground fuel oil and gasoline storage tank leaks, and associated soil removals.

**Sheet No. 12 – Brookfield/New Milford Corridor Area**

Sheet No. 12 ("Brookfield/New Milford") corridor study coverage area extends approximately 2.3 miles from the intersection of Wisconier Road and Station Road north to Railroad Milepost Marker "34". The proposed Brookfield Railroad Station is located at the intersection of Wisconier Road and Station Road which is 1,500 feet north of Railroad Milepost Marker "31".

Identified Database Sites: 5 sites. Potential Risk of Contamination Sites: 0 sites.

| POTENTIAL RISK OF CONTAMINATION SITES | | | |
|---|---|---|---|
| Distance from Track Centerline | Potential Risk of Contamination Sites | Moderate Risk Sites | High Risk Sites |
| **0 to 100 feet** | **0** | 0 | 0 |
| **100 to 250 feet** | **0** | 0 | 0 |
| **250 to 500 feet** | **0** | 0 | 0 |
| Total | **0** | 0 | 0 |

The entire Brookfield/New Milford corridor study area is generally undeveloped with scattered tracts of residential developments and isolated commercial land uses along Prospect Drive, Old Middle Road, and Aldrich Road. The westside of the track centerline is characterized by wetland areas of the Still River.

Along the 2.3 mile coverage area, the environmental database reports initially identified five isolated sites along Prospect Drive on the eastside of the track centerline from Railroad Milepost Marker "31" north to Railroad Milepost Marker "34". These listed sites/incidents were further evaluated and classified based on probable level of site complexity and proximity to the rail centerline as posing a potential "*Low*", "*Moderate*" or "*High*" risk of contamination. Based on the risk evaluation criteria, no *"Moderate*" or "*High*" risk sites were identified as having documented environmental conditions that would pose potential impacts to proposed construction activities. However, as reported within the Brookfield corridor study area (Sheet No. 11), the database listed impacts from underground gasoline storage tanks located in a grouped cluster at the intersection of Federal Road (Route 7) and Route 25 which is located 500 feet west of the proposed Brookfield Station.

**Sheet No. 13 – New Milford Corridor Area**

Sheet No. 13 ("New Milford") corridor study coverage area extends approximately 2.3 miles from intersection of Old Pumpkin Hill Road and Erickson Road near Railroad Milepost Marker "34" north to Railroad Milepost Marker "36".

Identified Database Sites: 3 sites. Potential Risk of Contamination Sites: 0 sites.

| POTENTIAL RISK OF CONTAMINATION SITES | | | |
|---|---|---|---|
| Distance from Track Centerline | Potential Risk of Contamination Sites | Moderate Risk Sites | High Risk Sites |
| **0 to 100 feet** | **0** | 0 | 0 |
| **100 to 250 feet** | **0** | 0 | 0 |
| **250 to 500 feet** | **0** | 0 | 0 |
| Total | **0** | 0 | 0 |

The entire New Milford corridor study area is consistent with the character of the previous corridor study area with undeveloped areas mixed with scattered tracts of residential

developments uses along Turkey Trott Road, Ericson Road, and Pumpkin Hill Road. The westside of the track centerline is also characterized by wetland areas of the Still River.

Along the 2.3 mile coverage area, the environmental database reports initially identified three isolated sites along the westside of the track centerline on Erickson Road near Railroad Milepost Marker "34". These listed sites/incidents were further evaluated and classified based on probable level of site complexity and proximity to the rail centerline as posing a potential "*Low*", "*Moderate*" or "*High*" risk of contamination. Based on the risk evaluation criteria, no *"Moderate*" or "*High*" risk sites were identified as having environmental conditions that would pose potential impacts to proposed construction activities.

**Sheet No. 14 – New Milford Corridor Area**

Sheet No. 14 ("New Milford") corridor study coverage area extends approximately 2.3 miles from Railroad Milepost Marker "36" north to Railroad Milepost Marker "39". The proposed New Milford Railroad Station is located at the intersection of Bridge Street and Railroad Street at Railroad Milepost Marker "38".

Identified Database Sites: 60 sites. Potential Risk of Contamination Sites: 23 sites.

| **POTENTIAL RISK OF CONTAMINATION SITES** | | | |
|---|---|---|---|
| Distance from Track Centerline | Potential Risk of Contamination Sites | Moderate Risk Sites | High Risk Sites |
| **0 to 100 feet** | **5** | 3 | 2 |
| **100 to 250 feet** | **10** | 4 | 6 |
| **250 to 500 feet** | **8** | 4 | 4 |
| Total | **23** | 11 | 12 |

The next New Milford corridor study area is a densely developed urbanized area with historical, industrial, and commercial land uses. Along the 2.3 mile coverage area, the environmental database reports initially identified 60 sites. The distribution of mapped locations is fairly consistent along the entire urbanized study corridor. The sites/incidents were further evaluated and classified based on probable level of site complexity and proximity to the rail centerline as posing a potential "*Low*", "*Moderate*" or "*High*" risk of contamination. Based on the risk evaluation criteria, 23 *"Moderate*" or "*High*" risk sites were identified as having documented environmental conditions that pose potential impacts to proposed construction activities.

Potential "Risk of Contamination Sites" within the study corridor are plotted with a unique Map Identification Number on the radius search maps included with the environmental database reports in Appendix A. Detailed database information for a specific mapped site is included with the Target Property Site Detail Database Reports which correspond to the Orthophoto Base Map for this section. The moderate and high risk sites identified within the study corridor are identified in the table below:

| Distance From Track Centerline | Moderate Risk Sites MAP ID Number | High Risk Sites MAP ID Number |
|---|---|---|
| **0 to 100 feet** | 14-1, 14-4 and 14-5 | 14-2 and 14-3 |
| **100 to 250 feet** | 14-7, 14-12, 14-13 and 14-15 | 14-6, 14-8, 14-9, 14-10, 14-11 and 14-14 |
| **250 to 500 feet** | 14-17, 14-19, 14-20 and 14-21 | 14-16, 14-18, 14-22 and 14-23 |

As detailed database reports indicate, documented environmental conditions and incidents include underground fuel oil and gasoline storage tank leaks, underground gasoline storage tank removals and associated soil removals, soil contamination, industrial chemical spills from hazardous waste generators, groundwater contamination including reported of observed separate-phase floating product and petroleum sheen on groundwater, and a listed RCRACOR site.[13]

**Summary and Analysis of Database Findings for the Corridor Area**

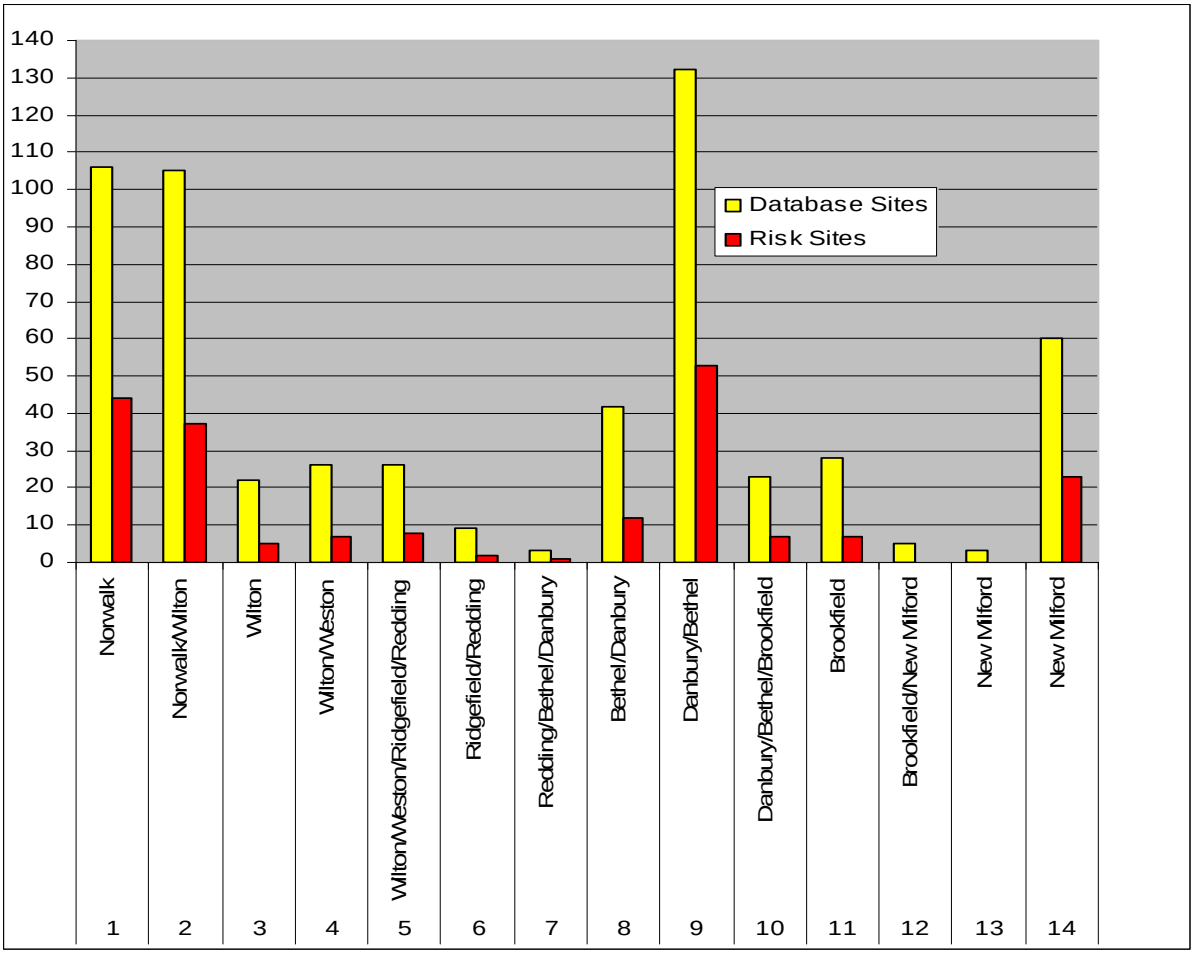
Target property searches of environmental databases were organized into 14 Orthophoto Base Maps. The database search of the corridor study area initially identified 590 locations. These listed sites/incidents were further evaluated and classified based on probable level of site complexity and proximity to the rail centerline as posing a potential "*Low*", "*Moderate*" or "*High*" risk of contamination. Based on the risk evaluation criteria, 204 *"Moderate*" or "*High*" risk sites were identified as having documented environmental conditions that pose potential impacts to proposed construction activities.

"*Moderate*" or "*High*" risk site locations are generally grouped in areas of the study corridor with historical, industrial, and commercial land uses in key urban centers. The highest areas of identified "risk of contamination" sites exist in the South Norwalk/Norwalk/Wilton (Sheet Nos. 1, 2), Bethel/Danbury (Sheet Nos. 8, 9), and New Milford (Sheet No. 14) regions. Lesser areas of identified "risk of contamination" sites exist in the Wilton/Weston/Ridgefield/Redding (Sheet Nos. 3, 4, 5, 6, 7) and Bethel/Brookfield (Sheet Nos. 10, 11) regions. The lowest areas of identified "risk of contamination" sites exist in the Ridgefield/Redding (Sheet Nos. 6, 7) and Brookfield/New Milford (Sheet No. 12, 13) regions.

The following table and chart summarize findings within the study corridor.

[13] Century Brass Products, 12 Scovill Road, New Milford, CT. The database report indicates that the site is listed as "potentially subject to RCRA Corrective Action under section 3004".

| Sheet No. | Orthophoto Base Map | Database Sites | Risk Sites |
|---|---|---|---|
| **1** | Norwalk | 106 | 44 |
| **2** | Norwalk/Wilton | 105 | 36 |
| **3** | Wilton | 22 | 5 |
| **4** | Wilton/Weston | 26 | 7 |
| **5** | Wilton/Weston/Ridgefield/Redding | 26 | 8 |
| **6** | Ridgefield/Redding | 9 | 2 |
| **7** | Redding/Bethel/Danbury | 3 | 1 |
| **8** | Bethel/Danbury | 42 | 12 |
| **9** | Danbury/Bethel | 132 | 52 |
| **10** | Danbury/Bethel/Brookfield | 23 | 7 |
| **11** | Brookfield | 28 | 7 |
| **12** | Brookfield/New Milford | 5 | 0 |
| **13** | New Milford | 3 | 0 |
| **14** | New Milford | 60 | 23 |
| | **Total** | **590** | **204** |



## HISTORICAL FIRE INSURANCE MAP FINDINGS

Historical Fire Insurance Maps dating from 1884 to 1973 for the 1,000-foot study corridor were compiled and evaluated. Maps were available for the following municipal areas and years:

- South Norwalk – 1912, 1906, 1900, 1895, 1889, 1884.
- Norwalk – 1973, 1966, 1959, 1958, 1950, 1923, 1922, 1912, 1906, 1901, 1896, 1891.
- Bethel – 1960, 1949, 1927, 1912, 1906, 1901, 1895, 1889.
- Danbury – 1969, 1950, 1929, 1919, 1909, 1904, 1897, 1892, 1889, 1884.
- New Milford – 1963, 1938, 1931, 1909, 1904, 1897, 1892, 1887.

Fire insurance map abstract research results and supporting map information were evaluated for historical building features and land use patterns on each side of the track centerline based on the established evaluation criteria. Fire insurance map abstract research results and historical maps are included in Appendix B.

### South Norwalk Area

Historical fire insurance maps of the South Norwalk area identify significant historical activities such as gas holders, iron works, foundries, chemical processors, and fur hat manufacturers in the geographic area of South Norwalk Station and Railroad Milepost Marker "0". Relevant historical information includes the following features:

- "City of South Norfolk Electrical Works" located immediately west of the South Norwalk Station (identified as the "West Bound Passenger Depot") at the corner of State Street and Spring Street (now Martin Luther King Drive) showing generators and coal storage features;
- Hat manufacturers located on both sides of the rail line along Railroad Avenue and Monroe Street;
- Gas holder tank adjacent to the rail on the westside at the intersection of Pine Street and Seymour Avenue (now Putnam Avenue); and
- Manufacturing plants for foundries adjacent to the rail at the intersection of Water Street and Marshall Street.

### Norwalk Area

Historical fire insurance maps of the Norwalk area identify significant historical activities such as foundries, leather tanneries, gas holders and purifiers, tar tanks, coal piles and fuel oil storage in the geographic area north of US Route 95 extending to the area of Railroad Milepost Marker "1". Relevant historical information includes the following features:

- Freight Yard north of the intersection of the rail line with Ann Street;
- Manufacturing tracts west of the rail line at Crescent Street;

- Turntable east of the rail line at the intersection with the "Connecticut Turnpike" (US Route 95);
- Chemical manufacturing ("Robert J. King") and "Norwalk Incinerator" facilities located east of the rail line at the intersections of Crescent Street and the "Connecticut Turnpike";
- Fuel oil tank storage adjacent to the rail line on the westside at the intersection of Leonard Street and Commerce Street;
- Gas holders, purifiers, fuel oil storage tanks, coke sheds, and tar tanks identified for "The Connecticut Light and Power Co." (also identified as "Connecticut Railway & Lighting Co. Gas Works") located west of the rail line at the intersections of Chapel Street and Harbor Avenue south of Railroad Milepost Marker "1";
- "Vanderbilt Chemical Corporation" on Hoyt Street at the Norwalk River crossing; and
- "Connecticut Light and Power Co. Garage and Service Buildings" located at the intersection of Tindall Avenue and Grand Avenue on the westside of the rail line;

**Bethel Area**

Historical fire insurance maps of the Bethel area identify a limited section of the corridor characterized by significant historical activities. These include chemical manufacturing, hat manufacturing, leather tanneries, coal piles, tar tanks and fuel oil storage in the geographic area north of Railroad Milepost Marker "20" extending north to the Bethel Station at Railroad Milepost Marker "21". Relevant historical information includes the following features:

- Chemical manufacturing and associated "chemical tanks" and "oil tanks" located on the westside of the rail line at the intersection of Henry Street and South Street; and
- Tar tanks ("B.J. Dolan") and hat manufacturing buildings located north of the intersection of Grand Street and Diamond Avenue at Railroad Milepost Marker "21".

**Danbury Area**

Historical fire insurance maps of the Danbury area identify significant historical activities such as gas manufacturing plants, solvent recovery processors, and fur hat manufacturers in the geographic area of the Danbury Station at Railroad Milepost Marker "23". Relevant historical information includes the following features:

- Gas holding tanks, purifiers, coal storage, coke storage, and fuel oil storage in the area of the current Danbury Station under the name of "Danbury & Bethel Gas & Electric Co." along Pahquioque Avenue and Railroad Avenue north of Railroad Milepost Marker "23";
- Factory "chemical works" buildings for the "Solvents Recovery Co." in the area of the current Danbury Station along Pahquioque Avenue and Railroad Avenue north of Railroad Milepost Marker "23";
- Engine house and machine shop in the former "New York, New Haven & Hartford Railroad Yard" located between the Still River and Pahquioque Avenue; and

- Gas holders, tar tanks, coke and gas storage, kerosene tanks, and coal storage are identified in the areas of Pahquioque Avenue, White Street, and the Still River at Railroad Milepost Marker "24".

**New Milford Area**

Historical fire insurance maps of the New Milford area identify limited sections of the corridor characterized by significant historical activities. Relevant historical land use activities include former railroad maintenance operations, coal piles, and fuel oil storage and hat manufacturing in the area of Railroad Milepost Marker "38" and the proposed New Milford Station. Relevant historical information includes the following features:

- A former turn table and storage facility for the "New York, New Haven & Hartford Railroad" located along Housatonic Avenue and west of Bank Street;
- A former turn table located at the intersection of Bridge Street and Middle Street at Railroad Milepost Marker "38"; and
- Hat manufacturing buildings and clusters of other businesses along a limited section of the corridor between Railroad Milepost Marker "37" and Railroad Milepost Marker "39".

## HISTORICAL AERIAL PHOTOGRAPH FINDINGS

Historical aerial photographs dated 1944, 1959, 1970, and 1985 were cross-referenced to support findings reported in the environmental database reports and fire insurance maps. The collection of aerial photographs are organized in 25 sections beginning with Section 1 in the northernmost area of the study corridor at Railroad Milepost Marker "39" (New Milford) and ending with Section 25 at Railroad Milepost Marker "0" (South Norwalk).

The aerial photographs provide a useful reference tool to validate reported observations of other resources and to supplement historical land use interpretations. Relevant historical land use activities recorded on the historical fire insurance maps and documented on the environmental database reports corroborate with features of historical aerial photographs. Historical aerial photographs are included in Appendix C.

### Notice of Disclaimer

Due to the limitations, constraints, inaccuracies and incompleteness of government information and computer mapping data currently available to FirstSearch Technology Corp., certain conventions have been utilized in preparing the locations of all federal, state and local agency sites residing in FirstSearch Technology Corp.'s databases. All EPA NPL and state landfill sites are depicted by a rectangle approximating their location and size. The boundaries of the rectangles represent the eastern and western most longitudes; the northern and southern most latitudes. As such, the mapped areas may exceed the actual areas and do not represent the actual boundaries of these properties. All other sites are depicted by a point representing their approximate address location and make no attempt to represent the actual areas of the associated property. Actual boundaries and locations of individual properties can be found in the files residing at the agency responsible for such information.

### Waiver of Liability

Although FirstSearch Technology Corp. uses its best efforts to research the actual location of each site, FirstSearch Technology Corp. does not and can not warrant the accuracy of these sites with regard to exact location and size. All authorized users of FirstSearch Technology Corp.'s services proceeding are signifying an understanding of FirstSearch Technology Corp.'s searching and mapping conventions, and agree to waive any and all liability claims associated with search and map results showing incomplete and or inaccurate site locations.

**HAZARDOUS WASTE INFORMATION:**

The following spent non-halogenated solvents: toluene, methyl ethyl ketone, carbon disulfide, isobutanol, pyridine, benzene, 2-ethoxyethanol, and 2-nitropropane; all spent solvent mixtures/blends containing, before use, a to
Benzene, methyl- (OR) Toluene
Benzene, 1,3-diisocyanatomethyl- (R,T) (OR) Toluene diisocyanate (R,T)
The following spent non-halogenated solvents: Xylene, acetone, ethyl acetate, ethyl benzene, ethyl ether, methyl isobutyl ketone, n-butyl alcohol, cyclohexanone, and methanol; all spent solvent mixtures/ blends containing, b
2-Butanone (I,T) (OR) Methyl ethyl ketone (MEK) (I,T)
Ethane, 1,1,1-trichloro- (OR) Methyl chloroform
Carbamic acid, ethyl ester (OR) Ethyl carbamate (urethane)
2-Nitropropane (I,T) (OR) Propane, 2-nitro- (I,T)
Acetic acid ethyl ester (I) (OR) Ethyl acetate (I)
Methyl ethyl ketone

# Environmental FirstSearch Descriptions

**CERCLIS:** ***EPA*** COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM (CERCLIS)- CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL.
PART OF NPL- Site is part of NPL site
DELETED - Deleted from the Final NPL
FINAL - Currently on the Final NPL
NOT PROPOSED - Not on the NPL
NOT VALID - Not Valid Site or Incident
PROPOSED - Proposed for NPL
REMOVED - Removed from Proposed NPL
SCAN PLAN - Pre-proposal Site
WITHDRAWN - Withdrawn

**RCRA COR ACT:** ***EPA*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM SITES - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
RCRAInfo facilities that have reported violations and subject to corrective actions.

**RCRA TSD:** ***EPA*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM TREATMENT, STORAGE, and DISPOSAL FACILITIES. - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
Facilities that treat, store, dispose, or incinerate hazardous waste.

**RCRA GEN:** ***EPA/MA DEP/CT DEP*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM GENERATORS - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
Facilities that generate or transport hazardous waste or meet other RCRA requirements.
LGN - Large Quantity Generators
SGN - Small Quantity Generators
VGN – Conditionally Exempt Generator.
Included are RAATS (RCRA Administrative Action Tracking System) and CMEL (Compliance Monitoring & Enforcement List) facilities.
CONNECTICUT HAZARDOUS WASTE MANIFEST – Database of all shipments of hazardous waste within, into or from Connecticut. The data includes date of shipment, transporter and TSD info, and material shipped and quantity. This data is appended to the details of existing generator records.
MASSACHUSETTES HAZARDOUS WASTE GENERATOR – database of generators that are regulated under the MA DEP.
VQN-MA = generates less than 220 pounds or 27 gallons per month of hazardous waste or waste oil.
SQN-MA = generates 220 to 2,200 pounds or 27 to 270 gallons per month of waste oil.
LQG-MA = generates greater than 2,200 lbs of hazardous waste or waste oil per month.

**ERNS:** ***EPA/NRC*** EMERGENCY RESPONSE NOTIFICATION SYSTEM (ERNS) - Database of incidents

reported to the National Response Center. These incidents include chemical spills, accidents involving chemicals (such as fires or explosions), oil spills, transportation accidents that involve oil or chemicals, releases of radioactive materials, sightings of oil sheens on bodies of water, terrorist incidents involving chemicals, incidents where illegally dumped chemicals have been found, and drills intended to prepare responders to handle these kinds of incidents. Data since January 2001 has been received from the National Response System database as the EPA no longer maintains this data.

**State Spills 90:** ***CT DEP*** EMERGENCY RESPONSE ACTIONS AND SPILL RELEASES - database of oil and chemical spills. The database includes discharger, reporter, date of release, cause of incident, and emergency measurement information.

**State/Tribal LUST:** ***CT DEP*** LEAKING UNDERGROUND STORAGE TANKS(LUST) - database of lusts, the data reported includes actions, agency, class, and media affected

**State/Tribal UST/AST:** ***CT DEP*** REGISTERED UNDERGROUND STORAGE TANKS - database of underground storage tanks, the data includes capacity, substance stored, status, tank material and piping material.

**RADON:** ***NTIS*** NATIONAL RADON DATABASE - EPA radon data from 1990-1991 national radon project collected for a variety of zip codes across the United States.

### Notice of Disclaimer

Due to the limitations, constraints, inaccuracies and incompleteness of government information and computer mapping data currently available to FirstSearch Technology Corp., certain conventions have been utilized in preparing the locations of all federal, state and local agency sites residing in FirstSearch Technology Corp.'s databases. All EPA NPL and state landfill sites are depicted by a rectangle approximating their location and size. The boundaries of the rectangles represent the eastern and western most longitudes; the northern and southern most latitudes. As such, the mapped areas may exceed the actual areas and do not represent the actual boundaries of these properties. All other sites are depicted by a point representing their approximate address location and make no attempt to represent the actual areas of the associated property. Actual boundaries and locations of individual properties can be found in the files residing at the agency responsible for such information.

### Waiver of Liability

Although FirstSearch Technology Corp. uses its best efforts to research the actual location of each site, FirstSearch Technology Corp. does not and can not warrant the accuracy of these sites with regard to exact location and size. All authorized users of FirstSearch Technology Corp.'s services proceeding are signifying an understanding of FirstSearch Technology Corp.'s searching and mapping conventions, and agree to waive any and all liability claims associated with search and map results showing incomplete and or inaccurate site locations.

**CORRECTIVE ACTION INFORMATION**

**CA EVENT:** 12/1/1992 CA075HI - CA PRIORITIZATION-HIGH CA PRIORITY

**CA EVENT:** 10/4/2000 CA210SF - REFERRED TO A NON-RCRA AUTHORITY-REFERRED TO CERCLA

**HAZARDOUS WASTE INFORMATION:**

Methanol (I) (OR) Methyl alcohol (I)
Wastewater treatment sludges from electroplating operations except from the following processes: (1) sulfuric acid anodizing of aluminum; (2) tin plating on carbon steel; (3) zinc plating (segregated basis) on carbon steel;
The following spent non-halogenated solvents: Xylene, acetone, ethyl acetate, ethyl benzene, ethyl ether, methyl isobutyl ketone, n-butyl alcohol, cyclohexanone, and methanol; all spent solvent mixtures/ blends containing, b
The following spent non-halogenated solvents: toluene, methyl ethyl ketone, carbon disulfide, isobutanol, pyridine, benzene, 2-ethoxyethanol, and 2-nitropropane; all spent solvent mixtures/blends containing, before use, a to
The following spent halogenated solvents: Tetrachloroethylene, methylene chloride, trichloroethylene, 1,1,1-trichloroethane, chlorobenzene, 1,1,2-trichloro-1,2,2-trifluoroethane, ortho-dichlorobenzene, trichlorofluoromethane
The following spent halogenated solvents used in degreasing: Tetrachloroethylene, trichlorethylene, methylene chloride, 1,1,1-trichloroethane, carbon tetrachloride and chlorinated fluorocarbons; all spent solvent mixtures/bl
Spent stripping and cleaning bath solutions from electroplating operations in which cyanides are used in the process.
Plating bath residues from the bottom of plating baths from electroplating operations in which cyanides are used in the process.
F018
F017
Chloroform (OR) Methane, trichloro-
Benzene (I,T)
Acetonitrile (I,T)
2-Propanone (I) (OR) Acetone (I)
Spent cyanide plating bath solutions from electroplating operations.

# Environmental FirstSearch Descriptions

**CERCLIS:** ***EPA*** COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM (CERCLIS)- CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL.
PART OF NPL- Site is part of NPL site
DELETED - Deleted from the Final NPL
FINAL - Currently on the Final NPL
NOT PROPOSED - Not on the NPL
NOT VALID - Not Valid Site or Incident
PROPOSED - Proposed for NPL
REMOVED - Removed from Proposed NPL
SCAN PLAN - Pre-proposal Site
WITHDRAWN - Withdrawn

**RCRA COR ACT:** ***EPA*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM SITES - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
RCRAInfo facilities that have reported violations and subject to corrective actions.

**RCRA TSD:** ***EPA*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM TREATMENT, STORAGE, and DISPOSAL FACILITIES. - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
Facilities that treat, store, dispose, or incinerate hazardous waste.

**RCRA GEN:** ***EPA/MA DEP/CT DEP*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM GENERATORS - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
Facilities that generate or transport hazardous waste or meet other RCRA requirements.
LGN - Large Quantity Generators
SGN - Small Quantity Generators
VGN – Conditionally Exempt Generator.
Included are RAATS (RCRA Administrative Action Tracking System) and CMEL (Compliance Monitoring & Enforcement List) facilities.
CONNECTICUT HAZARDOUS WASTE MANIFEST – Database of all shipments of hazardous waste within, into or from Connecticut. The data includes date of shipment, transporter and TSD info, and material shipped and quantity. This data is appended to the details of existing generator records.
MASSACHUSETTES HAZARDOUS WASTE GENERATOR – database of generators that are regulated under the MA DEP.
VQN-MA = generates less than 220 pounds or 27 gallons per month of hazardous waste or waste oil.
SQN-MA = generates 220 to 2,200 pounds or 27 to 270 gallons per month of waste oil.
LQG-MA = generates greater than 2,200 lbs of hazardous waste or waste oil per month.

**ERNS:** ***EPA/NRC*** EMERGENCY RESPONSE NOTIFICATION SYSTEM (ERNS) - Database of incidents

reported to the National Response Center. These incidents include chemical spills, accidents involving chemicals (such as fires or explosions), oil spills, transportation accidents that involve oil or chemicals, releases of radioactive materials, sightings of oil sheens on bodies of water, terrorist incidents involving chemicals, incidents where illegally dumped chemicals have been found, and drills intended to prepare responders to handle these kinds of incidents. Data since January 2001 has been received from the National Response System database as the EPA no longer maintains this data.

**State Spills 90:** ***CT DEP*** EMERGENCY RESPONSE ACTIONS AND SPILL RELEASES - database of oil and chemical spills. The database includes discharger, reporter, date of release, cause of incident, and emergency measurement information.

**State/Tribal LUST:** ***CT DEP*** LEAKING UNDERGROUND STORAGE TANKS(LUST) - database of lusts, the data reported includes actions, agency, class, and media affected

**State/Tribal UST/AST:** ***CT DEP*** REGISTERED UNDERGROUND STORAGE TANKS - database of underground storage tanks, the data includes capacity, substance stored, status, tank material and piping material.

**RADON:** ***NTIS*** NATIONAL RADON DATABASE - EPA radon data from 1990-1991 national radon project collected for a variety of zip codes across the United States.

### Notice of Disclaimer

Due to the limitations, constraints, inaccuracies and incompleteness of government information and computer mapping data currently available to FirstSearch Technology Corp., certain conventions have been utilized in preparing the locations of all federal, state and local agency sites residing in FirstSearch Technology Corp.'s databases. All EPA NPL and state landfill sites are depicted by a rectangle approximating their location and size. The boundaries of the rectangles represent the eastern and western most longitudes; the northern and southern most latitudes. As such, the mapped areas may exceed the actual areas and do not represent the actual boundaries of these properties. All other sites are depicted by a point representing their approximate address location and make no attempt to represent the actual areas of the associated property. Actual boundaries and locations of individual properties can be found in the files residing at the agency responsible for such information.

### Waiver of Liability

Although FirstSearch Technology Corp. uses its best efforts to research the actual location of each site, FirstSearch Technology Corp. does not and can not warrant the accuracy of these sites with regard to exact location and size. All authorized users of FirstSearch Technology Corp.'s services proceeding are signifying an understanding of FirstSearch Technology Corp.'s searching and mapping conventions, and agree to waive any and all liability claims associated with search and map results showing incomplete and or inaccurate site locations.

# Environmental FirstSearch Descriptions

**CERCLIS:** ***EPA*** COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM (CERCLIS)- CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL.
PART OF NPL- Site is part of NPL site
DELETED - Deleted from the Final NPL
FINAL - Currently on the Final NPL
NOT PROPOSED - Not on the NPL
NOT VALID - Not Valid Site or Incident
PROPOSED - Proposed for NPL
REMOVED - Removed from Proposed NPL
SCAN PLAN - Pre-proposal Site
WITHDRAWN - Withdrawn

**RCRA COR ACT:** ***EPA*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM SITES - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
RCRAInfo facilities that have reported violations and subject to corrective actions.

**RCRA TSD:** ***EPA*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM TREATMENT, STORAGE, and DISPOSAL FACILITIES. - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
Facilities that treat, store, dispose, or incinerate hazardous waste.

**RCRA GEN:** ***EPA/MA DEP/CT DEP*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM GENERATORS - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
Facilities that generate or transport hazardous waste or meet other RCRA requirements.
LGN - Large Quantity Generators
SGN - Small Quantity Generators
VGN – Conditionally Exempt Generator.
Included are RAATS (RCRA Administrative Action Tracking System) and CMEL (Compliance Monitoring & Enforcement List) facilities.
CONNECTICUT HAZARDOUS WASTE MANIFEST – Database of all shipments of hazardous waste within, into or from Connecticut. The data includes date of shipment, transporter and TSD info, and material shipped and quantity. This data is appended to the details of existing generator records.
MASSACHUSETTES HAZARDOUS WASTE GENERATOR – database of generators that are regulated under the MA DEP.
VQN-MA = generates less than 220 pounds or 27 gallons per month of hazardous waste or waste oil.
SQN-MA = generates 220 to 2,200 pounds or 27 to 270 gallons per month of waste oil.
LQG-MA = generates greater than 2,200 lbs of hazardous waste or waste oil per month.

**ERNS:** ***EPA/NRC*** EMERGENCY RESPONSE NOTIFICATION SYSTEM (ERNS) - Database of incidents

reported to the National Response Center. These incidents include chemical spills, accidents involving chemicals (such as fires or explosions), oil spills, transportation accidents that involve oil or chemicals, releases of radioactive materials, sightings of oil sheens on bodies of water, terrorist incidents involving chemicals, incidents where illegally dumped chemicals have been found, and drills intended to prepare responders to handle these kinds of incidents. Data since January 2001 has been received from the National Response System database as the EPA no longer maintains this data.

**State Spills 90:** ***CT DEP*** EMERGENCY RESPONSE ACTIONS AND SPILL RELEASES - database of oil and chemical spills. The database includes discharger, reporter, date of release, cause of incident, and emergency measurement information.

**State/Tribal LUST:** ***CT DEP*** LEAKING UNDERGROUND STORAGE TANKS(LUST) - database of lusts, the data reported includes actions, agency, class, and media affected

**State/Tribal UST/AST:** ***CT DEP*** REGISTERED UNDERGROUND STORAGE TANKS - database of underground storage tanks, the data includes capacity, substance stored, status, tank material and piping material.

**RADON:** ***NTIS*** NATIONAL RADON DATABASE - EPA radon data from 1990-1991 national radon project collected for a variety of zip codes across the United States.

### Notice of Disclaimer

Due to the limitations, constraints, inaccuracies and incompleteness of government information and computer mapping data currently available to FirstSearch Technology Corp., certain conventions have been utilized in preparing the locations of all federal, state and local agency sites residing in FirstSearch Technology Corp.'s databases. All EPA NPL and state landfill sites are depicted by a rectangle approximating their location and size. The boundaries of the rectangles represent the eastern and western most longitudes; the northern and southern most latitudes. As such, the mapped areas may exceed the actual areas and do not represent the actual boundaries of these properties. All other sites are depicted by a point representing their approximate address location and make no attempt to represent the actual areas of the associated property. Actual boundaries and locations of individual properties can be found in the files residing at the agency responsible for such information.

### Waiver of Liability

Although FirstSearch Technology Corp. uses its best efforts to research the actual location of each site, FirstSearch Technology Corp. does not and can not warrant the accuracy of these sites with regard to exact location and size. All authorized users of FirstSearch Technology Corp.'s services proceeding are signifying an understanding of FirstSearch Technology Corp.'s searching and mapping conventions, and agree to waive any and all liability claims associated with search and map results showing incomplete and or inaccurate site locations.

# Environmental FirstSearch Descriptions

**CERCLIS:** ***EPA*** COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM (CERCLIS)- CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL.
PART OF NPL- Site is part of NPL site
DELETED - Deleted from the Final NPL
FINAL - Currently on the Final NPL
NOT PROPOSED - Not on the NPL
NOT VALID - Not Valid Site or Incident
PROPOSED - Proposed for NPL
REMOVED - Removed from Proposed NPL
SCAN PLAN - Pre-proposal Site
WITHDRAWN - Withdrawn

**RCRA COR ACT:** ***EPA*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM SITES - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
RCRAInfo facilities that have reported violations and subject to corrective actions.

**RCRA TSD:** ***EPA*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM TREATMENT, STORAGE, and DISPOSAL FACILITIES. - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
Facilities that treat, store, dispose, or incinerate hazardous waste.

**RCRA GEN:** ***EPA/MA DEP/CT DEP*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM GENERATORS - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
Facilities that generate or transport hazardous waste or meet other RCRA requirements.
LGN - Large Quantity Generators
SGN - Small Quantity Generators
VGN – Conditionally Exempt Generator.
Included are RAATS (RCRA Administrative Action Tracking System) and CMEL (Compliance Monitoring & Enforcement List) facilities.
CONNECTICUT HAZARDOUS WASTE MANIFEST – Database of all shipments of hazardous waste within, into or from Connecticut. The data includes date of shipment, transporter and TSD info, and material shipped and quantity. This data is appended to the details of existing generator records.
MASSACHUSETTES HAZARDOUS WASTE GENERATOR – database of generators that are regulated under the MA DEP.
VQN-MA = generates less than 220 pounds or 27 gallons per month of hazardous waste or waste oil.
SQN-MA = generates 220 to 2,200 pounds or 27 to 270 gallons per month of waste oil.
LQG-MA = generates greater than 2,200 lbs of hazardous waste or waste oil per month.

**ERNS:** ***EPA/NRC*** EMERGENCY RESPONSE NOTIFICATION SYSTEM (ERNS) - Database of incidents

reported to the National Response Center. These incidents include chemical spills, accidents involving chemicals (such as fires or explosions), oil spills, transportation accidents that involve oil or chemicals, releases of radioactive materials, sightings of oil sheens on bodies of water, terrorist incidents involving chemicals, incidents where illegally dumped chemicals have been found, and drills intended to prepare responders to handle these kinds of incidents. Data since January 2001 has been received from the National Response System database as the EPA no longer maintains this data.

**State Spills 90:** ***CT DEP*** EMERGENCY RESPONSE ACTIONS AND SPILL RELEASES - database of oil and chemical spills. The database includes discharger, reporter, date of release, cause of incident, and emergency measurement information.

**State/Tribal LUST:** ***CT DEP*** LEAKING UNDERGROUND STORAGE TANKS(LUST) - database of lusts, the data reported includes actions, agency, class, and media affected

**State/Tribal UST/AST:** ***CT DEP*** REGISTERED UNDERGROUND STORAGE TANKS - database of underground storage tanks, the data includes capacity, substance stored, status, tank material and piping material.

**RADON:** ***NTIS*** NATIONAL RADON DATABASE - EPA radon data from 1990-1991 national radon project collected for a variety of zip codes across the United States.

### Notice of Disclaimer

Due to the limitations, constraints, inaccuracies and incompleteness of government information and computer mapping data currently available to FirstSearch Technology Corp., certain conventions have been utilized in preparing the locations of all federal, state and local agency sites residing in FirstSearch Technology Corp.'s databases. All EPA NPL and state landfill sites are depicted by a rectangle approximating their location and size. The boundaries of the rectangles represent the eastern and western most longitudes; the northern and southern most latitudes. As such, the mapped areas may exceed the actual areas and do not represent the actual boundaries of these properties. All other sites are depicted by a point representing their approximate address location and make no attempt to represent the actual areas of the associated property. Actual boundaries and locations of individual properties can be found in the files residing at the agency responsible for such information.

### Waiver of Liability

Although FirstSearch Technology Corp. uses its best efforts to research the actual location of each site, FirstSearch Technology Corp. does not and can not warrant the accuracy of these sites with regard to exact location and size. All authorized users of FirstSearch Technology Corp.'s services proceeding are signifying an understanding of FirstSearch Technology Corp.'s searching and mapping conventions, and agree to waive any and all liability claims associated with search and map results showing incomplete and or inaccurate site locations.

# Environmental FirstSearch Descriptions

**CERCLIS:** ***EPA*** COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM (CERCLIS)- CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL.
PART OF NPL- Site is part of NPL site
DELETED - Deleted from the Final NPL
FINAL - Currently on the Final NPL
NOT PROPOSED - Not on the NPL
NOT VALID - Not Valid Site or Incident
PROPOSED - Proposed for NPL
REMOVED - Removed from Proposed NPL
SCAN PLAN - Pre-proposal Site
WITHDRAWN - Withdrawn

**RCRA COR ACT:** ***EPA*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM SITES - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
RCRAInfo facilities that have reported violations and subject to corrective actions.

**RCRA TSD:** ***EPA*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM TREATMENT, STORAGE, and DISPOSAL FACILITIES. - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
Facilities that treat, store, dispose, or incinerate hazardous waste.

**RCRA GEN:** ***EPA/MA DEP/CT DEP*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM GENERATORS - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
Facilities that generate or transport hazardous waste or meet other RCRA requirements.
LGN - Large Quantity Generators
SGN - Small Quantity Generators
VGN – Conditionally Exempt Generator.
Included are RAATS (RCRA Administrative Action Tracking System) and CMEL (Compliance Monitoring & Enforcement List) facilities.
CONNECTICUT HAZARDOUS WASTE MANIFEST – Database of all shipments of hazardous waste within, into or from Connecticut. The data includes date of shipment, transporter and TSD info, and material shipped and quantity. This data is appended to the details of existing generator records.
MASSACHUSETTES HAZARDOUS WASTE GENERATOR – database of generators that are regulated under the MA DEP.
VQN-MA = generates less than 220 pounds or 27 gallons per month of hazardous waste or waste oil.
SQN-MA = generates 220 to 2,200 pounds or 27 to 270 gallons per month of waste oil.
LQG-MA = generates greater than 2,200 lbs of hazardous waste or waste oil per month.

**ERNS:** ***EPA/NRC*** EMERGENCY RESPONSE NOTIFICATION SYSTEM (ERNS) - Database of incidents

reported to the National Response Center. These incidents include chemical spills, accidents involving chemicals (such as fires or explosions), oil spills, transportation accidents that involve oil or chemicals, releases of radioactive materials, sightings of oil sheens on bodies of water, terrorist incidents involving chemicals, incidents where illegally dumped chemicals have been found, and drills intended to prepare responders to handle these kinds of incidents. Data since January 2001 has been received from the National Response System database as the EPA no longer maintains this data.

**State Spills 90:** ***CT DEP*** EMERGENCY RESPONSE ACTIONS AND SPILL RELEASES - database of oil and chemical spills. The database includes discharger, reporter, date of release, cause of incident, and emergency measurement information.

**State/Tribal LUST:** ***CT DEP*** LEAKING UNDERGROUND STORAGE TANKS(LUST) - database of lusts, the data reported includes actions, agency, class, and media affected

**State/Tribal UST/AST:** ***CT DEP*** REGISTERED UNDERGROUND STORAGE TANKS - database of underground storage tanks, the data includes capacity, substance stored, status, tank material and piping material.

**RADON:** ***NTIS*** NATIONAL RADON DATABASE - EPA radon data from 1990-1991 national radon project collected for a variety of zip codes across the United States.

### Notice of Disclaimer

Due to the limitations, constraints, inaccuracies and incompleteness of government information and computer mapping data currently available to FirstSearch Technology Corp., certain conventions have been utilized in preparing the locations of all federal, state and local agency sites residing in FirstSearch Technology Corp.'s databases. All EPA NPL and state landfill sites are depicted by a rectangle approximating their location and size. The boundaries of the rectangles represent the eastern and western most longitudes; the northern and southern most latitudes. As such, the mapped areas may exceed the actual areas and do not represent the actual boundaries of these properties. All other sites are depicted by a point representing their approximate address location and make no attempt to represent the actual areas of the associated property. Actual boundaries and locations of individual properties can be found in the files residing at the agency responsible for such information.

### Waiver of Liability

Although FirstSearch Technology Corp. uses its best efforts to research the actual location of each site, FirstSearch Technology Corp. does not and can not warrant the accuracy of these sites with regard to exact location and size. All authorized users of FirstSearch Technology Corp.'s services proceeding are signifying an understanding of FirstSearch Technology Corp.'s searching and mapping conventions, and agree to waive any and all liability claims associated with search and map results showing incomplete and or inaccurate site locations.

# Environmental FirstSearch Descriptions

**CERCLIS:** ***EPA*** COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM (CERCLIS)- CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL.
PART OF NPL- Site is part of NPL site
DELETED - Deleted from the Final NPL
FINAL - Currently on the Final NPL
NOT PROPOSED - Not on the NPL
NOT VALID - Not Valid Site or Incident
PROPOSED - Proposed for NPL
REMOVED - Removed from Proposed NPL
SCAN PLAN - Pre-proposal Site
WITHDRAWN - Withdrawn

**RCRA COR ACT:** ***EPA*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM SITES - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
RCRAInfo facilities that have reported violations and subject to corrective actions.

**RCRA TSD:** ***EPA*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM TREATMENT, STORAGE, and DISPOSAL FACILITIES. - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
Facilities that treat, store, dispose, or incinerate hazardous waste.

**RCRA GEN:** ***EPA/MA DEP/CT DEP*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM GENERATORS - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
Facilities that generate or transport hazardous waste or meet other RCRA requirements.
LGN - Large Quantity Generators
SGN - Small Quantity Generators
VGN – Conditionally Exempt Generator.
Included are RAATS (RCRA Administrative Action Tracking System) and CMEL (Compliance Monitoring & Enforcement List) facilities.
CONNECTICUT HAZARDOUS WASTE MANIFEST – Database of all shipments of hazardous waste within, into or from Connecticut. The data includes date of shipment, transporter and TSD info, and material shipped and quantity. This data is appended to the details of existing generator records.
MASSACHUSETTES HAZARDOUS WASTE GENERATOR – database of generators that are regulated under the MA DEP.
VQN-MA = generates less than 220 pounds or 27 gallons per month of hazardous waste or waste oil.
SQN-MA = generates 220 to 2,200 pounds or 27 to 270 gallons per month of waste oil.
LQG-MA = generates greater than 2,200 lbs of hazardous waste or waste oil per month.

**ERNS:** ***EPA/NRC*** EMERGENCY RESPONSE NOTIFICATION SYSTEM (ERNS) - Database of incidents

reported to the National Response Center. These incidents include chemical spills, accidents involving chemicals (such as fires or explosions), oil spills, transportation accidents that involve oil or chemicals, releases of radioactive materials, sightings of oil sheens on bodies of water, terrorist incidents involving chemicals, incidents where illegally dumped chemicals have been found, and drills intended to prepare responders to handle these kinds of incidents. Data since January 2001 has been received from the National Response System database as the EPA no longer maintains this data.

**State Spills 90:** ***CT DEP*** EMERGENCY RESPONSE ACTIONS AND SPILL RELEASES - database of oil and chemical spills. The database includes discharger, reporter, date of release, cause of incident, and emergency measurement information.

**State/Tribal LUST:** ***CT DEP*** LEAKING UNDERGROUND STORAGE TANKS(LUST) - database of lusts, the data reported includes actions, agency, class, and media affected

**State/Tribal UST/AST:** ***CT DEP*** REGISTERED UNDERGROUND STORAGE TANKS - database of underground storage tanks, the data includes capacity, substance stored, status, tank material and piping material.

**RADON:** ***NTIS*** NATIONAL RADON DATABASE - EPA radon data from 1990-1991 national radon project collected for a variety of zip codes across the United States.

### Notice of Disclaimer

Due to the limitations, constraints, inaccuracies and incompleteness of government information and computer mapping data currently available to FirstSearch Technology Corp., certain conventions have been utilized in preparing the locations of all federal, state and local agency sites residing in FirstSearch Technology Corp.'s databases. All EPA NPL and state landfill sites are depicted by a rectangle approximating their location and size. The boundaries of the rectangles represent the eastern and western most longitudes; the northern and southern most latitudes. As such, the mapped areas may exceed the actual areas and do not represent the actual boundaries of these properties. All other sites are depicted by a point representing their approximate address location and make no attempt to represent the actual areas of the associated property. Actual boundaries and locations of individual properties can be found in the files residing at the agency responsible for such information.

### Waiver of Liability

Although FirstSearch Technology Corp. uses its best efforts to research the actual location of each site, FirstSearch Technology Corp. does not and can not warrant the accuracy of these sites with regard to exact location and size. All authorized users of FirstSearch Technology Corp.'s services proceeding are signifying an understanding of FirstSearch Technology Corp.'s searching and mapping conventions, and agree to waive any and all liability claims associated with search and map results showing incomplete and or inaccurate site locations.

# Environmental FirstSearch Descriptions

**CERCLIS:** ***EPA*** COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM (CERCLIS)- CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL.
PART OF NPL- Site is part of NPL site
DELETED - Deleted from the Final NPL
FINAL - Currently on the Final NPL
NOT PROPOSED - Not on the NPL
NOT VALID - Not Valid Site or Incident
PROPOSED - Proposed for NPL
REMOVED - Removed from Proposed NPL
SCAN PLAN - Pre-proposal Site
WITHDRAWN - Withdrawn

**RCRA COR ACT:** ***EPA*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM SITES - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
RCRAInfo facilities that have reported violations and subject to corrective actions.

**RCRA TSD:** ***EPA*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM TREATMENT, STORAGE, and DISPOSAL FACILITIES. - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
Facilities that treat, store, dispose, or incinerate hazardous waste.

**RCRA GEN:** ***EPA/MA DEP/CT DEP*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM GENERATORS - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
Facilities that generate or transport hazardous waste or meet other RCRA requirements.
LGN - Large Quantity Generators
SGN - Small Quantity Generators
VGN – Conditionally Exempt Generator.
Included are RAATS (RCRA Administrative Action Tracking System) and CMEL (Compliance Monitoring & Enforcement List) facilities.
CONNECTICUT HAZARDOUS WASTE MANIFEST – Database of all shipments of hazardous waste within, into or from Connecticut. The data includes date of shipment, transporter and TSD info, and material shipped and quantity. This data is appended to the details of existing generator records.
MASSACHUSETTES HAZARDOUS WASTE GENERATOR – database of generators that are regulated under the MA DEP.
VQN-MA = generates less than 220 pounds or 27 gallons per month of hazardous waste or waste oil.
SQN-MA = generates 220 to 2,200 pounds or 27 to 270 gallons per month of waste oil.
LQG-MA = generates greater than 2,200 lbs of hazardous waste or waste oil per month.

**ERNS:** ***EPA/NRC*** EMERGENCY RESPONSE NOTIFICATION SYSTEM (ERNS) - Database of incidents

reported to the National Response Center. These incidents include chemical spills, accidents involving chemicals (such as fires or explosions), oil spills, transportation accidents that involve oil or chemicals, releases of radioactive materials, sightings of oil sheens on bodies of water, terrorist incidents involving chemicals, incidents where illegally dumped chemicals have been found, and drills intended to prepare responders to handle these kinds of incidents. Data since January 2001 has been received from the National Response System database as the EPA no longer maintains this data.

**State Spills 90:** ***CT DEP*** EMERGENCY RESPONSE ACTIONS AND SPILL RELEASES - database of oil and chemical spills. The database includes discharger, reporter, date of release, cause of incident, and emergency measurement information.

**State/Tribal LUST:** ***CT DEP*** LEAKING UNDERGROUND STORAGE TANKS(LUST) - database of lusts, the data reported includes actions, agency, class, and media affected

**State/Tribal UST/AST:** ***CT DEP*** REGISTERED UNDERGROUND STORAGE TANKS - database of underground storage tanks, the data includes capacity, substance stored, status, tank material and piping material.

**RADON:** ***NTIS*** NATIONAL RADON DATABASE - EPA radon data from 1990-1991 national radon project collected for a variety of zip codes across the United States.

**HAZARDOUS WASTE INFORMATION:**

Corrosive waste
Chromium
D000
F017
Lead
The following spent non-halogenated solvents: Xylene, acetone, ethyl acetate, ethyl benzene, ethyl ether, methyl isobutyl ketone, n-butyl alcohol, cyclohexanone, and methanol; all spent solvent mixtures/ blends containing, b
Ignitable waste
The following spent non-halogenated solvents: toluene, methyl ethyl ketone, carbon disulfide, isobutanol, pyridine, benzene, 2-ethoxyethanol, and 2-nitropropane; all spent solvent mixtures/blends containing, before use, a to

# Environmental FirstSearch Descriptions

**CERCLIS:** ***EPA*** COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM (CERCLIS)- CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL.
PART OF NPL- Site is part of NPL site
DELETED - Deleted from the Final NPL
FINAL - Currently on the Final NPL
NOT PROPOSED - Not on the NPL
NOT VALID - Not Valid Site or Incident
PROPOSED - Proposed for NPL
REMOVED - Removed from Proposed NPL
SCAN PLAN - Pre-proposal Site
WITHDRAWN - Withdrawn

**RCRA COR ACT:** ***EPA*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM SITES - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
RCRAInfo facilities that have reported violations and subject to corrective actions.

**RCRA TSD:** ***EPA*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM TREATMENT, STORAGE, and DISPOSAL FACILITIES. - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
Facilities that treat, store, dispose, or incinerate hazardous waste.

**RCRA GEN:** ***EPA/MA DEP/CT DEP*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM GENERATORS - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
Facilities that generate or transport hazardous waste or meet other RCRA requirements.
LGN - Large Quantity Generators
SGN - Small Quantity Generators
VGN – Conditionally Exempt Generator.
Included are RAATS (RCRA Administrative Action Tracking System) and CMEL (Compliance Monitoring & Enforcement List) facilities.
CONNECTICUT HAZARDOUS WASTE MANIFEST – Database of all shipments of hazardous waste within, into or from Connecticut. The data includes date of shipment, transporter and TSD info, and material shipped and quantity. This data is appended to the details of existing generator records.
MASSACHUSETTES HAZARDOUS WASTE GENERATOR – database of generators that are regulated under the MA DEP.
VQN-MA = generates less than 220 pounds or 27 gallons per month of hazardous waste or waste oil.
SQN-MA = generates 220 to 2,200 pounds or 27 to 270 gallons per month of waste oil.
LQG-MA = generates greater than 2,200 lbs of hazardous waste or waste oil per month.

**ERNS:** ***EPA/NRC*** EMERGENCY RESPONSE NOTIFICATION SYSTEM (ERNS) - Database of incidents

reported to the National Response Center. These incidents include chemical spills, accidents involving chemicals (such as fires or explosions), oil spills, transportation accidents that involve oil or chemicals, releases of radioactive materials, sightings of oil sheens on bodies of water, terrorist incidents involving chemicals, incidents where illegally dumped chemicals have been found, and drills intended to prepare responders to handle these kinds of incidents. Data since January 2001 has been received from the National Response System database as the EPA no longer maintains this data.

**State Spills 90:** ***CT DEP*** EMERGENCY RESPONSE ACTIONS AND SPILL RELEASES - database of oil and chemical spills. The database includes discharger, reporter, date of release, cause of incident, and emergency measurement information.

**State/Tribal LUST:** ***CT DEP*** LEAKING UNDERGROUND STORAGE TANKS(LUST) - database of lusts, the data reported includes actions, agency, class, and media affected

**State/Tribal UST/AST:** ***CT DEP*** REGISTERED UNDERGROUND STORAGE TANKS - database of underground storage tanks, the data includes capacity, substance stored, status, tank material and piping material.

**RADON:** ***NTIS*** NATIONAL RADON DATABASE - EPA radon data from 1990-1991 national radon project collected for a variety of zip codes across the United States.

### Notice of Disclaimer

Due to the limitations, constraints, inaccuracies and incompleteness of government information and computer mapping data currently available to FirstSearch Technology Corp., certain conventions have been utilized in preparing the locations of all federal, state and local agency sites residing in FirstSearch Technology Corp.'s databases. All EPA NPL and state landfill sites are depicted by a rectangle approximating their location and size. The boundaries of the rectangles represent the eastern and western most longitudes; the northern and southern most latitudes. As such, the mapped areas may exceed the actual areas and do not represent the actual boundaries of these properties. All other sites are depicted by a point representing their approximate address location and make no attempt to represent the actual areas of the associated property. Actual boundaries and locations of individual properties can be found in the files residing at the agency responsible for such information.

### Waiver of Liability

Although FirstSearch Technology Corp. uses its best efforts to research the actual location of each site, FirstSearch Technology Corp. does not and can not warrant the accuracy of these sites with regard to exact location and size. All authorized users of FirstSearch Technology Corp.'s services proceeding are signifying an understanding of FirstSearch Technology Corp.'s searching and mapping conventions, and agree to waive any and all liability claims associated with search and map results showing incomplete and or inaccurate site locations.

**VIOLATION INFORMATION:**

**HAZARDOUS WASTE INFORMATION:**

The following spent non-halogenated solvents: toluene, methyl ethyl ketone, carbon disulfide, isobutanol, pyridine, benzene, 2-ethoxyethanol, and 2-nitropropane; all spent solvent mixtures/blends containing, before use, a to
Trichloroethylene
Mercury
Lead
Ignitable waste
Corrosive waste
The following spent non-halogenated solvents: Xylene, acetone, ethyl acetate, ethyl benzene, ethyl ether, methyl isobutyl ketone, n-butyl alcohol, cyclohexanone, and methanol; all spent solvent mixtures/ blends containing, b
Methyl ethyl ketone

# Environmental FirstSearch Descriptions

**CERCLIS:** ***EPA*** COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM (CERCLIS)- CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL.
PART OF NPL- Site is part of NPL site
DELETED - Deleted from the Final NPL
FINAL - Currently on the Final NPL
NOT PROPOSED - Not on the NPL
NOT VALID - Not Valid Site or Incident
PROPOSED - Proposed for NPL
REMOVED - Removed from Proposed NPL
SCAN PLAN - Pre-proposal Site
WITHDRAWN - Withdrawn

**RCRA COR ACT:** ***EPA*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM SITES - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
RCRAInfo facilities that have reported violations and subject to corrective actions.

**RCRA TSD:** ***EPA*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM TREATMENT, STORAGE, and DISPOSAL FACILITIES. - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
Facilities that treat, store, dispose, or incinerate hazardous waste.

**RCRA GEN:** ***EPA/MA DEP/CT DEP*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM GENERATORS - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
Facilities that generate or transport hazardous waste or meet other RCRA requirements.
LGN - Large Quantity Generators
SGN - Small Quantity Generators
VGN – Conditionally Exempt Generator.
Included are RAATS (RCRA Administrative Action Tracking System) and CMEL (Compliance Monitoring & Enforcement List) facilities.
CONNECTICUT HAZARDOUS WASTE MANIFEST – Database of all shipments of hazardous waste within, into or from Connecticut. The data includes date of shipment, transporter and TSD info, and material shipped and quantity. This data is appended to the details of existing generator records.
MASSACHUSETTES HAZARDOUS WASTE GENERATOR – database of generators that are regulated under the MA DEP.
VQN-MA = generates less than 220 pounds or 27 gallons per month of hazardous waste or waste oil.
SQN-MA = generates 220 to 2,200 pounds or 27 to 270 gallons per month of waste oil.
LQG-MA = generates greater than 2,200 lbs of hazardous waste or waste oil per month.

**ERNS:** ***EPA/NRC*** EMERGENCY RESPONSE NOTIFICATION SYSTEM (ERNS) - Database of incidents

reported to the National Response Center. These incidents include chemical spills, accidents involving chemicals (such as fires or explosions), oil spills, transportation accidents that involve oil or chemicals, releases of radioactive materials, sightings of oil sheens on bodies of water, terrorist incidents involving chemicals, incidents where illegally dumped chemicals have been found, and drills intended to prepare responders to handle these kinds of incidents. Data since January 2001 has been received from the National Response System database as the EPA no longer maintains this data.

**State Spills 90:** ***CT DEP*** EMERGENCY RESPONSE ACTIONS AND SPILL RELEASES - database of oil and chemical spills. The database includes discharger, reporter, date of release, cause of incident, and emergency measurement information.

**State/Tribal LUST:** ***CT DEP*** LEAKING UNDERGROUND STORAGE TANKS(LUST) - database of lusts, the data reported includes actions, agency, class, and media affected

**State/Tribal UST/AST:** ***CT DEP*** REGISTERED UNDERGROUND STORAGE TANKS - database of underground storage tanks, the data includes capacity, substance stored, status, tank material and piping material.

**RADON:** ***NTIS*** NATIONAL RADON DATABASE - EPA radon data from 1990-1991 national radon project collected for a variety of zip codes across the United States.

### Notice of Disclaimer

Due to the limitations, constraints, inaccuracies and incompleteness of government information and computer mapping data currently available to FirstSearch Technology Corp., certain conventions have been utilized in preparing the locations of all federal, state and local agency sites residing in FirstSearch Technology Corp.'s databases. All EPA NPL and state landfill sites are depicted by a rectangle approximating their location and size. The boundaries of the rectangles represent the eastern and western most longitudes; the northern and southern most latitudes. As such, the mapped areas may exceed the actual areas and do not represent the actual boundaries of these properties. All other sites are depicted by a point representing their approximate address location and make no attempt to represent the actual areas of the associated property. Actual boundaries and locations of individual properties can be found in the files residing at the agency responsible for such information.

### Waiver of Liability

Although FirstSearch Technology Corp. uses its best efforts to research the actual location of each site, FirstSearch Technology Corp. does not and can not warrant the accuracy of these sites with regard to exact location and size. All authorized users of FirstSearch Technology Corp.'s services proceeding are signifying an understanding of FirstSearch Technology Corp.'s searching and mapping conventions, and agree to waive any and all liability claims associated with search and map results showing incomplete and or inaccurate site locations.

# Environmental FirstSearch Descriptions

**CERCLIS:** ***EPA*** COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM (CERCLIS)- CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL.
PART OF NPL- Site is part of NPL site
DELETED - Deleted from the Final NPL
FINAL - Currently on the Final NPL
NOT PROPOSED - Not on the NPL
NOT VALID - Not Valid Site or Incident
PROPOSED - Proposed for NPL
REMOVED - Removed from Proposed NPL
SCAN PLAN - Pre-proposal Site
WITHDRAWN - Withdrawn

**RCRA COR ACT:** ***EPA*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM SITES - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
RCRAInfo facilities that have reported violations and subject to corrective actions.

**RCRA TSD:** ***EPA*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM TREATMENT, STORAGE, and DISPOSAL FACILITIES. - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
Facilities that treat, store, dispose, or incinerate hazardous waste.

**RCRA GEN:** ***EPA/MA DEP/CT DEP*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM GENERATORS - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
Facilities that generate or transport hazardous waste or meet other RCRA requirements.
LGN - Large Quantity Generators
SGN - Small Quantity Generators
VGN – Conditionally Exempt Generator.
Included are RAATS (RCRA Administrative Action Tracking System) and CMEL (Compliance Monitoring & Enforcement List) facilities.
CONNECTICUT HAZARDOUS WASTE MANIFEST – Database of all shipments of hazardous waste within, into or from Connecticut. The data includes date of shipment, transporter and TSD info, and material shipped and quantity. This data is appended to the details of existing generator records.
MASSACHUSETTES HAZARDOUS WASTE GENERATOR – database of generators that are regulated under the MA DEP.
VQN-MA = generates less than 220 pounds or 27 gallons per month of hazardous waste or waste oil.
SQN-MA = generates 220 to 2,200 pounds or 27 to 270 gallons per month of waste oil.
LQG-MA = generates greater than 2,200 lbs of hazardous waste or waste oil per month.

**ERNS:** ***EPA/NRC*** EMERGENCY RESPONSE NOTIFICATION SYSTEM (ERNS) - Database of incidents

reported to the National Response Center. These incidents include chemical spills, accidents involving chemicals (such as fires or explosions), oil spills, transportation accidents that involve oil or chemicals, releases of radioactive materials, sightings of oil sheens on bodies of water, terrorist incidents involving chemicals, incidents where illegally dumped chemicals have been found, and drills intended to prepare responders to handle these kinds of incidents. Data since January 2001 has been received from the National Response System database as the EPA no longer maintains this data.

**State Spills 90:** ***CT DEP*** EMERGENCY RESPONSE ACTIONS AND SPILL RELEASES - database of oil and chemical spills. The database includes discharger, reporter, date of release, cause of incident, and emergency measurement information.

**State/Tribal LUST:** ***CT DEP*** LEAKING UNDERGROUND STORAGE TANKS(LUST) - database of lusts, the data reported includes actions, agency, class, and media affected

**State/Tribal UST/AST:** ***CT DEP*** REGISTERED UNDERGROUND STORAGE TANKS - database of underground storage tanks, the data includes capacity, substance stored, status, tank material and piping material.

**RADON:** ***NTIS*** NATIONAL RADON DATABASE - EPA radon data from 1990-1991 national radon project collected for a variety of zip codes across the United States.

### Notice of Disclaimer

Due to the limitations, constraints, inaccuracies and incompleteness of government information and computer mapping data currently available to FirstSearch Technology Corp., certain conventions have been utilized in preparing the locations of all federal, state and local agency sites residing in FirstSearch Technology Corp.'s databases. All EPA NPL and state landfill sites are depicted by a rectangle approximating their location and size. The boundaries of the rectangles represent the eastern and western most longitudes; the northern and southern most latitudes. As such, the mapped areas may exceed the actual areas and do not represent the actual boundaries of these properties. All other sites are depicted by a point representing their approximate address location and make no attempt to represent the actual areas of the associated property. Actual boundaries and locations of individual properties can be found in the files residing at the agency responsible for such information.

### Waiver of Liability

Although FirstSearch Technology Corp. uses its best efforts to research the actual location of each site, FirstSearch Technology Corp. does not and can not warrant the accuracy of these sites with regard to exact location and size. All authorized users of FirstSearch Technology Corp.'s services proceeding are signifying an understanding of FirstSearch Technology Corp.'s searching and mapping conventions, and agree to waive any and all liability claims associated with search and map results showing incomplete and or inaccurate site locations.

**HAZARDOUS WASTE INFORMATION:**

Spent cyanide plating bath solutions from electroplating operations.
The following spent non-halogenated solvents: toluene, methyl ethyl ketone, carbon disulfide, isobutanol, pyridine, benzene, 2-ethoxyethanol, and 2-nitropropane; all spent solvent mixtures/blends containing, before use, a to
Spent stripping and cleaning bath solutions from electroplating operations in which cyanides are used in the process.
Reactive waste
Ignitable waste
Ethene, tetrachloro- (OR) Tetrachloroethylene
Corrosive waste
Chromium
Wastewater treatment sludges from electroplating operations except from the following processes: (1) sulfuric acid anodizing of aluminum; (2) tin plating on carbon steel; (3) zinc plating (segregated basis) on carbon steel;
Lead
The following spent halogenated solvents used in degreasing: Tetrachloroethylene, trichlorethylene, methylene chloride, 1,1,1-trichloroethane, carbon tetrachloride and chlorinated fluorocarbons; all spent solvent mixtures/bl

# Environmental FirstSearch Descriptions

**CERCLIS:** ***EPA*** COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM (CERCLIS)- CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL.
PART OF NPL- Site is part of NPL site
DELETED - Deleted from the Final NPL
FINAL - Currently on the Final NPL
NOT PROPOSED - Not on the NPL
NOT VALID - Not Valid Site or Incident
PROPOSED - Proposed for NPL
REMOVED - Removed from Proposed NPL
SCAN PLAN - Pre-proposal Site
WITHDRAWN - Withdrawn

**RCRA COR ACT:** ***EPA*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM SITES - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
RCRAInfo facilities that have reported violations and subject to corrective actions.

**RCRA TSD:** ***EPA*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM TREATMENT, STORAGE, and DISPOSAL FACILITIES. - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
Facilities that treat, store, dispose, or incinerate hazardous waste.

**RCRA GEN:** ***EPA/MA DEP/CT DEP*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM GENERATORS - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
Facilities that generate or transport hazardous waste or meet other RCRA requirements.
LGN - Large Quantity Generators
SGN - Small Quantity Generators
VGN – Conditionally Exempt Generator.
Included are RAATS (RCRA Administrative Action Tracking System) and CMEL (Compliance Monitoring & Enforcement List) facilities.
CONNECTICUT HAZARDOUS WASTE MANIFEST – Database of all shipments of hazardous waste within, into or from Connecticut. The data includes date of shipment, transporter and TSD info, and material shipped and quantity. This data is appended to the details of existing generator records.
MASSACHUSETTES HAZARDOUS WASTE GENERATOR – database of generators that are regulated under the MA DEP.
VQN-MA = generates less than 220 pounds or 27 gallons per month of hazardous waste or waste oil.
SQN-MA = generates 220 to 2,200 pounds or 27 to 270 gallons per month of waste oil.
LQG-MA = generates greater than 2,200 lbs of hazardous waste or waste oil per month.

**ERNS:** ***EPA/NRC*** EMERGENCY RESPONSE NOTIFICATION SYSTEM (ERNS) - Database of incidents

reported to the National Response Center. These incidents include chemical spills, accidents involving chemicals (such as fires or explosions), oil spills, transportation accidents that involve oil or chemicals, releases of radioactive materials, sightings of oil sheens on bodies of water, terrorist incidents involving chemicals, incidents where illegally dumped chemicals have been found, and drills intended to prepare responders to handle these kinds of incidents. Data since January 2001 has been received from the National Response System database as the EPA no longer maintains this data.

**State Spills 90:** ***CT DEP*** EMERGENCY RESPONSE ACTIONS AND SPILL RELEASES - database of oil and chemical spills. The database includes discharger, reporter, date of release, cause of incident, and emergency measurement information.

**State/Tribal LUST:** ***CT DEP*** LEAKING UNDERGROUND STORAGE TANKS(LUST) - database of lusts, the data reported includes actions, agency, class, and media affected

**State/Tribal UST/AST:** ***CT DEP*** REGISTERED UNDERGROUND STORAGE TANKS - database of underground storage tanks, the data includes capacity, substance stored, status, tank material and piping material.

**RADON:** ***NTIS*** NATIONAL RADON DATABASE - EPA radon data from 1990-1991 national radon project collected for a variety of zip codes across the United States.

### Notice of Disclaimer

Due to the limitations, constraints, inaccuracies and incompleteness of government information and computer mapping data currently available to FirstSearch Technology Corp., certain conventions have been utilized in preparing the locations of all federal, state and local agency sites residing in FirstSearch Technology Corp.'s databases. All EPA NPL and state landfill sites are depicted by a rectangle approximating their location and size. The boundaries of the rectangles represent the eastern and western most longitudes; the northern and southern most latitudes. As such, the mapped areas may exceed the actual areas and do not represent the actual boundaries of these properties. All other sites are depicted by a point representing their approximate address location and make no attempt to represent the actual areas of the associated property. Actual boundaries and locations of individual properties can be found in the files residing at the agency responsible for such information.

### Waiver of Liability

Although FirstSearch Technology Corp. uses its best efforts to research the actual location of each site, FirstSearch Technology Corp. does not and can not warrant the accuracy of these sites with regard to exact location and size. All authorized users of FirstSearch Technology Corp.'s services proceeding are signifying an understanding of FirstSearch Technology Corp.'s searching and mapping conventions, and agree to waive any and all liability claims associated with search and map results showing incomplete and or inaccurate site locations.

# Environmental FirstSearch Descriptions

**CERCLIS:** ***EPA*** COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM (CERCLIS)- CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL.
PART OF NPL- Site is part of NPL site
DELETED - Deleted from the Final NPL
FINAL - Currently on the Final NPL
NOT PROPOSED - Not on the NPL
NOT VALID - Not Valid Site or Incident
PROPOSED - Proposed for NPL
REMOVED - Removed from Proposed NPL
SCAN PLAN - Pre-proposal Site
WITHDRAWN - Withdrawn

**RCRA COR ACT:** ***EPA*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM SITES - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
RCRAInfo facilities that have reported violations and subject to corrective actions.

**RCRA TSD:** ***EPA*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM TREATMENT, STORAGE, and DISPOSAL FACILITIES. - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
Facilities that treat, store, dispose, or incinerate hazardous waste.

**RCRA GEN:** ***EPA/MA DEP/CT DEP*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM GENERATORS - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
Facilities that generate or transport hazardous waste or meet other RCRA requirements.
LGN - Large Quantity Generators
SGN - Small Quantity Generators
VGN – Conditionally Exempt Generator.
Included are RAATS (RCRA Administrative Action Tracking System) and CMEL (Compliance Monitoring & Enforcement List) facilities.
CONNECTICUT HAZARDOUS WASTE MANIFEST – Database of all shipments of hazardous waste within, into or from Connecticut. The data includes date of shipment, transporter and TSD info, and material shipped and quantity. This data is appended to the details of existing generator records.
MASSACHUSETTES HAZARDOUS WASTE GENERATOR – database of generators that are regulated under the MA DEP.
VQN-MA = generates less than 220 pounds or 27 gallons per month of hazardous waste or waste oil.
SQN-MA = generates 220 to 2,200 pounds or 27 to 270 gallons per month of waste oil.
LQG-MA = generates greater than 2,200 lbs of hazardous waste or waste oil per month.

**ERNS:** ***EPA/NRC*** EMERGENCY RESPONSE NOTIFICATION SYSTEM (ERNS) - Database of incidents

reported to the National Response Center. These incidents include chemical spills, accidents involving chemicals (such as fires or explosions), oil spills, transportation accidents that involve oil or chemicals, releases of radioactive materials, sightings of oil sheens on bodies of water, terrorist incidents involving chemicals, incidents where illegally dumped chemicals have been found, and drills intended to prepare responders to handle these kinds of incidents. Data since January 2001 has been received from the National Response System database as the EPA no longer maintains this data.

**State Spills 90:** ***CT DEP*** EMERGENCY RESPONSE ACTIONS AND SPILL RELEASES - database of oil and chemical spills. The database includes discharger, reporter, date of release, cause of incident, and emergency measurement information.

**State/Tribal LUST:** ***CT DEP*** LEAKING UNDERGROUND STORAGE TANKS(LUST) - database of lusts, the data reported includes actions, agency, class, and media affected

**State/Tribal UST/AST:** ***CT DEP*** REGISTERED UNDERGROUND STORAGE TANKS - database of underground storage tanks, the data includes capacity, substance stored, status, tank material and piping material.

**RADON:** ***NTIS*** NATIONAL RADON DATABASE - EPA radon data from 1990-1991 national radon project collected for a variety of zip codes across the United States.

### Notice of Disclaimer

Due to the limitations, constraints, inaccuracies and incompleteness of government information and computer mapping data currently available to FirstSearch Technology Corp., certain conventions have been utilized in preparing the locations of all federal, state and local agency sites residing in FirstSearch Technology Corp.'s databases. All EPA NPL and state landfill sites are depicted by a rectangle approximating their location and size. The boundaries of the rectangles represent the eastern and western most longitudes; the northern and southern most latitudes. As such, the mapped areas may exceed the actual areas and do not represent the actual boundaries of these properties. All other sites are depicted by a point representing their approximate address location and make no attempt to represent the actual areas of the associated property. Actual boundaries and locations of individual properties can be found in the files residing at the agency responsible for such information.

### Waiver of Liability

Although FirstSearch Technology Corp. uses its best efforts to research the actual location of each site, FirstSearch Technology Corp. does not and can not warrant the accuracy of these sites with regard to exact location and size. All authorized users of FirstSearch Technology Corp.'s services proceeding are signifying an understanding of FirstSearch Technology Corp.'s searching and mapping conventions, and agree to waive any and all liability claims associated with search and map results showing incomplete and or inaccurate site locations.

# Environmental FirstSearch Descriptions

**CERCLIS:** ***EPA*** COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM (CERCLIS)- CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL.
PART OF NPL- Site is part of NPL site
DELETED - Deleted from the Final NPL
FINAL - Currently on the Final NPL
NOT PROPOSED - Not on the NPL
NOT VALID - Not Valid Site or Incident
PROPOSED - Proposed for NPL
REMOVED - Removed from Proposed NPL
SCAN PLAN - Pre-proposal Site
WITHDRAWN - Withdrawn

**RCRA COR ACT:** ***EPA*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM SITES - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
RCRAInfo facilities that have reported violations and subject to corrective actions.

**RCRA TSD:** ***EPA*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM TREATMENT, STORAGE, and DISPOSAL FACILITIES. - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
Facilities that treat, store, dispose, or incinerate hazardous waste.

**RCRA GEN:** ***EPA/MA DEP/CT DEP*** RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM GENERATORS - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
Facilities that generate or transport hazardous waste or meet other RCRA requirements.
LGN - Large Quantity Generators
SGN - Small Quantity Generators
VGN – Conditionally Exempt Generator.
Included are RAATS (RCRA Administrative Action Tracking System) and CMEL (Compliance Monitoring & Enforcement List) facilities.
CONNECTICUT HAZARDOUS WASTE MANIFEST – Database of all shipments of hazardous waste within, into or from Connecticut. The data includes date of shipment, transporter and TSD info, and material shipped and quantity. This data is appended to the details of existing generator records.
MASSACHUSETTES HAZARDOUS WASTE GENERATOR – database of generators that are regulated under the MA DEP.
VQN-MA = generates less than 220 pounds or 27 gallons per month of hazardous waste or waste oil.
SQN-MA = generates 220 to 2,200 pounds or 27 to 270 gallons per month of waste oil.
LQG-MA = generates greater than 2,200 lbs of hazardous waste or waste oil per month.

**ERNS:** ***EPA/NRC*** EMERGENCY RESPONSE NOTIFICATION SYSTEM (ERNS) - Database of incidents

reported to the National Response Center. These incidents include chemical spills, accidents involving chemicals (such as fires or explosions), oil spills, transportation accidents that involve oil or chemicals, releases of radioactive materials, sightings of oil sheens on bodies of water, terrorist incidents involving chemicals, incidents where illegally dumped chemicals have been found, and drills intended to prepare responders to handle these kinds of incidents. Data since January 2001 has been received from the National Response System database as the EPA no longer maintains this data.

**State Spills 90:** ***CT DEP*** EMERGENCY RESPONSE ACTIONS AND SPILL RELEASES - database of oil and chemical spills. The database includes discharger, reporter, date of release, cause of incident, and emergency measurement information.

**State/Tribal LUST:** ***CT DEP*** LEAKING UNDERGROUND STORAGE TANKS(LUST) - database of lusts, the data reported includes actions, agency, class, and media affected

**State/Tribal UST/AST:** ***CT DEP*** REGISTERED UNDERGROUND STORAGE TANKS - database of underground storage tanks, the data includes capacity, substance stored, status, tank material and piping material.

**RADON:** ***NTIS*** NATIONAL RADON DATABASE - EPA radon data from 1990-1991 national radon project collected for a variety of zip codes across the United States.

PASTE OVER ORIGINAL REPORT — DANBURY, CONN.

## NEW REPORT, May, 1940

**POPULATION: 26,000**

**Prevailing Winds:—West.**

PAVING:—120 miles paved streets.

GRADES:—Nearly level.

### WATER FACILITIES

Owned by City. Source from streams and run off. Gravity system. Pandarum Reservoir, capacity 41,000,000 gallons, water pumped to Marjorie Reservoir by 1 DeLaval pump, capacity 1,000,000 gallons per day. Lower Kohanza Reservoir, capacity 23,500,000 gallons. Marjorie Reservoir, capacity 1,150,000,000 gallons, elevated 624'. Upper Kohanza Reservoir, capacity 117,500,000 gallons. Bonge Pond Reservoir, capacity 231,000,000 gallons. West Lake Reservoir, capacity 1,304,000,000 gallons, elevated 612'. East Lake Reservoir, capacity 392,000,000 gallons, gravity to Marjorie Reservoir.

90 miles of pipe. 600 double and triple hydrants. Average daily consumption 6,000,000 gallons. Pressure at City Hall 75 to 90 lbs.

### FIRE DEPARTMENT

3 fully paid and 7 volunteer companies. 1 chief, 2 assistant chiefs, 3 captains and 23 men, fully paid. 280 volunteers. 8 stations.

2 Mack triple combination 750 and 500 gallons per minute respectively, with 100 gallon booster tank on each. 1 Auto Car triple combination, capacity 500 gallons per minute, with 100 gallon booster tank. 1 Maxim triple combination, capacity 600 gallons per minute, with 100 gallon booster tank. 1 Seagrave combination, capacity 400 gallons per minute, with 100 gallon booster tank. 1 City Service truck, 1 chief's car. 1 Ford pick-up truck. 2 hose trucks with 80 gallon chemical tank on each. 3 hose trucks.

In Reserve: 2 American-LaFrance triple combinations, capacity 750 and 350 gallons per minute respectively with 40 gallon chemical tank on each. 12,000' 2½" hose and 900' chemical hose.

Gamewell fire alarm system. 78 boxes. Headquarters in brick building at 5-7 Ives St.

### FIRE-RESISTIVE ROOFING ORDINANCE.

Ordinance prohibits wooden shingle roofs, adopted July 7, 1921. Wooden shingle roofs are prohibited from being placed on buildings within the Fire District or the Secondary Fire District.

NOTE:—Alternate house numbers are actual and are those found upon buildings. As a means of designation, consecutive numbers have been supplied to houses not having actual numbers.

I have examined the new insurance map of New Milford, Conn., issued by the Sanborn Map and Publishing Co. Ltd. of Nassau and New York and find it very much pleased with it. It is three times the size of former map and includes all Specials within one mile. I cordially recommend it to all ins. cos. doing business in New Milford.

NORWALK

FAIRFIELD COUNTY, CONNECTICUT

# NEW REPORT, AUGUST, 1959

## CITY IN GENERAL

POPULATION: 63,000 (Estimated).

METEOROLOGY: Prevailing winds W.

TOPOGRAPHY: Elevations range from sea level to 300' in northern residential area's. Business area is practically level.

STREETS: Approximately 5% streets unimproved.

## FIRE FIGHTING FACILITIES

WATER SUPPLY: Municipally owned. Two gravity systems supplied by East Branch of Silvermine River and Wilton Brook.

1st Water District:

Storage capacity 2,237,000.
Pressure range 40 - 110 lbs.
Average pressure 98 lbs.
Average daily consumption 4,100,000 G.P.D.

2nd Water District:

Storage capacity 915,000 gallons.
Pressure range 60 - 100 lbs.
Average pressure 75 lbs.
Average daily consumption 3,500,000 gallons.

FIRE DEPT.: Fully paid with 1 chief, 104 firemen and 225 volunteers. 5 stations.

9 combination pumper, hose and booster trucks, 2 aerial ladder trucks and 1 hook and ladder truck.

FIRE ALARM: Gamewell system with headquarters at Central Fire Station.

## STRUCTURAL REGULATIONS

ROOFING: Wood shingles prohibited within City Limits.

All information contained in this map, covering properties that might be related to National Defense activities, is to be treated as strictly confidential by our subscribers and not divulged to any outside interests. The U. S. Espionage Act makes it incumbent upon possessors of information relating to National Defense to take all possible precautions to prevent it from falling into the hands of interests inimical to the United States. Tracings or other reproductions of Sanborn Maps in full or in part are prohibited.

POPULATION:—41,717

Prevailing Winds:—West.

## WATER FACILITIES

FIRST DISTRICT.—Wall St., near W. Avenue.—Owned by the City, installed 1901-1905. Gravity pressure system. Supply from reservoirs, fed by Silvermine River. Park Reservoir, located 10 miles north of City Hall, capacity 50,000,000 gallons, elevated 320' above high water. Broom Reservoir, located 10 miles north of City Hall, capacity 310,000,000 gallons, elevated 420' above high water. Grupe Reservoir, located 8 miles north of City Hall, capacity 62,000,000 gallons, elevated 296' above high water. 1 distributing reservoir, located 1½ miles north of City Hall, capacity 4,500,000 gallons, elevated 114' above high water. First and Second Districts supply the Third and Fifth Districts.

74½ miles of 4" to 24" mains. 323 hydrants. Average daily consumption 5,500,000 gallons for both districts. Pressure at City Hall varies from 74 lbs. to 90 lbs.

76 miles of 4" to 20" mains. 329 hydrants. Average pressure at Wall and Commerce Sts. 74 to 81 lbs.

## FIRE DEPARTMENT

1 chief, 3 departments chiefs and 34 men, fully paid. 25 call men. 3 stations.

Gamewell fire alarm system. First and Second Districts; Lyons System in Third District. 103 boxes.

ROWAYTON FIRE DEPARTMENT:—1 station Sixth Taxing District. Volunteer. 40 men. 1 Pirsch 1250 gallon per minute pumper with 1,000' 2½" hose. 1 Seagrave 1000 gallon per minute pumper with one 1000 gallon booster tank and 700' 2½" hose.

HARBORVIEW FIRE DEPARTMENT:—Horse reel 1000' 2½" hose, 60 gallon chemical tank.

Alarm by electric siren on Fire House.

NO FIRE LIMITS.

NO FIRE-RESISTIVE ROOFING ORDINANCE

*Population 7,000. Prevailing Winds, West*

### WATER FACILITIES

Gravity system of water works owned by the city of Norwalk, and constructed 1871-1873. Water supply from Silver Mine River which furnishes water for the following reservoirs - Scott Storage reservoir, ½ miles North of Post off., 320 ft. above tide water, capacity 50 million galls., Brown storage reservoir, 3 miles North of Post off, 428 ft. above tide water, capacity 201 million galls., and Crupe storage reservoir, 7 miles North of Post off., 294 ft. above tide water, capacity 82 million galls.

Distributing reservoir ¼ mile West of Post off, 197 ft above tide water, capacity 48 million galls., supplied by Scott and Brown reservoir by open stream and from Crupe reservoir by 12 cement, and 16"cen pipes, the latter can be connected directly to mains.

53 miles of water pipes, 4"to16" diam., of which 44 miles are cement pipes. 208 hydrants. Pressure 75 lbs per sq. inch at Post off. Pressure direct from Crupe reservoir 130 lbs. Average daily consumption 2¼ million galls.

Four connections with South Norwalk

### FIRE DEPARTMENT

Partly paid, one chief, two assistants, three permanent men, 100 call men. Four permanent horses. Connewell fire alarm system. 23 boxes. Bell and whistle alarm.

One 1st class La France steam fire engine. One auto. combination chemical and hose wagon, with 750 ft. 2½" cotton, rubber lined hose, 35 gal. chemical tank, and 250 ft. chemical hose. One hook & ladder truck, with two 40 gal. chemical tanks and 1000 ft. chemical hose. 500 ft hose in reserve. 1 supply wagon 1200 ft 2½" C. R. L. hose.

Streets not paved. Public lights electric.

*Population 12,000 Prevailing Winds, West.*

### WATER FACILITIES

*Gravity system of water works owned by the city and constructed in 1875. Water supply from four lakes, viz.:- City lake, located 1¼ miles N.W. of City Hall; capacity 320 million gals., elevated 220 ft. above high water. North Million lake, capacity 100 million gals., located two miles N.W. of and 50 ft. above City lake and which it flows through a 20" pipe. Rock Lake, capacity 183 million gals., located one mile West of and 60 ft. above City lake into which it flows by means of a brook and Crystal Lake, capacity 12 million gals., which is a reserve supply, located ½ miles N.W. of Post Off., at an elevation of 283 ft. above high water. Crystal Lake is connected with City Lake outlet by a 12" pipe. Water flows from City Lake through 16" pipe and through filter bed to a collecting reservoir of 250,000 gals capacity, elevated 239 ft. above high water thence through 16" pipe to distributing mains.*

*75 miles of water pipes, 4" up to 16" in. 185 hydrants at South Norwalk, 25 at East Norwalk, 15 at Rowayton, 11 at Bell Island and 3 at Roton Point. Four connections with Norwalk City Water Works. East Norwalk partly supplied by the Norwalk system, as shown on detail sheets. Average pressure 65 lbs. per sq. inch. Average daily consumption, 2,100,000 gals.*

### FIRE DEPARTMENT

*SO. NORWALK - Volunteer; one chief, two assistant chiefs, 75 call men and four permanent men. Six horses. Gamewell fire alarm system, 30 boxes. One combination wagon, one combination hook & ladder truck. One hose wagon, one supply wagon, 4000 ft. 2½ cotton rubber lined hose in good condition.*

*EAST NORWALK - One Chief, two assistant chiefs and 100 call men. Tower fire alarm system, 20 boxes. Volunteer. One hook & ladder truck, one hose wagon, two hose reels, 2200 ft. cotton rubber lined hose 500 ft. 2½ rubber hose.*

*ROWAYTON - One chief and 100 call men. Fire alarm by bell. One hook & ladder truck. One hose wagon two hose reels, 1800 ft. 2½ cotton, rubber lined hose. Two 40-gall. extinguishers.*

*BELL ISLAND - One hose reel 500 ft. 2½ hose.*

*Streets not paved. Public lights electric.*
