Report of Independent Auditors

To the Board of Trustees of
Norwalk Health Services Corporation

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of operations, of changes in net assets, and of cash flows present fairly, in all material respects, the consolidated financial position of Norwalk Health Services Corporation and its subsidiaries (the "System") at September 30, 2012 and 2011, and the results of their operations, their changes in net assets, and their cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the System's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

Our audits were conducted for the purpose of forming an opinion on the consolidated financial statements taken as a whole. The consolidating information, on pages 25 through 32, is presented for purposes of additional analysis of the consolidated financial statements rather than to present the financial position and results of operations of the individual companies. Accordingly, we do not express an opinion on the financial position, results of operations, and changes in net assets of the individual companies. However, the consolidating information has been subjected to the auditing procedures applied in the audit of the consolidated financial statements and, in our opinion, is fairly stated in all material respects in relation to the consolidated financial statements taken as a whole.

1. Organization and Significant Accounting Policies

Norwalk Health Services Corporation (the "Corporation") was incorporated as a not-for-profit organization under the nonstock corporation laws of Connecticut in February 1985.

The Corporation is the sole member of its subsidiaries which include The Norwalk Hospital Association and its majority interest in Norwalk surgery Center, LLC ("Hospital"); Norwalk Hospital Physicians & Surgeons, Inc. ("NHP&S"); Norwalk Health Care, Inc. ("NHC"); and Norwalk Hospital Foundation, Inc. ("Foundation"). The Corporation also owns 100% of the stock of S.W.C. Corporation ("S.W.C"), a Connecticut stock corporation, and Maple Street Indemnity company, Ltd. ("MSI"). MSI is a captive insurance company incorporated under the laws of the Bermuda Monetary Authority. NHP&S was previously known as Fairfield County Medical Services, Inc. and was a wholly owned subsidiary of the Hospital but as a result of a corporate reorganization, its name was changed and it became a wholly owned subsidiary of the Corporation

Principles of Consolidation

The consolidated financial statements include the accounts of the Corporation and its wholly owned subsidiaries. All significant intercompany accounts and transactions are eliminated in consolidation.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying footnotes. Actual results could differ from those estimates. The Corporation and its subsidiaries' significant estimates reflected in the consolidated financial statements include contractual and bad debt allowances for patient service revenue and the related patient accounts receivable, valuation of the intangible asset from acquisition, estimated settlements due to or from third parties, reserves for malpractice, workers' compensation and other self-insured liabilities, and benefit plans assumptions.

Income Taxes

The Corporation and its subsidiaries, with the exception of SWC and MSI, are not-for-profit organizations as described in Section 501(c) (3) of the Internal Revenue Code and are exempt from federal income taxes on related income pursuant to Section 501(a) of the Code. Tax provisions and related liabilities for SWC are not material to the consolidated financial statements. MSI is a foreign corporation exempt from United States taxation.

Regulatory Matters

The Hospital is required to file annual operating information with the State of Connecticut Office of Health Care Access ("OHCA").

Cash Equivalents

The Corporation and its subsidiaries consider all highly liquid investments with a maturity of three months or less when purchased to be cash equivalents. The carrying value of cash equivalents approximates its fair value.

Concentration of Credit Risk

Cash and cash equivalents are maintained with domestic institutions. Management monitors the financial strength of these institutions.

Investments

Investments in equity securities with readily determinable fair values and all investments in debt securities are recorded at fair value, based upon quoted market prices. Investment income or loss (including realized gains and losses on investments, interest and dividends) is included in the excess of revenues over expenses unless the income or loss is restricted by donor or law.

Fair Value Measurements

The Corporation and its subsidiaries records investments in the financial statements at fair value. Fair value is a market-based measurement based on assumptions that market participants would use in pricing an asset or liability. As a basis for considering assumptions, a three-tier fair value hierarchy has been established which prioritizes the inputs used to measure fair value. The three levels of the fair value hierarchy under this principle are as follows:

- Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets and liabilities in active markets that the Corporation and its subsidiaries have the ability to access at the measurement date.
- Level 2 Inputs to the valuation methodology include:
- Quoted prices for similar assets and liabilities in active markets;
 - Quoted prices for identical or similar assets and liabilities in inactive markets;
 - Inputs other than quoted prices that are observable for the asset or liability;
 - Inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- If the asset and liability has a specified term, the Level 2 input must be observable for substantially the full term of the asset and liability.
- Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The fair value of the Corporation and its subsidiaries' investments are based on quoted market values.

The fair value of the Corporation's beneficial interest in trust is based on valuation techniques that use significant inputs that are unobservable as they trade infrequently or not at all.

Fair Value Option

The Corporation and its subsidiaries elected to measure its investments at fair value. Accordingly, unrealized gains and losses on investments are included in excess of revenues over expenses.

Assets Whose Use is Limited

Assets whose use is limited primarily include assets held by trustee under indenture agreements and investments held by trustee for self-insurance.

Beneficial Interest in Trust

The Corporation and its subsidiaries have been named sole or participating beneficiary in one remainder trust. Under the terms of this trust, the Corporation and its subsidiaries have the irrevocable right to receive the remaining principal and income earned on the trust assets. The estimated present value of the future payments to the Corporation and its subsidiaries is recorded at the fair value of the Corporation and its subsidiaries' proportionate interest in the assets held in trust. In 2012 and 2011, no distributions were received from this trust.

Inventories

Inventories are stated at the lower of cost, determined on the first-in, first-out (FIFO) method, or market.

Investments in Joint Venture

The Hospital and its subsidiaries have invested in a joint venture which is accounted for under the equity method of accounting.

Property, Plant and Equipment

Property, plant and equipment are recorded at cost or, if received as a donation, at the fair value on the date received. The Corporation and its subsidiaries provide for depreciation of property, plant and equipment using the straight-line method in amounts sufficient to amortize the cost of the assets over their useful lives. Useful lives assigned to assets are as follows: Land Improvements – 2–25 years; Buildings – 15–40 years; and Equipment – 3–20 years.

Temporarily and Permanently Restricted Net Assets

Temporarily restricted net assets are those whose use has been limited by donors to a specific time frame or purpose. Permanently restricted net assets have been restricted by donors to be maintained in perpetuity.

Donor Restricted Gifts

Unconditional promises to give cash and other assets to the Corporation and its subsidiaries are reported at fair value at the date the promise is received. Conditional promises to give and indications of intentions to give are reported at fair value at the date the conditions are met. The gifts are reported as either temporarily or permanently restricted support if they are received with donor stipulations that limit the use of the donated assets. Pledges receivable at September 30, 2012 were discounted using rates ranging from .13% to 4%. Pledges receivable at September 30, 2011 were discounted using rates ranging from .13% to 4%. Amortization of the discount is included in contribution revenue. At September 30, 2012 and 2011, pledges receivable, which are included in other current assets or other assets, were approximately \$7,925,000 and \$6,384,000, respectively.

When a donor restriction expires, that is, when a stipulated time restriction ends or purpose restriction is accomplished, temporarily restricted net assets are reclassified to unrestricted net assets and reported in the consolidated statement of operations as net assets released from restrictions. Donor-restricted contributions whose restrictions are met within the same year as received are reported as unrestricted contributions in the accompanying financial statements.

Medical Malpractice Self-Insurance

As of October 1, 2005, the Corporation and its subsidiaries are insured for general liability and professional liability claims by MSI. The Corporation and its subsidiaries, excluding Norwalk Health Care, has obtained professional liability coverage through MSI of \$35,000,000 per claim and \$48,000,000 in the aggregate. Norwalk Health Care has obtained professional liability coverage through MSI of \$32,000,000 per claim and \$34,000,000 in the aggregate. MSI purchases \$30,000,000 of excess reinsurance coverage above a self-insured retention of \$5,000,000 per claim and \$18,000,000 in the aggregate.

The Corporation and its subsidiaries established an irrevocable trust for the purpose of setting aside assets to pay general and professional liability claims incurred prior to the formation of MSI on October 1, 2005, based on actuarial funding recommendations. Under the trust agreement, the trust assets can only be used for payment of malpractice losses, related expenses, and the cost of administering the trust. The assets of, and contributions to, the trust are reported as part of unrestricted net assets; income from the trust assets and administrative costs are reported in the consolidated statement of operations. Management accrues its best estimate of malpractice losses as they occur.

Fair Value of Financial Instruments

The carrying value of cash and cash equivalents, short term investments, accounts receivable, other receivables, assets limited as to use, assets held in trust by others, investments, accounts payable and accrued liabilities at the balance sheet dates approximate their fair values. The fair value of debt, based on current market rates for similar debt, was approximately \$71,582,000 and \$83,042,000, in 2012 and 2011, respectively. The carrying value of debt is \$61,771,000 and \$74,410,000 in 2012 and 2011, respectively.

Statement of Operations

The consolidated statement of operations includes the excess of revenues over expenses. Changes in unrestricted net assets which are excluded from excess of revenues over expenses, consistent with industry practice, includes pension-related changes other than net periodic benefit cost, net assets released from restrictions used for capital, a transfer from Norwalk Surgery Center, LLC, and noncontrolling interest in joint venture.

Nonoperating Income

Activities, other than in connection with providing health care services, are considered to be nonoperating. Nonoperating income (expense) primarily consists of investment income, unrealized and realized gains and losses on investments, loss on sale of equipment, loss on sale of Nursing home, and a provision for joint venture investment.

Asset Retirement Obligation

The Corporation and its subsidiaries record a liability for legal obligations associated with the retirement of tangible long-lived assets when the timing and/or method of settlement of the obligation is conditional on a future event. The fair value of a liability for a conditional asset retirement obligation is recognized in the period in which it occurred if a reasonable estimate of fair value can be made.

Implementation of Accounting Standards

Effective October 1, 2011, the Corporation adopted the provisions of ASU 2010-24, "Presentation of Insurance Claims and Related Insurance Recoveries", which clarifies that health care entities should not net insurance recoveries against the related claims liabilities. In connection with the Corporation's adoption of ASU 2010-24, the Corporation recorded an increase in its assets and liabilities of approximately \$43,000,000 in the accompanying Consolidated Balance Sheet as of September 30, 2012.

2. Revenues From Services to Patients

The following table summarizes revenues from services to patients:

	2012	2011
Gross revenues from services to patients	\$ 961,852,662	\$ 882,791,669
Deductions and exclusions		
Allowances	<u>573,190,117</u>	<u>507,801,522</u>
Net revenues from services to patients	<u>\$ 388,662,545</u>	<u>\$ 374,990,147</u>

Revenues and patient accounts receivable are recorded when patient services are performed. Amounts received from certain payors are different from established billing rates of the various providers, and these differences are accounted for as allowances.

Net patient service revenue is reported at the estimated net realizable amounts from patients, third-party payors and others for services rendered. Revenue under third-party payor agreements is subject to audit and retroactive adjustments. Provisions for estimated third-party payor settlements and adjustments are estimated in the period the related services are rendered and adjusted in future periods as additional information becomes known or final settlements are determined.

Inpatient acute care services rendered to Medicare program recipients are paid at prospectively determined rates per discharge varying according to the intensity of services required. Inpatient acute care services are paid based on Diagnosis-Related Groups ("DRG"), inpatient rehabilitation services are paid based on Case Mix Groups ("CMG"), and inpatient psychiatry services are paid on a prospective per diem rate. Outpatient services are reimbursed by Medicare on an Ambulatory Payment Classification ("APC") basis and fee screens. Hospital claims for reimbursement are subject to review and audit. The Hospital's Medicare costs reports have been final settled with the Medicare fiscal intermediary through 2006.

Inpatient Medicaid reimbursement through the Connecticut Department of Social Services ("DSS") is reimbursed on a per diem basis with settlement cost reports based on discharges filed in the subsequent fiscal year. Outpatient activity through DSS is reimbursed based on fee schedules in effect at the time the service is provided. Managed Medicaid services are reimbursed according to per diems and fee schedules in place at the time the service is provided.

The Hospital has agreements with various Health Maintenance Organizations (HMOs) to provide medical services to subscribing participants. Under these agreements, the Hospital receives fee-for-service payments for covered services based upon discounted fee schedules.

Norwalk Health Services Corporation and Subsidiaries
Notes to Consolidated Financial Statements
September 30, 2012 and 2011

The Corporation and its subsidiaries grant credit without collateral to their patients, most of whom are local residents and are insured under third-party payor agreements. The mix of net revenue from patients and third-party payors at September 30, 2012 and 2011 are as follows:

	2012	2011
Commercial/other	57 %	54 %
Medicare	25	27
Self pay	8	8
Medicaid	10	11
	<u>100 %</u>	<u>100 %</u>

The mix of net receivables from patient and third-party payors at September 30, 2012 and 2011 are as follows:

	2012	2011
Commercial/other	63 %	71 %
Medicare	27	20
Self pay	2	5
Medicaid	8	4
	<u>100 %</u>	<u>100 %</u>

Laws and regulations governing the Medicare and Medicaid programs are extremely complex and are subject to interpretation. While management believes that the members of the System are in compliance with all such applicable laws and regulations, as referenced in Note 16 compliance with such laws and regulations is subject to government review and interpretation and can result in significant regulatory action including fines, penalties and exclusion from the Medicare and Medicaid programs. As a result, there is at least a reasonable possibility that recorded estimates can change by material amounts. In addition, changes in the Medicare and Medicaid programs and the reduction of funding levels could have an adverse impact on the System.

The Hospital and NHC accept all patients regardless of their ability to pay. A patient is classified as a charity patient by reference to established policies. These policies define charity services as those services for which no payment is anticipated. In assessing a patient's ability to pay, the Hospital and NHC utilize the generally recognized poverty income levels for the state published in the Federal Register, but also include certain cases where incurred charges are significant when compared to income. For the years ended September 30, 2012 and 2011, the Hospital provided charity care of approximately \$17,929,000 and \$17,327,000, respectively, in charges.

Assumptions

The weighted-average assumptions used to determine the year-end benefit obligation at September 30 are as follows:

	2012	2011
Discount rate	3.90%	4.68%
Rate of compensation increase	3.50%	3.50%

The weighted-average assumptions used to determine net periodic benefit cost for year ended September 30 are as follows:

	2012	2011
Discount rate	4.68%	5.17%
Expected return on assets	8.00%	8.00%
Rate of compensation increase	3.50%	3.50%

The Hospital's expected long-term rate of return on assets assumption is derived from a review of anticipated future long-term performance of individual asset classes and consideration of the appropriate asset allocation strategy given the anticipated requirements of the plan to determine the average rate of earnings expected on the funds invested to provide for the pension plan benefits. While the review gives appropriate consideration to recent fund performance and historical returns, the assumption is primarily a long-term, prospective rate.

Plan Assets

The Hospital's pension plan asset allocations at September 30 are as follows:

Asset category	Percentage of Plan Assets	
	2012	2011
Equity securities	60 %	56 %
Debt securities	40 %	44 %
	100 %	100 %

The Hospital maintains target allocation percentages among various asset classes based on an investment policy established for the pension plan which is designed to achieve, long-term objectives of return, while mitigating against downside risk and considering expected cash flows. The current weighted-average target asset allocation is equity securities 60%, and debt securities 40%. The investment policy is reviewed from time to time to ensure consistency with the long-term objective of funding the plan to a level sufficient to pay plan benefits as they become due.

10. Endowments

The Corporation's endowment funds consist of donor restricted funds to be invested in perpetuity to provide a permanent source of income. The net assets associated with endowment funds are classified and reported based on the existence or absence of donor imposed restrictions.

The Corporation and its subsidiaries classify net assets of donor-restricted endowment funds for organizations subject to an enacted Uniform Prudent Management of Institutional Funds Act ("UPMIFA"). Connecticut enacted its UPMIFA statute effective October 1, 2007. This standard requires not-for-profit organizations subject to an enacted version of UPMIFA to classify the portion of the endowment fund that is not classified as permanently restricted net assets as temporarily restricted net assets (time restricted) until appropriated for expenditure by the organization. The portion to be classified as temporarily restricted consists of accumulated unspent income and appreciation.

The Corporation has interpreted the Connecticut UPMIFA statute as requiring the preservation of the original gift as of the gift date of the donor-restricted endowment funds absent explicit donor stipulations to the contrary. As a result of this interpretation, the Corporation classifies as permanently restricted net assets, (a) the original value of gifts donated to the permanent endowment, (b) the original value of subsequent gifts to the permanent endowment, and (c) accumulations to the permanent endowment made in accordance with the direction of the applicable donor gift instrument at the time the accumulation is added to the fund. The remaining portion of the donor-restricted endowment fund that is not classified as permanently restricted net assets is classified as temporarily restricted net assets until those amounts are appropriated for expenditure in a manner consistent with the standard of prudence prescribed by UPMIFA. In accordance with UPMIFA, the Corporation considers the following factors in making a determination to appropriate or accumulate endowment funds:

- (1) The duration and preservation of the fund
- (2) The purposes of the Corporation and the donor restricted endowment fund

Norwalk Health Services Corporation and Subsidiaries
Notes to Consolidated Financial Statements
September 30, 2012 and 2011

- (3) General economic conditions
- (4) The possible effect of inflation and deflation
- (5) The expected total return from income and the appreciation of investments
- (6) Other resources of the Corporation
- (7) The investment policies of Corporation.

Prior to enactment of UPMIFA, the Corporation followed the provisions of the Uniform Management of Institutional Funds Act.

Consistent with that objective, the primary investment goal is to earn annual interest and dividends.

12. Acquisition of Norwalk Radiology & Mamography Center

In 2011, a medical imaging Joint Venture between SWC Corporation, an affiliate of the Hospital, and a group of physicians was terminated. The Hospital purchased the medical imaging business from the group of physicians that was previously part of the Joint Venture for \$20,000,000. The Hospital has recorded as purchase consideration an additional \$1,914,723 which represents SWC investment in the Joint Venture at the time of sale and an accrual of \$1,000,000 as an estimate of the potential earn out based on volume. This earn out is also recorded as a liability. The transaction was recorded as follows:

Goodwill	\$ 13,843,749
Covenant not to compete intangible	7,945,063
Property, plant and equipment	872,039
Inventory	132,293
Prepaid expenses	121,579
	<u>\$ 22,914,723</u>

The value of the Covenant Not to Compete ("CNC") is based on the management's assessment of a 50% probability of radiologist competition and a maximum 60% reduction in volume over a three year period. The CNC was projected to have an impact in perpetuity. The Hospital is amortizing the noncompete intangible over the 10 year length of the noncompete agreement on a straight-line basis. Accumulated amortization as of September 30, 2012 amounted to \$1,191,760.
