# MRPC Final Report Feedback

# Feedback

Page	Section	Comments	Category	Action
5	Committee Progress, Item 2: Prioritize Tasks	<i>Suggest eliminating this sentence: "This critical element was the Best Possible Medication History (BPMH) that is defined in Figure 3."</i>		
8	Committee Tasks, Best Possible Medication History	<i>This sentence is unclear: "To identify and refine the requirements statements, we first identified roles that would be consumers of the BPMH."  Suggest simplifying to "The first step in identifying the BPMH Requirements was identifying the stakeholder roles"</i>		
2		please change "functional requirements" to "actionable requisites or strategies" throughout the entire paper. Our committee should be focusing on ACTIONABLE solutions, strategies or ideas for solving the challenges we have identified in our quest for a useable BPMH and for our business plan—not functional requirements	Substantive Change	We will recognize in the report that moving forward we will use actionable strategies to make sure these are carried out. This will be a focus of MRPC work for the next year.
3		On page 3, please find a way to add Patient Engagement to the MRPC's 5 main goals for 2021 (possibly in the first goal)! CancelRx and Deprescribing should not be the only major issues or topics of discussion for 2021 (The MRPC should be informed of the progress with these 2 items through updates in 2021)...It is far more important for this group to focus on ways to ENGAGE patients in MRPC actionable strategies to implement our business plan and seek patient input on the best way to develop a current most accurate medication list (that includes all OTC, supplements and vitamins) that can be viewed and used by all the patient's providers!	Substantive Change	Include a statement above the 5 main goals, in keeping with the patient as the north star all activities will continue to be patient centered and focused on engaging all stakeholders in the continuum of care.

# Feedback

- 26 comments
  - 18 Minor Updates: Corrections/Improvements
  - 2 No Current Action
    - One comment that pertains to future activities
    - One comment on removing a figure that the administrative team felt should remain for accountability purposes
  - 6 Substantive Changes
    - 5 resulted in additional language/framing within the report
    - 1 is slated for discussion today

# Development of a New Business Requirement

Leslie Bennet 37

On Page 37, in the Table of Known Issues, Business Substantive Change Requirements and Functional Requirements Actionable Requisites, under Section 14.2 The System shall be capable of alerting patient to medication change Please add: "... including all medication recalls or shortages"

Will raise to the group for consideration to develop a new business requirement that would need functional requirements. Need group consensus.

## Possible Language for a new Business Requirement:

**" The Best Possible Medication History should be capable of alerting users to medication recalls and shortages"**

Motion to approve? Second?

# MRPC 2021 Goals

# Goals for 2021

- Develop an approach for the creation of the Best Possible Medication History.
- Create an online directory of relevant tools and solutions for communication to key stakeholders.
- Support development and implementation related to key medication reconciliation activities.
- Develop an implementation plan for the eleven recommendations from the working group.
- Actively monitor and support funding opportunities related to the purpose and goals of the MRPC.\*

# Updated Structure

- Bringing Speakers to the MRPC
  - Vendors
  - State of Connecticut Leadership
  - National Leadership
- Active Working Groups
  - In meeting opportunities for break out projects
